INTRODUCTION

.....

The Company	07
The automation of buildings	09
The KNX standard	10
The advantages	12
The Ekinex® devices	15

We believe

in technology that makes life easier.
We develop devices that make everyday gestures easier.
Our scenario is the whole world.

We want

to combine technology and design.
To give life to something unique that combines
two seemingly distant worlds.

The Company

Technology meets design.

We offer a form without ever leaving aside its content. We present a product with a strong technological content which is also cutting edge from an aesthetic point of view. Design becomes the driving force behind technology, the key to opening our doors to the world of smart homes. We use the potential of the KNX system to guarantee high quality standards for a project we have called Ekinex®.

Our devices are developed and manufactured in Italy.

Ekinex® has created a line of objects that encloses the essence of the Made in Italy: design, attention to detail, technological innovation and advancement. Designed for a global market, Ekinex® products are an expression of the new Italian tradition, which combines the attention of craftsmanship in the creation of the product to high technological levels. Ekinex® supports the idea of a design that is not just an aesthetic exercise, but one that understands, as fundamental factors, ease of use, immediate understanding of the function and the balanced and intelligent application of technology.

The automation of buildings

Ekinex® is an intelligent system for controlling homes and buildings, developed in accordance with the open KNX standard. Having an Ekinex® system means **to increase comfort and safety, reduce energy consumption and raise the long-term value of a building** using products characterized by fine aesthetics and a great simplicity of use.

Setting up an Ekinex® system is easy: a signal network is arranged at project level, reaching all those areas where commands, sensors or loads to be system-controlled are expected. The arrangement, achieved by means of a simple signal cable, represents an authentic network for the exchange of information between Ekinex® devices.

The scalability, typical of Ekinex® building control systems, even allows to start off with a basic equipment, both in terms of functions and devices, which may be extended at a later stage, depending on individual requirements, the location's infill and economic availability. **The investment is quickly paid back, and is protected in time.** Thanks to the native openness and interoperability of the KNX standard, the system can even integrate functions that may not be available within the Ekinex® range of products.

The KNX standard

Great developments in the field of home and building automation were made possible especially thanks to an open, modular and interoperable standard like KNX. This innovative standard was born from the merging of three European systems (EIB, BatiBUS and EHS), developed and brought to the market in the early 90's. The diffusion of the system was facilitated by an intense work of cooperation at normative level in the standard committee at European level. For this reason, too, **KNX is a standard characterized by a total conformity with norm EN 50090** on electronic systems for the control of homes and buildings (HBES, Home and Building Electronic Systems).

The twenty-year presence on the market of this standard offers the best guarantee in terms of reliability and consolidation of the technology used. The openness of the standard and that of the KNX Association, on the other hand, ensure availability of products in the long run and a constant development, both in terms of technology and offering of products, functions and applications.

- The vitality of KNX proposals is witnessed by the sustained expansion of the association, seeing the entry of manufacturers, coming from many different areas, and from the tens of thousands of technicians who chose it to specialize in the field of building automation.
- Achievable savings with the adoption of the KNX system for Home & Building control:**
- 40% over shutters control
 - 50% over individual ambient control
 - 60% over ambient lighting control
 - 60% over ventilation control

For customers, the variety and availability of KNX products has no comparison in other technological areas, and the system openness translates into the highest free choice, thereby avoiding the disadvantageous dependence of having to buy from a single supplier. Thanks to the modularity of the system, a project can be extended in time, starting with a basic configuration and adding more functions later. **The native interoperability of KNX products is fundamental to technicians**, as it allows to design a system by always choosing the most suitable technical options, reducing compromise and ties caused by isolated systems which do not converse with one another. **Moreover, the system offers new professional opportunities to designers and system integrators, making it possible to receive a consistent and high-level technical training and become certified KNX Partners.**

The KNX standard is entirely compliant with norm EN 50090 on HBES (Home and Building Electronic Systems) systems)

The advantages

Design, realize and use a home & building control plant with the KNX system has many advantages.

Designer

- Compliant, open, interoperable system
- Can be used in all types of buildings, from small residential to large service industry ones
- Devices, from over 300 manufacturers, communicating between each other in native mode
- Constant expansion of available functions and applications
- System design by means of standard software (ETS), manufacturer-independent
- Easy realization of commands, controls, visualisations and displays
- Wide availability of complex logic
- Interfacing towards numerous other systems, protocols and standards
- Simple logic connections between functions and devices
- Large choice of device parametrizing options based on single requirements
- Reduction of building's fire load
- Certified training, standardized and available worldwide

Installer

- Reduced device assembly and cabling times
- Unique, fast connection system (cable and bus terminal block) for all manufactures
- High quality and reliability of products (consolidated system)
- Configuration and service commissioning by means of standard, manufacturer-independent software (ETS)
- Speed and flexibility in the expansion and the modification of use
- Remote access for maintenance and diagnosis interventions
- Reduction of cables needed for command, control and distribution circuits
- Certified training, standardized and available worldwide
- Opportunities for professional advancements
- Access to the world of innovative systems

User

- Large choice of products
- High comfort, great operation safety
- More information, verification of own consumption habits
- Coordinated working of all building systems
- Multifunctional deployment of several devices
- System scalability and modularity
- Easy upgrading, without needing interventions on cabling nor masonry works
- Independence from single manufacturer
- More efficient building energy class (as per EN 15232)
- Easy system adaptations in case of changing needs
- Time-protected investment (open system)
- Building increase in value

The Ekinex® devices

The range of Ekinex® KNX devices includes system devices, devices dedicated to single application functions and accessories. System devices allow basic operation of the bus system, while the devices dedicated to single application functions are developed specifically to execute the command, control and/or monitoring the technical systems in the building, like lighting, heating or shading.

They include switching, control and display units, sensors and actuators, etc. Each device is fitted internally with a communication module linking to the KNX bus. All devices are realized in multiple mounting versions (protruding or recessed walls, electric cabinets or panels on DIN rails as per EN 60715) in accordance with their destination of use and with the main installation modality. The KNX certification guarantees the interoperability among the devices of different KNX manufacturers. The entire procedure is disciplined by the certification system developed by the KNX Association and is based on conformity tests carried out by third-party laboratories. The tests verify that the devices support the KNX protocol and that any information is coded in accordance with KNX specifications

The presence of a KNX trademark on Ekinex® devices is a guarantee for the customer:

- Ekinex® respects the quality management system in accordance with ISO 9001;
- The devices are compliant with the European norm EN 50090-2-2, concerning fundamental aspects like electromagnetic compatibility, electrical safety and environmental conditions of use;
- They comply with indications in volumes 3 and 6 of KNX specifications;
- They comply with KNX interoperability requirements concerning standardized data type and functional blocks.

ERA
BY MICHAEL VINCENT UY
WALL-MOUNT DEVICES

A new timeless collection.
Designed by architect Michael Vincent UY, the ERA series is a dialogue between past and future, a meeting between tradition and innovation. Each element is designed to embody timeless elegance, where essential shapes and refined details create a perfect balance between functionality and beauty.

Pulsanti ERA

BY MICHAEL VINCENT UY
WALL-MOUNT DEVICES

Inspired by the harmony of the ages, ERA translates history into a contemporary language, blending fine materials, sophisticated geometries and a minimalist aesthetic that enhances any space. A tribute to the evolution of design, in which each piece tells a story of style and craftsmanship.

ERA is born from the encounter between design and technology, between emotion and precision. Each element becomes an integral part of its surroundings, a unique piece that combines functionality and aesthetics. The sophisticated finishes reflect light in a thousand shades, transforming every interaction into a unique sensory experience.

ERA is not just a collection, it is a new way of experiencing the environment. It is elegance, it is emotion, it is the future taking shape with a simple touch. Let yourself be enveloped by the magic of the new ERA series and discover how a detail can change your perception of space.

An unprecedented fusion of design, functionality and innovation is ready to redefine the concept of space. With cutting-edge solutions designed to fit perfectly into your lifestyle, ERA brings a breath of modernity and style to any environment.

Pushbutton with RGB LED thermostat - ERA series

BY MICHAEL VINCENT UY
WALL-MOUNT DEVICES

Description

The ERA series 1, 2 and 4-key push button combines refined design and advanced functionality for simple, customisable control. It allows you to manage lights, shutters and other KNX functions, distinguishing between short and long presses. The integrated temperature sensor expands the possibilities of use, making the device even more versatile. The RGB LEDs on each button provide discreet and configurable visual feedback. Designed for wall mounting in flush-mounted boxes, ERA is the ideal choice for those seeking elegance and technology in a single device.

Main features

- Configurable in 1, 2 or 4 independent button versions
- 4 channels (up to 8 independent functions can be programmed)
- Freely programmable RGB LEDs for each button
- Customisable buttons
- Integrated temperature sensor
- Room thermostat function
- Bus line connection via KNX terminal
- Flush-mounted on round or square box
- IP20 protection rating (installed)

Technical data

- 30 Vdc power supply via KNX bus
- Current consumption from bus < 17 mA

Delivery

The supply includes a terminal for connection to the bus line, a metal bracket for mounting on a round or square box and two pairs of screws.

Accessories

- The following accessories are available separately to complete the system:
- ERA EK-TEV-... or EK-T2V-... series buttons
- EK-FOD-... or EK-FOE-... frame

Dimensions [mm]

Pushbutton with RGB LED thermostat and humidity sensor - ERA series

Pulsanti Proxima

WALL-MOUNT DEVICES

Every element is designed to harmonise with your world, whatever your aesthetic language. Every material, every detail, is carefully chosen to make you feel in balance with your surroundings.

The Ekinex® Proxima series pushbutton panel combines advanced functionality and practicality to simplify room control. It allows you to manage switching on and off, adjust light intensity, control motorised blinds and other programmable functions, adapting to your needs thanks to the ability to distinguish between short and long presses.

The integrated temperature sensor adds an extra level of comfort, transforming the button into a climate controller to keep the room temperature at the right level at all times. RGB LEDs for each button offer a touch of discreet customisation, while KNX technology ensures optimal integration into automation systems.

Proxima also stands out for its innovative magnetic mounting system, which allows for easy and stable installation on any surface, offering great flexibility of use. Designed for wall mounting in flush-mounted boxes, it is the ideal choice for combining technology and simplicity in a modern design.

1-fold pushbutton with thermostat RGB LED - Proxima series

WALL-MOUNT DEVICES

Description

The Proxima series 1-button combines advanced functionality and convenience to simplify room management. It allows you to control on/off switching, adjust light intensity, control motorised blinds and other programmable functions, and adapts to your needs by separating short and long presses. For added convenience, an integrated temperature sensor turns the pushbutton into a climate controller that keeps the room temperature at the right level at all times. RGB LEDs on each button provide a subtle individual touch, while KNX technology ensures optimal integration into automation systems. Designed for wall mounting in flush boxes, it is the ideal choice when you want to combine technology and simplicity with timeless design.

