HOSPITALITY SOLUTION

A HIGHLY SCALABLE SOLUTION

From the tranquility of a boutique hotel to the dynamism of a large international chain, Ekinex technology adapts intelligently and stylishly to any context. Flexible and modular, it offers tailor-made solutions that improve operational efficiency, comfort, and guest experience.

- **A Single, Scalable Solution:** whether managing a small boutique hotel or a global hotel chain, Ekinex's technology adapts to meet your needs.
- **Seamless Guest Experience:** personalisation and automation for lighting, climate, shading, audio and access control ensure comfort and convenience.
- **Operational Efficiency:** remote monitoring, centralised management, improve staff productivity and reduced costs.
- **Energy Savings & Sustainability:** with Delégo virtual presence function the rooms automatically adjust settings based on occupancy, leading to significant reductions in energy consumption.
- **Future-Proof & Open Standard:** based on KNX, the most reliable and interoperable building automation standard, ensuring long-term flexibility and third-party system compatibility.

DELÉGO SUITE: ONE SOFTWARE FOR ALL APPLICATIONS

Delégo Suite is the centralised software platform that simplifies system integration and management. It combines room automation, access control, energy management, and other integrations, offering a smart and efficient solution for hospitality facilities.

DELÉGO VISUALISATION

Thanks to Delégo, you can stay connected to your home at all times, from anywhere, at any time of day. Delégo monitors every room, ensuring your safety, well-being, and comfort.

ACCÉDO MODULE

Guestroom access control management, bookings administration, easy and fast interface to register guests and create RFID keys. Easy overview of rooms divided by floors and areas.

DELÉGO APP

Mobile and tablet-based app for local and remote access, to control lights, temperatures and scenes of public spaces with an easy and intuitive interface.

THE SOLUTIONS OFFERED BY EKINEX

With Ekinex, hotels can centralise control of lighting, air conditioning, audio, and access management, ensuring that every space operates at peak performance, efficiency, and comfort.

WALL-MOUNT DEVICES

Products designed and created following a harmonious stylistic line, with attention to detail, so that interaction with the environment is beautiful, clean, and essential. Compatible with the KNX standard and customisable with text and icons, they manage lighting, climate, and blinds, also integrating the thermostat function. Made of metal, Fenix NTM®, and technopolymer, they offer elegant and versatile solutions for every application.

ACCESS CONTROL

Solutions designed to welcome guests with refinement, security, and practicality. Our access control systems stand out for their compact and discreet structure, perfect for blending harmoniously into modern hospitality environments.

DIN RAIL MODULES

We offer a wide range of DIN rail modules based on KNX and Dali standards, which enable automated and decentralised management of technological systems of all types and sizes.

PRESENCE SENSORS

Our presence sensors activate lights, comfort features, and services in an intelligent way. Compact, discreet, and easy to integrate, they help create refined spaces that are perfectly optimised for hospitality.

ACCESSORIES

Designed to combine beauty and convenience, making every space more comfortable and harmonious, from classic power outlets to waterproof versions, to multifunction tabletop controls, capable of making every daily gesture simple and natural.

ROOM CONTROLLER THERMOSTATS

Essential form and advanced technology for intuitive control of climate, lighting, and blinds. A touch that transforms the space into exclusive comfort, where aesthetics and efficiency merge in perfect balance. The system is designed to integrate seamlessly with the architecture of the space, creating a harmonious and functional environment.

REVÉLO LIFT TV

We love watching our favorite series, sporting events, and the news as soon as we wake up, but we only want to watch TV when we need to. We have created Italian-made lifts to optimise your space and hide your TV when it is not in use.