Main features

- 1-button version (up to 2 different functions can be configured)
- RGB LED for each freely programmable key
- Integrated temperature sensor
- Room thermostat function
- Connection to bus line via KNX terminal
- Recessed wall mounting on round or square box
- IP20 degree of protection (installed)

Technical data

- 30 Vdc power supply via KNX bus
- Power consumption from the bus < 17 mA

Delivery

The delivery includes a terminal for connection to the BUS line and site protection.

Accessories

The following accessories are available as add-ons and must be ordered separately:

- Proxima series keys EK-TTP-1-...
- Square magnetic plate EK-PQA-1-...
- Mounting bracket EK-SMP-71-1
- Optional: mounting bracket EK-SMP-Q-1 (check compatibility with flush box).

Dimensions [mm]

2-fold pushbutton with thermostat RGB LED - Proxima series

WALL-MOUNT DEVICES

Description

The Proxima series 2-buttons combines advanced functionality and convenience to simplify room management. It allows you to control on/off switching, adjust light intensity, control motorised blinds and other programmable functions, and adapts to your needs by separating short and long presses. For added convenience, an integrated temperature sensor turns the pushbutton into a climate controller that keeps the room temperature at the right level at all times. RGB LEDs on each button provide a subtle individual touch, while KNX technology ensures optimal integration into automation systems. Designed for wall mounting in flush boxes, it is the ideal choice when you want to combine technology and simplicity with timeless design.

Main features

- 2-buttons version (up to 4 different functions can be configured)
- RGB LED for each freely programmable key
- Integrated temperature sensor
- Room thermostat function
- Connection to bus line via KNX terminal
- Recessed wall mounting on round or square box
- IP20 degree of protection (installed)

Technical data

- 30 Vdc power supply via KNX bus
- Power consumption from the bus < 17 mA

Delivery

The delivery includes a terminal for connection to the BUS line and site protection.

Accessories

The following accessories are available as add-ons and must be ordered separately:

- Proxima series keys EK-TTP-2-...
- Square magnetic plate EK-PQA-2-...

4-fold pushbutton with thermostat RGB LED - Proxima series

WALL-MOUNT DEVICES

Description

The Proxima series 4-buttons combines advanced functionality and convenience to simplify room management. It allows you to control on/off switching, adjust light intensity, control motorised blinds and other programmable functions, and adapts to your needs by separating short and long presses. For added convenience, an integrated temperature sensor turns the pushbutton into a climate controller that keeps the room temperature at the right level at all times. RGB LEDs on each button provide a subtle individual touch, while KNX technology ensures optimal integration into automation systems. Designed for wall mounting in flush boxes, it is the ideal choice when you want to combine technology and simplicity with timeless design.

Main features

- 4-buttons version (up to 8 different functions can be configured)
- RGB LED for each freely programmable key
- Integrated temperature sensor
- Room thermostat function
- Connection to bus line via KNX terminal
- Recessed wall mounting on round or square box
- IP20 degree of protection (installed)

Technical data

- 30 Vdc power supply via KNX bus
- Power consumption from the bus < 17 mA

Delivery

The delivery includes a terminal for connection to the BUS line and site protection.

WALL-MOUNT DEVICES

Signum	
Description	Code
a) Signum pushbutton Deep version	EK-EV3-TP
b) Signum pushbutton Surface version	
c) Square plate Deep version (30 x 60 mm window)	EK-DQZ-...
d) Square plate Surface version (30 x 60 mm window)	EK-SQZ-...
e) Metal mounting support Deep version	EK-SMQ-71-S
f) Mounting support Surface version (included in delivery)	
g) Round flush-mounting box	not delivered by Ekinex®
h) Square flush-mounting box	not delivered by Ekinex®

The “virtual” pushbutton controls of the Signum series and their accessories offer the possibility of numerous variants to meet the most diverse requirements.

The EK-EV3-TP “virtual” pushbutton, which contains a KNX communication module inside, is suitable for mounting on a round or square wall flush-mounting box, provided with fixing holes with a centre distance of 60 mm. Each button is supplied with a metal mounting bracket, which can also be ordered separately if required; a terminal for connection to the bus line completes the supply.

The pushbutton is completed with a Deep or Surface version plate. The 2.65”, 162 x 320 pixel, 262K colours IPS RGB touch borderless display with haptic feedback can be configured to manage up to 4 buttons per screen and up to 3 screens in total. Each button can be customised via a dedicated app and certain attributes of each button can be changed even after installation, e.g. position, symbols and lettering. The pushbutton also offers the function of a room thermostat, thanks to the integrated temperature sensor. The proximity sensor integrated in the faceplate (to be ordered separately) provides visual comfort at night.

Configuration and commissioning of the devices is carried out using ETS® software; the relevant application programmes can be downloaded from www.ekinex.com.

Pushbuttons Signum

WALL-MOUNT DEVICES

Description

“Virtual”KNX-standard button, i.e. based on a borderless IPS touch display, in which each button can be customised via a dedicated app. it is possible to modify certain attributes of each button even after installation, e.g. position, symbols and lettering.

Main features

- Up to 4 buttons per screen and up to 3 screens in total can be configured
- Haptic pressure feedback
- Control and dimming of lighting devices
- Control of motorised drives for blinds (such as roller shutters, awnings blinds or shutters)
- Partially programmable attributes for each button
- 2.65" IPS RGB display, 162 x 320 pixels, 262K colours with haptic feedback
- Bluetooth BLE module for connection to programming app
- Room temperature detection via integrated sensor
- Proximity sensor integrated in the faceplate (to be ordered separately)
- Room thermostat function
- Connection to bus line via KNX terminal
- Recessed wall mounting on round or square box
- Configuration via App

Technical data

- 30 Vdc power supply via KNX bus
- Stand-by current consumption: 8 mA @30Vdc / max: 35 mA @30Vdc
- Wall mounting on round or square box
- IP20 degree of protection (installed)
- Technopolymer housing
- Climatic classification 3K5 and mechanical classification 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Dimensions: 83 x 77 x 37 mm
- Operating temperature: 5... + 45°C
- Storage temperature: 25... + 55°C
- Transport temperature: 25... + 70°C
- Relative humidity: 95% non-condensing

Delivery

Delivery includes a terminal block for connection to the bus, a plastic adapter, a metal support for installation onto round or square mounting box (fixing holes 60 mm apart), two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- square plate of the Deep or Surface version with 30 x 60 mm window

Dimensions [mm]

4 buttons page

Pushbuttons can be used to control devices lighting devices, scenarios and motorised drives. A long press can call up graphic pages for precise control of home automation elements.

Motorisation control page

The motorisation page allows you to control motorised locking elements using the up and down buttons.

Audio page

The audio page allows you to select an audio source, change the track currently playing and to raise or lower the volume.

Brightness control page

The graphic slider allows precise control of motorised or luminescent drives in percentages.

Room thermostat page

The thermostat page, designed to be simple and intuitive, allows the room temperature to be monitored and the desired temperature to be controlled.

Audio settings page

The audio settings page also allows control the volume level and equalisation of treble and bass. treble and bass equalisation.

Colour temperature adjustment page

It is possible to enable a dedicated page for controlling the hue of the light emitted by a light source. Switching from a cool colour to a warmer one will provide a completely different atmosphere.

Air conditioning page

The air conditioning page allows you to monitor the cooling temperature of the room, control the desired temperature, position of the fins and the ventilation speed.

PIN Code Protection Page

The PIN code protection page allows only authorised users to use the various commands and functions.

Documentation

Pushbuttons 20venti series

WALL-MOUNT DEVICES

A wider range of combinations and features. The 20venti series pushbuttons are available on Deep and Surface plates with 4 or 8 rockers modularity and built-in RGB LEDs to create any colour shade. Pushbuttons with 5 or 10 rockers modularity are also available for dimming lights or managing shutters.

The Ekinex® 20venti pushbuttons' series controls offer the possibility of numerous variants to meet the most diverse requirements. The basis is represented by the pushbutton that contains a KNX communication module inside. The EK-E20-TP-... is suitable both for mounting on a round or square wall-mounting box with fixing holes with 60 mm centre distance, and for mounting on a 3-place Italian standard rectangular wall-mounting box with fixing holes with 83.5 mm centre distance. Each pushbutton is delivered with a terminal block and two pairs of fixing screws.

The button must be completed with its relative metal support, a plastic adapter, the keys and a plate from the Deep or Surface version. The buttons are available in rectangular shape, in plastic material. The button has integrated RGB LEDs that can be freely programmed: for example, for status indication or as a night orientation light. The device also offers the function of a room thermostat, thanks to the integrated temperature sensor. The integrated proximity sensor ensures maximum readability when using the pushbutton panel and allows visual comfort during the night.

The devices are configured and commissioned using the ETS® software; the relevant application programs can be downloaded from www.ekinex.com.

4/8-fold pushbutton with backlit text/symbols and proximity sensor 20venti series

WALL-MOUNT DEVICES

Description

The Ekinex® 20venti series 4/8-fold pushbutton is used for on/off control of utility devices, dimming of luminaires, control of motorized drives for roller shutters or other programmable control functions. Thanks to the integrated temperature sensor, the button can act as a temperature controller for a room or zone. RGB LED for each rocker. The switch has an integrated KNX bus communication module and is designed for installation in a flush-mounted wall box.

Main features

- 4/8 fold version (possibility to configure up to 4 or 8 independent functions)
- RGB LED for each freely programmable rocker
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Plastic casing
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 17 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- 4 or 8 rectangular 30 x 15 mm plastic rockers with or without backlit text/symbol
- square plate of the Deep and Surface version with 30 x 60 mm or 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square mounting box (fixing holes 60 mm apart)

Dimensions [mm]

8-fold pushbutton with backlit text/symbols and proximity sensor for rectangular wall-box 20venti series

WALL-MOUNT DEVICES

Description

The Ekinex® 20venti series 8-fold pushbutton is used for on/off control of utility devices, dimming of luminaires, control of motorized drives for roller shutters or other programmable control functions. Thanks to the integrated temperature sensor, the button can act as a temperature controller for a room or zone. RGB LED for each rocker. The switch has an integrated KNX bus communication module and is designed for installation in a flush-mounted wall box.

Main features

- 8 fold version (possibility to configure up to 8 independent functions)
- RGB LED for each freely programmable rocker
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Plastic casing
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round,square or rectangular wall box
- IP20 protection degree (installed)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 17 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- 8 rectangular 30 x 15 mm plastic rockers with or without backlit text/symbol
- rectangular plate of the Deep version with 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square (fixing holes 60 mm apart) or rectangular (fixing holes 83,5 mm apart) mounting box

Dimensions [mm]

10-fold pushbutton with backlit text/symbols and proximity sensor 20venti series

WALL-MOUNT DEVICES

Description

The Ekinex® 20venti series 5/10-fold pushbutton is used for on/off control of utility devices, dimming of luminaires, control of motorized drives for roller shutters or other programmable control functions. Thanks to the integrated temperature sensor, the button can act as a temperature controller for a room or zone. RGB LED for each rocker. The switch has an integrated KNX bus communication module and is designed for installation in a flush-mounted wall box.

Main features

- 5/10 fold version (possibility to configure up to 5 or 10 independent functions including 2 or 4 functions for adjustments)
- RGB LED for each freely programmable rocker
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Plastic casing
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 17 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- 3 or 6 rectangular 30 x 15 mm plastic rockers with or without backlit text/symbol and 1 or 2 rectangular 30 x 15 mm plastic rockers for adjustments
- square plate of the Deep and Surface version with 30 x 60 mm or 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square mounting box (fixing holes 60 mm apart)

Dimensions [mm]

10-fold pushbutton with backlit text/symbols and proximity sensor for rectangular wall-box 20venti series

WALL-MOUNT DEVICES

Description

The Ekinex® 20venti series 10-fold pushbutton is used for on/off control of utility devices, dimming of luminaires, control of motorized drives for roller shutters or other programmable control functions. Thanks to the integrated temperature sensor, the button can act as a temperature controller for a room or zone. RGB LED for each rocker. The switch has an integrated KNX bus communication module and is designed for installation in a flush-mounted wall box.

Main features

- 10 fold version (possibility to configure up to 10 independent functions including 4 functions for adjustments)
- RGB LED for each freely programmable rocker
- Integrated temperature sensor
- Integrated proximity sensor
- Room thermostat function
- Plastic casing
- Connection to bus line with KNX terminal block
- Wall-mounting installation on round, square or rectangular wall box

FF Deep
WALL-MOUNT DEVICES

Versatile and suitable for any setting. The Deep version of the FF series consists of devices with integrated LEDs with adjustable light intensity, touch-displays, power sockets and keystone modules. Versatile and compact, it lends itself to various combinations and blends in with all furnishing styles. The materials used are plastic, metal, Metal HT and the nanotechnology Fenix NTM®.

Available colour solutions

*) In the FF Deep we suggest the use of the pushbuttons and room thermostats of the FF - 'NF' series

FF Surface
WALL-MOUNT DEVICES

Compact and essential. Creates a continuum with the wall in a few millimetres of thickness. The Surface version of the FF series caresses surfaces to create a uniform effect between button and wall. It consists of devices with integrated LEDs with adjustable light intensity, touch-displays, power sockets and keystone modules. Declined in materials with a strong personality such as metal, Metal HT and Fenix NTM®, it finds its ideal place in all rooms of the contemporary home.

Pushbuttons FF series

WALL-MOUNT DEVICES

Four or six channels, square or rectangular keys, with or without frame, with or without LED, with or without temperature sensor and thermostat function. Choose the combination that best suits your needs of style and features.

The Ekinex® pushbuttons of FF series range and related accessories offer the possibility to realize several variations that will satisfy the most diverse needs. The base is represented by the 4-fold (EK-ED2-TP and EK-E32-TP) and 6-fold (EK-EH2-TP) pushbuttons; each one is fitted with a KNX communication module. The 4-fold pushbutton is suitable for mounting into a flush mounting box, either round or square, provided with fixing holes 60 mm apart, while the 6-fold version is also ideal for mounting into a rectangular wall mounting box 3 seater according to the Italian installation standard provided with fixing holes 83,5 mm apart. Each device is supplied with its relative metal support which, in case of necessity, can also be ordered separately. A terminal block complete the supply.

The pushbuttons must be finished off with an operation surface (rockers) and a frame. The rockers are available in square and rectangular shapes, plastic material, aluminium or Fenix NTM®, in several colour and finishing variations. The rockers can be personalized with symbols and texts, so to make their function immediately understandable. Versions EK-ED2-TP and EK-EH2-TP have integrated LEDs which can be programmed freely: as an example, as a status feedback or as an orientation light at night time. Two colour combinations are available for the LEDs: blue / green or red / white. The same versions also offer a room thermostat function, thanks to the integrated temperature sensor. The frames, square and rectangular, are available in two stylish alternatives (Form and Flank) and are available in plastic material or aluminium. The 'NF' version of the 4-fold pushbutton is mounted without frame and is provided with a side profile in white or black colour.

The pushbuttons simply get connected to the unique signal bus cable and do not require auxiliary power supply: the devices are supplied at SELV (Safety Extra Low Voltage) voltage, thus offering a much higher safety level than traditional commands. The configuration and commissioning is carried out by means of the ETS® software. The related application programs can be downloaded from the www.ekinex.com website.

4-fold basic pushbutton FF series

WALL-MOUNT DEVICES

Description

The 4-fold pushbutton of Ekinex® FF series commands loads on/off switching, controls the dimming of lighting devices, controls motor drives for shutters or executes any other programmable command and control function. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- 4-fold (possibility to configure up to 8 independent functions)
- Plastic casing
- Wall-mounting installation
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- IP20 protection degree (installed)
- Weight 80 g (with mounting support)

Technical data

- 30 Vdc power supply through KNX bus
- Current consumption from bus < 15 mA

Delivery

Delivery includes a terminal block for connection to the bus, a metal support for installation onto round or square mounting box (fixing holes 60 mm apart) and two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- square or rectangular rockers
- square frame Form or Flank version

Dimensions [mm]

Order information

Code	Mounting	Side profile
EK-E32-TP	with square frame Form or Flank version	black

4-fold pushbutton and room thermostat FF series

WALL-MOUNT DEVICES

Description

The 4-fold pushbutton of Ekinex® FF series commands loads on/off switching, controls the dimming of lighting devices, controls motor drives for shutters or executes any other programmable command and control function. Thanks to the integrated temperature sensor, the pushbutton can work as a thermostat for a room or a zone. The LEDs can be chosen in the colour combinations blue / green or white / red. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- 4-fold (possibility to configure up to 8 independent functions)
- 4 freely programmable LEDs for each channel
- 2 colour combination available for the LEDs (blue/green or red/white)
- Integrated temperature sensor
- Room thermostat function
- Plastic casing
- Wall-mounting installation on round or square wall box
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- IP20 protection degree (installed)
- Weight 80 g (with mounting support)

Technical data

- 30 Vdc power supply through KNX bus
- Current consumption from bus < 15 mA

Delivery

Delivery includes a terminal block for connection to the bus, a metal support for installation onto round or square mounting box (fixing holes 60 mm apart) and two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- square or rectangular rockers
- square frame Form or Flank version

Dimensions [mm]

Order information

6-fold pushbutton FF series

WALL-MOUNT DEVICES

Description

The 6-fold pushbutton of Ekinex® FF series commands loads on/off switching, controls the dimming of lighting devices, controls motor drives for shutters or executes any other programmable command and control function. Thanks to the integrated temperature sensor, the pushbutton can send the room temperature value on the bus to other KNX devices. The LEDs can be chosen in the colour combinations blue / green or white / red. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- 6-fold (possibility to configure up to 12 independent functions)
- 4 freely programmable LEDs for each channel
- 2 colour combination available for the LEDs (blue/green or red/white)
- Integrated temperature sensor
- Plastic casing
- Wall-mounting installation on round, square or rectangular wall box
- Connection to bus line with KNX terminal block
- Rear programming pushbutton and LED
- IP20 protection degree (installed)
- Weight 75 g (with mounting support)

Technical data

- 30 Vdc power supply through KNX bus
- Current consumption from bus < 15 mA

Delivery

Delivery includes a terminal block for connection to the bus, a metal support for installation onto round or square mounting box (fixing holes 60 mm apart) or rectangular mounting box (fixing holes 83,5 mm apart) and two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- square rockers
- rectangular frame Form or Flank version

Dimensions [mm]

Order information

Code	LED colours	Mounting
EK-EH2-TP	blue / green	with rectangular frame Form or Flank version
EK-EH2-TP-RW	red / white

OMNIA universal pushbutton FF series (NO VOLTAGE)

WALL-MOUNT DEVICES

Description

Ekinex® FF OMNIA series devices are low-voltage 5-24 Vdc Dry contact (model EK-ED2-NC-...) or Open Drain (model EK-ED2-NB-...) pushbuttons for the on/off control of consumers, luminaires, the control of motorised drives or scenes and other control functions, e.g. for the actuation of relays on the rear or in junction boxes. The devices are equipped with 8 outputs and 8 inputs for driving the integrated LEDs. The low-voltage outputs allow wide compatibility with many control systems. The devices are designed for flush-mounting on the wall, suitable for residential applications. They are powered at SELV 5-24 Vdc and integrate perfectly with the aesthetic parts of the Ekinex® FF series.

Main features

- Control of luminaires
- Control of motorised shutter drives (such as roller shutters, awnings, blinds or blinds)
- Different functions programmable by short press / long press of a button
- Piloting of third-party logics and interfaces
- Relay drive (EK-ED2-NB only)
- LED for status indication

Technical data

- LED Power supply: 5-24 Vdc - Output voltage: 5-24 Vdc Dry contact
- Control and signalling elements: physical buttons, white LEDs
- Current consumption per output < 50mA (200mA for EK-ED2-NB)
- LED driving current: settable via dip-switch
- Physical connection via pre-assembled flat cables or rear board
- with adapter (to be screwed onto the rear of the pushbutton panel) and spring contacts
- Permitted wiring diagrams
 - a) connection of an I/O module with digital inputs and Open Drain outputs
 - b) connection of a series of output pulse relays for driving
 - of lamps without electronics (protection diode not supplied)
 - c) Direct connection of inputs and outputs with Crestron C2N-UNI8IO interface
- Operating temperature: - 5 ... + 45°C
- Storage temperature: - 25 ... + 55°C - Transport temperature: - 25 ... + 70°C
- Relative humidity: 95% non-condensing

Order information

Code	Version	LED colours	Mounting	Side profile
EK-ED2-NC	Dry Contact	white	with square frame Form or Flank version	black
EK-ED2-NB	Open Drain			
EK-ED2-NC-NF	Dry Contact		without frame (‘NF version’)	white
EK-ED2-NB-NF	Open Drain			
EK-ED2-NC-NFW	Dry Contact			
EK-ED2-NB-NFW	Open Drain			
EK-ACC-SCM	universal interface with terminal block			
EK-ACC-CAA	universal pre-wired connector			
EK-ACC-CAC	pre-wired connector for Crestron product compatibility (C2N-UNI8IO)			

- Technopolymer housing - Design for flush wall mounting
- Degree of protection IP20 (device installed)
- Climatic classification 3K5 and mechanical classification 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Dimensions (LxHxW) 82 x 79 x 19 mm - Weight 65 g (with mounting bracket)

Delivery

The scope of supply includes the device, a square metal bracket, plastic screws and fixing screws (1 pair M2.9x25 mm and 1 pair M2.9x38 mm countersunk flat head screws).

Accessories

The following accessories are available for completion and must be ordered separately:

- **EK-ACC-SCM:** universal interface with terminal block
- **EK-ACC-CAA:** universal pre-wired connector
- **EK-ACC-CAC:** pre-wired connector for Crestron product compatibility (C2N-UNI8IO)
- square or rectangular rockers - square frame Form or Flank version

Dimensions [mm]

Configuration and commissioning

- Standard con adattatore universale e morsetti (cod. EK-ACC-SCM)
- Standard con cavo flat
- Dedicato con interfaccia Crestron C2N-UNI8IO

Room thermostats

WALL-MOUNT DEVICES

Aesthetics and functionality conjugated according to the Ekinex® style.
The room temperature controls of the FF series contain the characteristics of a product with a strong technological footprint combined with a focus on aesthetic component. Available in different models, integrated LEDs and two custom keys, the Ekinex® room controllers are with their high performance able to meet the most different needs.

Room thermostats FF series

WALL-MOUNT DEVICES

Form, Flank, 'NF.
Three different variations for
a room temperature control
device with unique performance.

The Ekinex® thermostats of FF series range and related accessories offer the possibility to realize several variations that will satisfy the most diverse needs. The base is represented by the thermostats EK-ER2-TP, EK-EP2-TP and EK-EQ2-TP (with relative humidity sensor); each one integrates a KNX communication module. The device is suitable for mounting into a flush mounting box, either round or square , provided with fixing holes 60 mm apart. Each thermostat is delivered with its relative metal support which, in case of necessity, can also be ordered separately. A terminal block completes the delivery.

The pushbuttons must be finished off with an operation surface (rockers) and a frame. The rockers are available in square shape, plastic material, aluminium or Fenix NTM® in several colour and finishing variations. A special set includes two customized rockers with symbols for the thermostat functions. Each thermostat has integrated LEDs which can be programmed freely: as an example, as a status feedback or as an orientation light at night time. Two colour combinations are available for the LEDs: blue / green or red / white. The square frames are available in two stylish alternatives, Form and Flank , and share the same choice of materials, colours and finishings as for rockers. The 'NF' version of the thermostat is mounted without frame and is provided with a side profile in white or black colour.

The thermostats simply get connected to the unique signal bus cable and do not require auxiliary power supply; the devices are powered at SELV (Safety Extra Low Voltage) voltage, thus offering a much higher safety level than traditional commands. The configuration and commissioning is carried out by means of the ETS® software. The related application programs can be downloaded from the www.ekinex.com website.

Room thermostats FF series	
Description	Code
a) Room thermostat FF series	EK-ER2-TP-... or EK-EP2-TP-... or EK-EQ2-TP-...
b) Set 2 rockers for thermostat FF series	EK-TQQ-...-EP2
c) Round flush-mounting box	not delivered by Ekinex®
d) Square flush-mounting box	not delivered by Ekinex®
e) Metal mounting support	EK-SMQ-1
f) Square frame of Flank version	EK-FLQ-...
g) Square frame of Form version	EK-FOQ-...

Easy room thermostat FF series

WALL-MOUNT DEVICES

Description

The Ekinex® Easy room thermostat FF-series is a digital electronic thermostat with a user-friendly interface for the end user and system integrator. While using a single differentiated set point for heating and cooling with only one on/off operating mode, the unit allows the control of terminals with one or two stages (such as radiators, floor and ceiling radiant panels, etc.) and fan-coil units with 2 or 4 pipe hydraulic supply. The product is equipped with an LCD display with adjustable back-lighting, a sensor for room temperature measurement and two freely configurable inputs. The indicator LEDs can be chosen in blue/green or white/red colour combinations. The device has an integrated KNX bus communication module and is designed for installation in a flush-mounted wall box; it is powered by the KNX bus and requires no auxiliary power supply.

- Main features**
- LCD display with adjustable backlighting
 - 2 keys for controlling the thermostat functions
 - 4 freely programmable LEDs for each button
 - 2 colour combinations available for LEDs (blue/green or white/red)
 - Integrated temperature sensor
 - 2 freely programmable inputs
 - Technopolymer housing
 - Bus line connection via KNX terminal
 - Programming button and LED on front panel
 - Recessed wall mounting on round or square box
 - IP20 degree of protection (installed)
 - Weight 85 g (with mounting bracket)

- Technical data**
- 30 Vdc power supply through KNX bus
 - Current consumption from bus < 13 mA
- Delivery**
- Delivery includes a terminal block for connection to the bus, a metal support for installation onto round or square mounting box (fixing holes 60 mm apart) and two pairs of fixing screws.
- Accessories**
- The following accessories are available to be ordered separately:
- set of two square rockers with symbols for room thermostat
 - square frame Form or Flank version

Order information			
Code	LED colours	Mounting	Side profile
EK-ER2-TP	blue / green	with square frame Form or Flank version	-
EK-ER2-TP-RW	red / white		
EK-ER2-TP-BG-NF	blue / green	without frame (‘NF version’)	black
EK-ER2-TP-RW-NF	red / white		white
EK-ER2-TP-BG-NFW	blue / green		
EK-ER2-TP-RW-NFW	red / white

Pushbuttons 71 series

WALL-MOUNT DEVICES

71 series: infinite number of combinations for a unique style. The series of 71 buttons are available in square or rectangular version with single, double or triple window (Deep version only).

The Ekinex® pushbuttons of 71 series range and related accessories offer the possibility to realize several variations that will satisfy the most diverse needs. The base is represented by the device which is fitted with a KNX communication module. The pushbutton is suitable for mounting into a flush mounting box, either round or square, provided with fixing holes 60 mm apart and for mounting into a rectangular wall mounting box 3 seater according to the Italian installation standard provided with fixing holes 83,5 mm apart. Each pushbutton is delivered with a terminal block and two pairs of fixing screws.

The pushbuttons must be finished off with its relative metal support, a plastic adapter, an operation surface (rockers), a plate with 60 x 60 mm window and a frame. The rockers are available in square and rectangular shapes of different modularities, in plastic material, aluminium or Fenix NTM® and in several colours. Version EK-E13-TP-.. has integrated LEDs which can be programmed freely: as an example, as a status feedback or as an orientation light at night time. Two colour combinations are available for the LEDs: blue / green or red / white. The same version also offers a room thermostat function, thanks to the integrated temperature sensor. The frames, square and rectangular, are available in two stylish alternatives (Form and Flank) and are available in plastic material or aluminium and in several colours and finishings. The 'NF' version of the pushbutton is mounted without frame and is provided with a side profile in white or black colour.

The pushbuttons simply get connected to the unique signal bus cable and do not require auxiliary power supply; the devices are supplied at SELV (Safety Extra Low Voltage) voltage, thus offering a much higher safety level than traditional commands. The configuration and commissioning is carried out by means of the ETS® software. The related application programs can be downloaded from the www.ekinex.com website.

4-fold basic pushbutton 71 series

WALL-MOUNT DEVICES

Description

The 4-fold pushbutton of Ekinex® 71 series commands loads on/off switching, controls the dimming of lighting devices, controls motor drives for shutters or executes any other programmable command and control function. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- 4-fold (possibility to configure up to 8 independent functions)
- Plastic casing
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)
- Weight 70 g (with mounting support)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 15 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- set of 1 square rocker, 2 vertical rectangular rockers, 4 square rockers or 4 horizontal rectangular rockers
- square and double frame Form or Flank version
- square, double and triple plate with 60 x 60 mm window
- a plastic adapter
- metal support for installation onto round or square mounting box (fixing holes 60 mm apart)

Dimensions [mm]

Mounting with frame: 81 x 77 (L x H)
Mounting without frame (NF): 80 x 80 (L x H)

Order information

4-fold basic pushbutton and room thermostat for rectangular wall-box 71 series

WALL-MOUNT DEVICES

Description

The 4-fold pushbutton of Ekinex® 71 series commands loads on/off switching, controls the dimming of lighting devices, controls motor drives for shutters or executes any other programmable command and control function. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- 4-fold (possibility to configure up to 8 independent functions)
- Plastic casing
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- Wall-mounting installation on round,square or rectangular wall box
- IP20 protection degree (installed)
- Weight 100 g (with mounting support)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 15 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- set of 1 square rocker, 2 vertical rectangular rockers, 4 square rockers or 4 horizontal rectangular rockers
- rectangular frame Form or Flank version
- rectangular plate with 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square (fixing holes 60 mm apart) or rectangular (fixing holes 83,5 mm apart) mounting box

Dimensions [mm]

Room thermostat for rectangular wall-box 71 series

WALL-MOUNT DEVICES

Description

The Ekinex® room temperature controller of 71 series regulates independently the temperature of a room or a zone. In combination with one or more KNX actuators, the room temperature controller is able to control the heating and cooling emission of a series of terminal units for the thermal exchange (such as radiators, fan-coils, floor and ceiling radiant panels, etc.). The device is provided with a LCD-Display with adjustable backlight, and a sensor for temperature measuring. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is powered by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- LCD-Display with adjustable backlight
- 4 capacitive pushbuttons for controlling of thermostat functions
- Integrated temperature sensor
- Plastic casing
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- Wall-mounting installation on round, square or rectangular wall box
- IP20 protection degree (installed)
- Weight 120 g (with mounting support)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 13 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- rectangular frame Form or Flank version
- rectangular plate with 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square (fixing holes 60 mm apart) or rectangular (fixing holes 83,5 mm apart) mounting box

Dimensions [mm]

Multisensor quality
air with regulator

WALL-MOUNT DEVICES

Description

The Ekinex® multisensor 71 series detects values of temperature, relative humidity and CO₂ equivalent concentration in an air mass. The device can act as a temperature regulator of a room or zone; it can also perform the regulation by thresholds of relative humidity and CO₂ concentration. The frontal LEDs indicate if the device is in heating, cooling, dehumidification or CO₂ threshold mode. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- Integrated temperature and relative humidity sensors
- Integrated VOCs (Volatile Organic Compounds) sensor with output signal for CO₂ equivalent
- Room thermostat function
- Threshold regulator function for relative humidity and CO₂
- LEDs for heating, cooling, dehumidification or CO₂ threshold mode indication
- Plastic casing
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)
- Weight 90 g (with mounting support)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 13 mA

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- 1 full front cover with 60 x 60 mm modularity
- square and double frame Form or Flank version
- square, double and triple plate with 60 x 60 mm window
- a plastic adapter
- a metal support for installation onto round or square mounting box (fixing holes 60 mm apart)

Dimensions [mm]

Mounting with frame: 81 x 77 (L x H)
Mounting without frame (NF): 80 x 80 (L x H)

Multisensor with humidity,
TVOC and CO₂ eq. regulator

WALL-MOUNT DEVICES

Description

The Ekinex[®] multisensor with controller is a KNX S-mode device for independent temperature control of a room or building area. The module includes 3 sensors: temperature, humidity percentage and air quality, expressed in terms of TVOC (Total Volatile Organic Compounds) or CO₂ equivalent. It can also function as a controller for these three quantities, valid for a single zone to be controlled. The front LEDs indicate the heating, cooling, dehumidification, humidification and TVOC or CO₂ threshold status. The pushbutton and the programming LED are located on the front in the area below the button. The device integrates a KNX bus communication module and is intended for mounting onto a wall mounting box; it is supplied by a SELV voltage directly from the KNX bus and does not require any auxiliary power supply.

Main features

- Integrated temperature and relative humidity sensors
- VOC (Volatile Organic Compounds) sensor with output signal for CO₂ equivalent and TVOC
- Room thermostat function
- Threshold regulator function for relative humidity, TVOC and CO₂
- Available an alarm signal on the CO₂ level also useful to obtain 1 LEED certification point
- Compatibility with Belimo actuators for the control of dampers in VAV boxes and 6-way valves
- Plastic casing
- Connection to bus line with KNX terminal block
- Frontal programming pushbutton and LED
- Wall-mounting installation on round or square wall box
- IP20 protection degree (installed)
- Weight 90 g (with mounting support)

Technical data

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 13 mA
- Max. bus power < 390 mW

Delivery

Delivery includes a terminal block for connection to the bus, two pairs of fixing screws.

Accessories

The following accessories are available to be ordered separately:

- 1 full front cover with 60 x 60 mm modularity
- square and double frame Form or Flank version
- square, double and triple plate with 60 x 60 mm window

Touch&Control

WALL-MOUNT DEVICES

Designed to integrate into any building. Touch&Control is the new KNX capacitive touch-screen with compact dimensions but great performance. The 4" colour IPS display is a perfect combination of design and technology.

Touch&Control

WALL-MOUNT DEVICES

Touch & Control is a touch display device designed for independent temperature control and control of KNX devices in a building.

The Ekinex® EK-EI2-TP-4 device is a KNX S-mode appliance designed for the independent regulation of the temperature of a room or an area of a building. It also allows to view the status and control a variety of KNX devices by touching the icons on the touch display interface to perform some pre-set functions: room thermostat, ON/OFF control of utilities, scenes activation, control of motorized drives for blinds (such as roller shutters, curtains, venetian blinds or roller shutters), control and dimming of lighting devices, logics and other functions via bus.

The device is primarily designed for use in the control system of houses and buildings. Wall installation is envisaged, with assembly in conventional junction boxes as per the Ekinex® planner (which can be reached at <https://planner.ekinex.com/>). The product is suitable not only for European standards, but also for Chinese and American ones. It is powered by the KNX bus and requires a 24-30 Vdc auxiliary power supply. Physical addressing and parameter configuration can be carried out using the ETS KNX software (starting from version 5.7) with the .knxprod file.

Touch&Control	
Description	Code
a) Touch&Control 4"	EK-EI2-TP-4
b) Mounting support (included in delivery)	
c) Round flush-mounting box	not delivered by Ekinex®
d) Square flush-mounting box	not delivered by Ekinex®

Description

Designed to integrate into any building, the KNX Touch&Control 4” display is a perfect combination of design and technology. The display provides users with a wide range of KNX functions allowing control of one or more rooms. The device is equipped with an LED that can be used for night orientation or to inform users of any alarms, which in combination with the integrated proximity sensor allows the screen to be switched on or off automatically. A dedicated widget is available for each type of automation: lights, dimmers, RGB, RGBW, blinds, audio solutions, air conditioning, air quality and 4 temperature control zones are just some of the functions integrated in this display.

Main features

- Control and dimming functions for luminaires, motorised shutter control
- Room thermostat function for 4 independent zones
- Control of room temperature, air conditioning, underfloor heating and ventilation system
- Control of audio functions
- RGB, RGBW, RGBCW brightness control and colour temperature setting
- Air quality display, with PM2.5, AQI, CO2, VOC etc.
- Display of energy measurement parameters: current, voltage, power, energy.
- 8 time functions, 8 scene group functions
- 8 logic functions, with AND, OR, XOR, logic port forwarding, threshold comparator, format conversion
- Delay and staircase light function
- Integrated proximity sensor, screen brightness setting, indication with coloured LED strip
- Haptic feedback with vibration
- Date and time display, temperature and humidity display, day/night status output
- Password protection, screen saver and panel lock
- Alarm function

With Ekinex, hotels can centralise control of lighting, air conditioning, audio and access management, ensuring that every space operates at peak performance, efficiency and comfort.

The hospitality industry is rapidly evolving, with growing demand for modern, smart guest experiences, operational efficiency and sustainable energy management. Whether you are a large international hotel chain, a luxury resort, a boutique hotel or a small B&B, Ekinex offers a complete and seamlessly integrated automation solution that can grow with your business.

With a centralised platform for managing access control, lighting, climate, curtains, audio and energy management, our solution ensures uninterrupted operation and an enhanced guest experience.

Different spaces within a facility require different levels of control. The Ekinex solution for hospitality, based on KNX and Delégo Suite, seamlessly integrates all areas of a hotel into a single platform.

This unified system simplifies property management, enhances the guest experience and optimises energy efficiency in all spaces, from guest rooms to public areas and staff facilities. With Ekinex, hotels can centralise control of lighting, climate, shading, audio and access management, ensuring that every space operates at peak performance, energy efficiency and comfort.

Accédo Key

HOSPITALITY SOLUTION

Description

EK-ACC-KEY-IP is a slim access control terminal that combines a door controller and a card reader in a single device, offering significant cost savings for building managers. It offers flexible access technologies, including PIN code, QR scanning and RFID cards, all in one device.

Ekinex Accédo Key has a built-in controller and a single LAN cable is all you need for connection and power (PoE). In its simplest configuration, it can operate in stand-alone mode, but it can also be integrated into a complete solution with Delego Server as the manager of the entire access control system.

Technical data

- Power supply: PoE and/or 12 Vdc 1 A connector
- PoE: 802.3af (Class 0–12.95 W)

Interfaces

- Ethernet port (LAN): RJ45, adaptive 10/100Mbps
- Recommended cable: Cat-5e or higher
- Output power: 12V@ 600mA
- Relay output: 1 relay / Inputs: 2 inputs
- Wiegand: supported supportato

Main features

- RS485 port: for safety relay EK-SR1-VI
- Tamper alarm: supported/
- Audio: 8Ω / 0.5W
- Supported protocols: IPv4, HTTP, HTTPS, FTP, DNS, NTP, TCP, UDP, ICMP, DHCP, ARP
- Aluminium alloy chassis with tempered glass / IP65 and IK09 ratings
- Capacity of 20,000 cards and 100,000 event logs
- Multiple access methods: QR code, Bluetooth, PIN, RFID
- Flush and surface mounting.
- Front panel: tempered glass / Frame: black aluminium
- Operating temperature: -20 °C to +55 °C
- Storage temperature: -30 °C to +70 °C
- Operating relative humidity: 10% ~ 90% (non-condensing)
- Dimensions Accédo Key (W x H x D): 50 x 140 x 26.7 mm

Order information		
Code	Mounting	Package
EK-ACC-KEY-IP	Flush and surface mounting	1 pcs.

- Dimensions flush-mounted box (W x H x D): 50 x 140 x 14 mm
- Supported frequencies for RFID card reader: 125 kHz and 13.56 MHz
- Keypad with capacitive touch technology
- Displays: backlit numbers, acoustic response to each touch of the keypad
- QR code reader with stand-alone operation only when connected to the cloud with the Dico app: local (and remote) operation in combination with Delègo server
- Flush mount installation (with optional flush mount box code EK-ACC-KEY-IW) or wall mounting

Delivery

- Access control terminal (Accédo key)
- Wiring cover / Installation screws
- Rubber plugs for cable fixing
- Ethernet cable and connector / 8-pin flat cable
- Diode

Dimensions [mm]

Configuration and commissioning

Accédo module for managing room access control, booking administration, and a quick and easy interface for registering guests and creating RFID keys.

Documentation

For more information see the technical documentation, download from www.ekinex.com

Description

The EK-TO2-TP card reader allows cards to be read simply by bringing them close to the device, up to a maximum distance of 20 mm, enabling access based on the configured authorisations. Equipped with a backlit display and an integrated KNX bus communication module, the device combines reliable performance with a refined design. It is powered by SELV voltage via KNX bus and requires an auxiliary power supply of 12–24 Vac or 12–32 Vdc. Available in white or black, it is compatible with the Form, Flank, 'NF, Deep and Surface versions with a 60 mm window, for perfect aesthetic integration into any environment.

Technical data

- 30 Vdc power supply via KNX bus
- Auxiliary power supply 12-24 Vac or 12/32 Vdc
- Card reader with MIFARE 13.56 MHz RFID technology

Main features

- Backlit display with DND symbols (Do Not Disturb, Red LED),
- MUR (Make Up Room, GREEN LED), RFID (not backlit), RGB LED for general functions, doorbell button with White LED
- Presence detection via bus and communication to supervisory system via KNX TP (twisted pair) bus
- KNX Secure protocol
- Accommodation guest management based on reservation and period check-in/check-out period; service user management based on time slot and pass-partout
- Programmable output based on card validation or as actuator activated by KNX telegrams. Delay on card withdrawal configurable for courtesy light management
- Two digital inputs available for connection of conventional push button (with switching, dimming or roller shutter/awning function) or contact signalling contact (e.g. window opening)

Order information

KNX SECURE card reader

HOSPITALITY SOLUTION

- Symbols DND (Do Not Disturb, Red LED), MUR (Make Up Room, GREEN LED), RFID (not backlit), RGB LED for general functions, doorbell button with White LED
- Technopolymer housing
- Connection to bus line via KNX terminal
- Recessed wall mounting on round box
- Degree of protection IP20 (installed)
- Weight approx. 50 g (with mounting bracket)

Delivery

The scope of delivery includes a terminal for connection to the bus line, a plastic bracket for mounting on a round or square box (hole spacing 60 mm) and two pairs of screws.

Accessories

- smart-card EK-TCW-10 (pack of 10 cards) or EK-TCC-10-... (customised with customer logo, on request)
- square frame Form or Flank version
- square plate with 60 x 60 mm window
- plastic adapter

Dimensions [mm]

Configuration and commissioning

Accédo module for managing room access control, booking administration, and a quick and easy interface for registering guests and creating RFID keys.

Documentation

KNX SECURE card holder

HOSPITALITY SOLUTION

Description

The EK-TI2-TP card holder is designed to enable access after inserting a transponder card into a slot at the top of the device. It is powered by SELV voltage via KNX bus and requires an auxiliary power supply of 12–24 Vac or 12–32 Vdc. Available in white or black, it is compatible with the Form, Flank, 'NF, Deep and Surface versions with a 60 mm window, for perfect aesthetic integration in any environment.

Main features

- Signalling LED
 - DND signalling with red LED and screen printing
 - MUR signalling with green LED and screen printing
 - Freely programmable generic signalling with RGB LED
- RFID card reader
- Loaded contacts
- Aux OUT contact
- Input for external DND button
- Input for external MUR button
- KNX Secure protocol
- Plastic housing
- Connection to bus line via KNX terminal
- Flush-mounted installation in round/square box
- IP20 protection rating (installed)
- Climate classification 3K5 (indoor use, dry) and mechanical classification 3M2 (according to EN50491-2)
- Dimensions: 80 x 80 x 41 mm
- Weight approx. 50 g (with mounting bracket)

Technical data

- 13.56 MHz RFID card reader
- 2 relay outputs (5A)
- 2 inputs for potential-free contacts
- 21-30 Vdc power supply via KNX bus
- 12-30 Vdc SELV auxiliary power supply and 20mA@30Vdc current consumption
- 1 red LED, 1 green LED, 1 RGB LED
- KNX Data Secure protocol support

Delivery

The scope of delivery includes a terminal for connection to the bus line, a plastic bracket for mounting on a round or square box (hole spacing 60 mm) and two pairs of screws.

Accessories

- smart-card EK-TCW-10 (pack of 10 cards) or EK-TCC-10-.. (customised with customer logo, on request)
- square frame Form or Flank version
- square plate with 60 x 60 mm window
- plastic adapter

Dimensions [mm]

Configurazione e messa in servizio

Modulo Accédo per la gestione del controllo degli accessi alle camere, amministrazione delle prenotazioni, interfaccia facile e veloce per registrare gli ospiti e creare chiavi RFID.

Room licence for Delégo Server

HOSPITALITY SOLUTION

Requirements

- Delégo Server EK-DEL-SRV01 or Delégo Server Mini EK-DEL-SRV01 can be ordered separately

Documentation

For more information see the technical documentation, download from www.ekinex.com

Smart-card

SOLUZIONI PER L'HOSPITALITY

Main features

- Technopolymer material, standard dimensions 85 x 54 x 1 mm (W x H x D)
- Maximum non-contact recognition distance: 3-5 cm

SENSORS

WALL-MOUNT DEVICES

KNX Secure multi-function movement sensor	157
KNX Secure multifunctional presence sensor	158
Motion sensor for outdoor mounting	159

Sensors

WALL-MOUNT DEVICES

Motion sensors complete with frames Form, Flank or in the 'NF, Deep and Surface versions for aesthetics coordinated to the Ekinex® pushbuttons.

Ekinex presence and motion sensors are advanced devices designed to automate the control of bus functions, such as lighting and air conditioning in rooms.

KNX Secure multifunction PIR presence sensor

This sensor uses passive infrared (PIR) technology to detect normal and small movements and is equipped with an adjustable lens for optimal coverage. It incorporates sensors for measuring ambient brightness, temperature and air humidity, allowing integrated and precise control of systems. It offers up to four output channels and supports both automatic and semi-automatic modes. It is also compatible with the KNX Data Secure security protocol, ensuring secure communication within the home automation system.

KNX Secure multifunction real presence sensor

This sensor uses 24 GHz microwave technology to detect the actual presence of individuals in rooms, proving highly sensitive even to micro-movements. It is particularly suitable for environments such as hotel rooms, offices and other spaces where people tend to remain sedentary. Similar to the PIR model, it integrates brightness, temperature and humidity sensors, offering up to four output channels and supporting both automatic and semi-automatic modes. This device also complies with the KNX Data Secure protocol, ensuring secure communication within the system.

Both sensors are designed for ceiling or false ceiling mounting and can be installed in master/slave mode to extend the detection area. Accessories such as wall mounting brackets are also available for greater installation flexibility.

KNX Secure multi-function movement sensor

WALL-MOUNT DEVICES

Description

The Ekinex KNX Secure multifunctional movement sensor can detect not only the movement of individuals but also brightness, air humidity and room temperature. Up to 4 channels are available for lighting (with constant brightness control) and temperature control functions. Despite its compact size, the sensor has a wide detection range and the functions within it make it suitable for any use, from residential to commercial.

Main features

- Detection of normal and small movements with PIR technology and directional lens
- Up to 4 output channels and up to 3 brightness levels for both the start and end situation
- Automatic and semi-automatic modes
- Built-in brightness sensor
- Built-in room temperature sensor
- Built-in air humidity sensor
- Constant brightness control
- Thermoregulation functions
- Advanced logic functions
- Master/slave working mode
- Configurable orientation light
- Support of the KNX data Secure protocol

Technical data

- 360° movement detection range up to 15.5m (at 6m height)
- Installation height approx. 2.5 - 6m
- Power supply 21-30 Vdc via KNX bus and current consumption 5.5mA@30Vdc
- Illumination measurement range 0-2000 lux
- Body diameter Ø 48.5 mm
- Outer diameter Ø 70 mm
- Mounting hole diameter Ø 53-55 mm
- Recess depth 37 mm

Accessories

The following accessories are available for completion and must be ordered separately:

- Wall mounting bracket EK-AMP-1

EK-AMP-1

EK-AMP-1-B

Dimensions [mm]

Configuration and commissioning

KNX Secure multifunctional presence sensor

WALL-MOUNT DEVICES

Description

With the KNX Secure multifunctional presence sensor with microwave technology it is possible to detect the actual presence of individuals in rooms. Due to its very high sensitivity to micro movements, its ideal use is in hotel rooms, offices and any place of sedentary presence.

Despite the multiple functionalities inside, the presence sensor comes in an ultra-compact design that is almost invisible in environments.

- Main features**
- Detection of normal and small movements with 24GHz microwave technology
 - Up to 4 output channels and up to 3 brightness levels for both the start and end situation
 - Automatic and semi-automatic modes
 - Built-in brightness sensor
 - Built-in room temperature sensor
 - Built-in air humidity sensor
 - Constant brightness control
 - Thermoregulation functions
 - Advanced logic functions
 - Master/slave working mode
 - Configurable orientation light
 - Support of the KNX data Secure protocol

- Technical data**
- 360° static presence detection range up to 8.5m diameter (at 4m height)
 - Installation height approx. 2.5-4 m
 - Power supply 21-30 Vdc via KNX bus and current consumption 4mA@30Vdc
 - SELV auxiliary power supply 12-30 Vdc and current consumption 20mA@30Vdc
 - Illumination measurement range 0-2000 lux
 - Body diameter Ø 48.5 mm
 - Outer diameter Ø 65 mm
 - Mounting hole diameter Ø 53-55 mm
 - Recess depth 38 mm

ERA/Proxima series power sockets

WALL-MOUNT DEVICES

Proxima's wiring devices components represent technological evolution in high-end electrical installations. Designed to combine maximum functionality and aesthetic integration, Proxima stands out for its clean, geometric design and high-quality construction. The plates, made from selected materials, are designed to blend harmoniously into high-profile residential, office and hospitality environments.

The modularity of the system allows flexible installation on standard flush-mounted boxes (Italian, German, French, Israeli), ensuring compatibility and quick installation. The mechanisms are designed to offer reliable performance over time, with precise feedback on actuation and aesthetics coordinated with Ekinex home automation systems.

Available in different configurations, the Proxima series is designed to meet contemporary design requirements, with a particular focus on integration with KNX smart home systems, offering perfect aesthetic continuity between traditional devices and intelligent technologies.

Every component in the Proxima series speaks a modern, intuitive language that can communicate with the most advanced home automation systems. Available in a range of colours and materials, from ultra-matt to metallic textures, Proxima fits like a tailor-made suit to the spirit of your home or your design vision.

Description
The UNEL two-pin Schuko socket is a Type F+L (2P+T) socket designed to combine versatility and safety. Thanks to its compatibility with Schuko and Bipass UNEL plugs, it offers high flexibility of use. Manufactured in anthracite grey (RAL 7016), it fits perfectly to modern and refined environments. Installation is carried out in combination with the ERA/Proxima series plates, ensuring a perfect balance between design and functionality.

- Main features**
- Connection of domestic consumers with AC voltage up to 250 V -
 - Blanking plug for contact protection
 - Mounting on round or square wall box
 - Screw terminals for cable cross-sections up to 2.5 mm².

Ekinex has paid particular attention to this detail with a special painting process that allows the socket to be colour matched to the other wall elements in its range. The inclusion of a USB output responds to the increasingly pressing need to connect to numerous devices for home or work use.

Essential: this is the most suitable adjective to describe the power socket. From the first one invented in America by Hubbel in 1904 to the German-made Schuko dated 1926, the socket has come down to us as the silent player in our electrical systems. Ekinex has given them a new lease of life with a colourful edition that matches keyboards and touch panels. The need to connect to the electricity network has increased in recent years; the list of devices that require a power supply is virtually endless. Ekinex power sockets come to your rescue with an extensive range for the Italian and international markets. Ekinex electric sockets are also equipped with USB type A and C ports and can be used to recharge all electronic devices in homes and offices. The many colours are in perfect family feeling with the FF, 71, 20venti and Signum series and can be combined with Fenix NTM®, metal, Metal HT and plastic finishes.

Power socket and USB A-C
Italian version
WALL-MOUNT DEVICES

Description

The Ekinex model EK-PWS-IT-USB and EK-PWS-IT universal Italian standard sockets are 2P+T 16 A universal type devices for wall installation, for 2P 2.5 A europlugs, 2P and 2P + E 10 A and 16 A Italian standard plugs, 2P+T 16 A German standard plugs, for powering household appliances. The EK-PWS-IT-USB model is equipped with a USB power unit, both type-A and type-C, for charging mobile phones and in general all electronic devices that can be recharged via USB sockets of the same type. Charging of two devices at the same time is allowed.

Main features

- Connection of home devices with AC 250 V ~ voltage
- Contacts protected by shutters
- Mounting on a round or square wall box
- Terminals for cables with section up to 2.5 mm²
- USB Type-A and Type-C ports for charging electronic devices such as smartphones, tablets, etc. (only for EK-PWS-IT-USB)

Technical data

- Max. rated input voltage: AC 250 V ~
- Max rated input current: 16 A
- Network frequency: 50/60 Hz
- USB output voltage (only for EK-PWS-IT-USB): DC 5 V
- USB output current (only for EK-PWS-IT-USB): 3.4 A
- Standby power (only for EK-PWS-IT-USB): ≤ 50mW
- Energy efficiency (only for EK-PWS-IT-USB): 83%
- Operating temperature: -10 ... +40 ° C (indoor use)
- Storage / transport temperature: -20 ... +50 ° C
- Protection degree : IP 20
- Safety class 2 (double insulation)
- Connection type: solid or stranded cable with 1.5 ... 2.5 mm² section
- Connection type: screw
- Mounting depth: min. 40 mm
- Technopolymer housing
- Dimensions: 70 x 70 x 44 mm (LxHxP)

Delivery

A pair of screws for installation.

Accessories

The following accessories are available for completion and must be ordered separately:

- square and double frame Form or Flank version
- square, double and triple plate with 55 x 55 mm window
- a plastic adapter

Dimensions [mm]

Power socket and USB A-C
Schuko version
WALL-MOUNT DEVICES

Description

The Ekinex model EK-PWS-DE-USB and EK-PWS-DE Schuko® sockets (German standard) are 2P + T 16 A type wall installation devices, for powering household appliances. The EK-PWS-DE-USB model is equipped with a USB power unit, both type-A and type-C, for charging mobile phones and in general all electronic devices that can be recharged via USB sockets of the same type. Charging of two devices at the same time is allowed.

Main features

- Connection of home devices with AC 250 V ~ voltage
- Contacts protected by shutters
- Mounting on a round or square wall box
- Spring terminals (only for EK-PWS-DE-S)
- Terminals for cables with section up to 2.5 mm²
- USB Type-A and Type-C ports for charging electronic devices such as smartphones, tablets, etc. (only for EK-PWS-DE-USB)

Technical data

- Max. rated input voltage: AC 250 V ~
- Max rated input current: 16 A
- Network frequency: 50/60 Hz
- USB output voltage (only for EK-PWS-DE-USB): DC 5 V
- USB output current (only for EK-PWS-DE-USB): 3.4 A

Imagine an object capable of withstanding the elements with elegance, discreetly and stylishly protecting the most delicate elements of your smart home. The new IP65 Waterproof Cover from Ekinex is just that: a flawless fusion of refined aesthetics and advanced functionality.

Thanks to its robust structure and high-quality materials, the waterproof cover guarantees resistance to atmospheric agents without sacrificing the sophisticated design that distinguishes Ekinex products. It offers IP65 protection, making it ideal for outdoor applications and industrial or residential environments with high safety requirements. Perfect for those looking for a reliable, functional and aesthetically flawless solution, the waterproof cover is the perfect combination of protection, innovation and style.

Waterproof cover IP65 power and USB A-C sockets

WALL-MOUNT DEVICES

Description

Thanks to its robust structure and high-quality materials, the waterproof cover guarantees resistance to atmospheric agents without sacrificing the sophisticated design that distinguishes Ekinex products. It offers IP65 protection, making it ideal for outdoor applications and industrial or residential environments with high safety requirements. Perfect for those looking for a reliable, functional and aesthetically flawless solution, the waterproof cover is the perfect combination of protection, innovation and style.

- IP waterproof certifications**
- Standard: IEC 60529
 - Function: Protection against foreign bodies (solids and liquids)
 - Abbreviation ‘IP’ followed by two digits:
First digit: Resistance to solids
Second digit: Resistance to liquids

- Main features**
- Ergonomic design**
- Hinge opening system for practical and safe use, without compromising accessibility to the socket
- Premium materials**
- Robust structure with high-quality finishes for perfect integration into any architectural context.
- Universal compatibility**
- Suitable for Ekinex socket standards, ensuring aesthetic and functional continuity in advanced home automation projects.

- Guaranteed protection**
- Dust resistant (partial, not harmful)
 - Resistant to direct water jets
- Applications**
- Outdoor areas: verandas, courtyards, marine areas
 - Damp areas: saunas, bathrooms, swimming pools
- Specific regulations**
- Mandatory in Israel for electrical outlets in bathrooms

- Accessories**
- The following devices are available separately to complete the system:
- power and USB A-C sockets

Keystone System
WALL-MOUNT DEVICES

Keystone modules compatible with Ekinex wiring devices. Wide range of devices to integrate network systems, multimedia systems and antenna systems. The front covers can be declined in the various colours available, thanks to a special painting process that allows them to be chromatically matched to the other wall devices.

Keystone modules are compatible with Ekinex wiring devices and offer the possibility of numerous customizations, able to meet the most different needs. A wide range of devices is available to integrate network, multimedia and antenna systems. The standard dimensions allow an easy installation. They are completed with a square, double or triple plate with window dimension 55 x 55 mm, able to accommodate one or more modules. Covers are available in plastic material, in numerous color and finish variations. Technopolymer caps are available to cover unused spaces.

Keystone System

WALL-MOUNT DEVICES

Description
Keystone modules compatible with Ekinex wiring devices. Wide range of devices to integrate network systems, multimedia systems and antenna systems.

- Main features**
- Usage: indoor
 - IP Protection: IP20
 - Material: Technopolymer

- Technical data**
- Dimensions (WxDxH): approx. 29.7 x 21.9 x 17.4 mm
 - Operating temperature -10° to +60°.
 - Packaging temperature -40° to +70° C
 - Permissible humidity 10 to 90
 - Certificates: CE & RoHS

Delivery
Two pair of screws for installation.

- Accessories**
The following accessories are available to complete and to be ordered separately:
- Square and double frame Form or Flank version
 - Square, double and triple plate with 55 x 55 mm window
 - a plastic adapter
 - a metal support for installation onto round or square mounting box (fixing holes 60 mm apart)

Rockers for pushbuttons ERA series

WALL-MOUNT DEVICES

Description

Rockers to be used as an operating surface for the ERA series button. The rockers are available in 5 colour and material variants and are passive components.

Main features

- Metal alloy with metal finish
- Snap-on mounting on ERA series pushbuttons

Order information			
Code	Modularity L x H [mm]	For use with	Package
EK-T2V-...	vertical rectangular 39.7 x 81.5	1-channel pushbutton ERA series	1 pcs.
EK-TEV-2-...	vertical rectangular 19.7 x 81.5	2-channel pushbutton ERA series	2 pcs.
EK-TEV-4-...	vertical rectangular 19.7 x 81.5	4-channel pushbutton ERA series	4 pcs.

Order

Base-codes must be completed by adding extensions for material, colour and finishing (3 characters).

Dimensions [mm]

Rockers for pushbuttons Proxima series

WALL-MOUNT DEVICES

Description

Rockers for use as an actuation surface for the Proxima series pushbutton. Rockers are available in numerous colours and materials and are passive components.

Main features

- Metal alloy with metal finish or Metal HT
- Snap-on mounting on Proxima series pushbuttons

Order information			
Code	Modularity Ø [mm]	For use with	Package
EK-TTP-1-...	round 11 mm	1-channel pushbutton Proxima series	1 pcs.
EK-TTP-2-...		2-channel pushbutton Proxima series	2 pcs.
EK-TTP-4-...		4-channel pushbutton Proxima series	4 pcs.

Order

Base-codes must be completed by adding extensions for material, colour and finishing (3 characters).

Dimensions [mm]

Rockers for pushbuttons 20venti series

WALL-MOUNT DEVICES

Description

Rockers for use as operation surface for pushbuttons of 20venti series. Rockers are available in several colour and material variations and are passive components.

Versions

- rectangular with 30 x 15 mm modularity

Main features

- In plastic material
- Snap-on mounting
- Customizable with symbols and text backlit by RGB LED

Order

Base-codes must be completed by adding extensions for material, colour and finishing (3 characters) plus symbols and text (3 characters).

Dimensions [mm]

Order information			
Code	Modularity * L x H [mm]	For use with	Package
EK-T4R-20-...	rectangular 30 x 15 symbol/text backlit RGB	pushbutton 20venti series	4 pcs.
EK-T4R-20-MA09	rectangular 30 x 15 status led backlit RGB		
EK-T2B-20-...	rectangular 30 x 15 for adjustments RGB		1 pcs.
EK-T8R-20-TR	rectangular 30 x 15 transparent		8 pcs.

*) The modularity indicated also takes into account the distance between the rockers and between rockers and light-guides and, therefore, differs slightly from the actual size of the single rockers

Rockers for 4-fold pushbuttons FF series

WALL-MOUNT DEVICES

Description

Rockers for use as operation surface for 4-fold pushbuttons of FF series. They can perform two independent functions by acting on either its upper or lower zones (square and vertical rectangular versions) or on either its left or right zones (horizontal rectangular versions). Rockers are available in several colour and material variations and are passive components.

Versions

- square with 40 x 40 mm modularity
- horizontal rectangular with 80 x 20 mm modularity
- vertical rectangular with 40 x 80 mm modularity

Order information			
Code	Modularity * L x H [mm]	For use with **	Package
EK-TQQ-...	square 40 x 40	4-fold pushbutton FF series	4 pcs.
EK-TRV-...	vertical rectangular 40 x 80		2 pcs.
EK-TRO-...	horizontal rectangular 80 x 20		4 pcs.

*) The modularity indicated also takes into account the distance between the rockers and between rockers and light guides and, therefore, differs slightly from the actual size of the single rockers
**) The actual functioning as pushbutton with 2 or 4 channels depends on the configuration of the device parameters carried out with ETS

Main features

- In plastic material, aluminium, Metal HT or Fenix NTM®
- Snap-on mounting
- Customizable with symbols and text

Delivery

Delivery includes a tool for rockers removal.

Order

Base-codes must be completed by adding extensions for material, colour and finishing (3 characters) plus symbols and text (3 characters).

Dimensions [mm]

Rockers for 6-fold pushbuttons and Touch&See FF series

WALL-MOUNT DEVICES
(PHASE OUT)

Description

Rockers for use as operation surface for 6-fold pushbuttons and Touch&See with 2-fold pushbutton of FF series. They can perform two independent functions by pressing on either its upper or lower zones. Rockers are available in several colour and material variations and are passive components.

Versions

- square with 40 x 40 mm modularity

Main features

- In plastic material, aluminium, Metal HT or Fenix NTM®
- Snap-on mounting
- Customizable with symbols and text

Order information			
Code	Modularity [mm]	For use with	Package

Mounting bracket ERA/Proxima series

WALL-MOUNT DEVICES

Description

The EK-SMP-71-1 moulded support is a key component of the ERA/Proxima series. Designed with solidity and versatility in mind, it is what makes the wide variety of configurations in the series possible. The metal structure allows the magnetic plates to adhere, while the moulded polymer component allows the insertion of the numerous standard components available.

Main features

- Co-moulded metal and polymer support
- Suitable for ERA/Proxima series sockets and pushbuttons
- Suitable for single and double configurations (only Proxima with centre distance 71 mm)
- Suitable for 1 or 2 module wiring devices components

Delivery

- The supply includes 2 screw kits for fixing the support to the box.

Mounting

- Mounting to the flush-mounted box using screws

Order information

Code	For use with	Package
EK-SMP-71-1	for mounting 1 device/plate from the ERA/Proxima series	1 pcs.
EK-SDP-71-1	for mounting 2 devices/plate from the Proxima series	

*Not compatible with surrounded power sockets (45x45 mm module)

Additional support for compatibility with round flush-mount boxes Proxima series

WALL-MOUNT DEVICES

Description

The EK-SMP-Q-1 plastic spacer is required for installing Proxima series components inside special flush-mounted boxes. Check the planner for compatibility with your solution.

Main features

- ABS support
- Suitable for Proxima series installations
- Suitable for single configurations

Mounting

- Interlocking assembly between flush-mounting box and support EK-SMP-71-1.

Order information

Code	For use with	Package
EK-SMP-Q-1	for compatibility with round flush-mounted boxes	1 pcs.
EK-SMP-D-1	for compatibility with round flush-mounted boxes with 2 positions	

Square plate
WALL-MOUNT DEVICES

Description

Square plate for finishing Ekinex® devices of 71 series or market-standard flush-mounted inserts. Available in several colours and materials. To be used in combination with a square frame of the Form or Flank version. The plate can be also mounted without frame in combination with an adapter of the 'NF' version.

Main features

- In plastic material or aluminium or Fenix NTM®
- Snap-on mounting

Description

2-fold flush-mounting box compatible with movable walls (7–40 mm). Allows installation of the Proxima series in dual configuration without the EK-SMP-D-1 spacer.

Main features

- Allows installation of the Proxima series in dual configuration without the need for the EK-SMP-D-1 spacer
- Flush-mounted box for movable walls (7–40 mm)
- Box depth 59 mm
- Usable internal dimensions: 2 slots 55 x 55 mm
- Compatible with all Ekinex products with 71 mm centre-to-centre distance
- Model Simet P2X60D
- Not stackable

Solutions for the Swiss market

WALL-MOUNT DEVICES

The following components are used for the Swiss market:

- Double plate with 60 x 60 mm windows that allows the side-by-side installation of an Ekinex® device from 20venti or 71 series and a power socket (Feller) with 60 x 60 mm modularity or two power sockets (Feller) with 60 x 60 mm modularity with 68 mm spacing.
- Double plate with 60 x 60 mm windows that allows two Ekinex® devices from 20venti or 71 series to be mounted side by side with a distance between centres of 71 mm.
- Square plate with 60 x 60 mm windows allowing the mounting of a power socket (Feller) with 60 x 60 mm modularity. Installation is only possible if the corresponding support (EK-TAQ-1-CH) is used.
- Single and double metal mounting supports for horizontal/vertical installation

The plate can be mounted without frame (NF or Deep) or with double frame Form version.
The double plate with 60 x 60 mm modularity and 68 mm spacing is available in aluminium or Fenix NTM®.
Installation can be done horizontally or vertically using the mounting supports.

Requirements for the flush mount box(es)

- Fixing holes in corner position

WALL-MOUNT DEVICES

A super opaque nanotech material, is an innovative interior design product, that combines elegant aesthetic solutions with state-of-the-art technological performance.

Fenix NTM® is an innovative interior design product, that combines elegant aesthetic solutions with state-of-the-art technological performance. The external surface involves the use of nanotechnology and it is characterized by next generation acrylic resins, hardened and fixed with Electron Beam Curing process opening up new avenues in the field of interior design. With low light reflectivity, its surface is extremely opaque, anti-fingerprint and features a very pleasant soft touch.

More information:
ekinex.com/en/material-and-finishes/fenix-ntm.html

				
Low light reflectivity	Thermal healing of micro scratches	Anti-fingerprint	Soft touch	Resistance to scratches and abrasion
				
Resistance to dry heat	High resistance to acid solvents and household reagents	Enhanced anti-bacterial properties	Hygienic	Suitable for contact with food
				
Easy to clean	Mold-resistant	Antistatic	Hydro-repellent	Dimensional stability even at high temperature changes
				
Resistance to impact	Light fastness	Excellent intensity and colour depth	Rub resistance	Self-supporting (only for 10 and 12 mm)

Symbols for customising rockers

ERA series

WALL-MOUNT DEVICES

The ERA series device buttons can be customised using the symbols in the library shown on the following pages. On request, customisation using symbols and text specified by the customer is also possible.

Vertical rectangular rockers

The base code extension includes 3 characters for material, colour and finish and 3 characters for symbols: of the latter, the first identifies the double symbol, the second and third the single symbol.

Single symbol

The single symbol is reproduced in the middle of the rectangular key, centred vertically and horizontally. If the second and third characters of the code extension are “0” (zero), this means that the key does not have a single symbol.

Double symbol

The double symbol is reproduced in the upper and lower areas of the rectangular key, centred horizontally. If the first character of the code extension is ‘0’ (zero), it means that the key does not have a double symbol.

Text

Vertical rectangular keys can be customised with text in the upper, middle and lower areas on 1 or 2 lines.

Text inserted in the upper area (1 or 2 lines, max 10 characters each)

Text entered in the lower area (1 or 2 lines, max. 10 characters each)

Text entered in the upper area (1 or 2 lines, max. 23 characters each)

Text entered in the lower area (1 or 2 lines, max. 23 characters each)

The plates for the Proxima series pushbuttons can be customised using the symbols in the library shown on the following pages. On request, customisation using symbols and text specified by the customer is also possible.

Square and double plate

The base code extension includes 3 characters for material, colour and finish and the letter ‘P’ indicating customisation using symbols or text.

Symbol

The symbol is reproduced in the centre below the round button, centred vertically and horizontally.

Text

The text is reproduced in the centre below the round button, centred vertically and horizontally on 1 or 2 lines and can contain a maximum of 12 characters (including spaces) per line.

Symbols for customising plates

Proxima series

WALL-MOUNT DEVICES

Rockers for devices of 20venti, FF and 71 series can be customized with symbols from the library on the following pages. Upon request, it is also possible to customize rockers with symbols and text provided by the customer.

Square rockers

The code extension includes 3 characters identifying material, colour and finishing and 3 more characters identifying symbols. Within the last 3-character group, the first character identifies a double symbol, while the second and third characters identify a single symbol.

Single symbol

The single symbol is reproduced in the central part of the square rocker, centred both horizontally and vertically. If the second and third characters of the extension-code equal “0”, the rocker has no single symbol.

Double symbol

The double symbol is reproduced in the upper and lower part of the square rocker, both centred horizontally. If the first character in the extension-code equals “0”, the rocker has no double symbol.

Vertical rectangular rockers

The code extension includes 3 characters identifying material, colour and finishing and 3 more characters identifying symbols. Within the last 3-character group, the first character identifies a double symbol, while the second and third characters identify a single symbol.

Single symbol

The single symbol is reproduced in the central part of the rectangular rocker, centred both horizontally and vertically. If the second and third characters of the extension-code equal “0”, the rocker has no single symbol.

Double symbol

The double symbol is reproduced in the upper and lower part of the rectangular rocker, both centred horizontally. If the first character in the extension-code equals “0”, the rocker has no double symbol.

Horizontal rectangular rockers

The code extension includes 3 characters identifying material, colour and finishing and 3 more characters identifying symbols. Within the last 3-character group, the first character identifies a double symbol, while the second and third characters identify a single symbol.

Single symbol

The single symbol is reproduced in the central part of the rectangular rocker, centred both horizontally and vertically. If the second and third characters of the extension-code equal “0”, the rocker has no single symbol.

Double symbol

The double symbol is reproduced on the left and right sides of the rectangular rocker, vertically centred. If the first character in the extension-code equals “0”, the rocker has no double symbol.

Customization with text

WALL-MOUNT DEVICES

Square rockers can be customized with text to be shown in the upper, central or lower areas. Texts must be specified at order time.

			
Text added to upper area only (max 12 characters)	Text added to lower area only (max. 12 characters)	Text added to both upper and lower areas (max. 12 chars each)	Text added to central area only (1 or 2 lines, max. 12 chars each)

Horizontal rectangular rockers can be customized by means of text in their central area.

	
Text added to central area only (1 or 2 lines, max. 12 chars each)	Text added to central area only (max. 11 chars each) 20venti series only

Vertical rectangular rockers can be customized with text to be shown in the upper, central or lower areas.

	Text added to upper area (max. 12 chars each)
	Text added to central area (1 or 2 lines, max. 12 chars each)
	Text added to lower area (max. 12 chars each)

How to order a rocker

Rockers for pushbuttons ERA series

WALL-MOUNT DEVICES

Rockers for pushbuttons ERA series.

The ordering code of a rocker is formed by a fixed part (EK-T2V- / EK-TEV-) plus a variable part which represents modularity, material, colour and finishing.

METAL			
Modularity	Colour	Finishing	Code
 rectangular vertical	steel brushed	brushed	EK-T2V-SSB
	quantum carbon		EK-T2V-SBV
	warm brass		EK-T2V-GWB
	bronze corked		EK-T2V-GBD
 rectangular vertical	steel brushed	brushed	EK-TEV-2-SSB
	quantum carbon		EK-TEV-2-SBV
	warm brass		EK-TEV-2-GWB
	bronze corked		EK-TEV-2-GBD
 rectangular vertical	steel brushed	brushed	EK-TEV-4-SSB
	quantum carbon		EK-TEV-4-SBV
	warm brass		EK-TEV-4-GWB
	bronze corked		EK-TEV-4-GBD

Rockers for pushbuttons Proxima series

WALL-MOUNT DEVICES

Rockers for pushbuttons Proxima series.

The ordering code of a rocker is formed by a fixed part (EK-TTP-) plus a variable part which represents modularity, material, colour and finishing.

How to order a front cover

Multisensors

WALL-MOUNT DEVICES

Front cover - Multisensors

The ordering code of a rocker is formed by a fixed part (EK-T) plus a variable part which represents modularity, material, colour, finishing and model.

PLASTIC MATERIAL				
Modularity	Colour	Finishing	Code	
 Front cover Multisensor (60 x 60 mm)	white	normal	EK-T1Q-GAA-ET2	EK-T1Q-GAA-ES2
	pure white RAL 9016		EK-T1Q-GAR-ET2	EK-T1Q-GAR-ES2
	intense black RAL 9005		EK-T1Q-GAE-ET2	EK-T1Q-GAE-ES2
	silver		EK-T1Q-GAG-ET2	EK-T1Q-GAG-ES2

METAL HT				
Modularity	Colour	Finishing	Code	
 Front cover Multisensor (60 x 60 mm)	chrome	chrome plated	EK-T1Q-CRO-ET2	EK-T1Q-CRO-ES2
	black metal		EK-T1Q-CBM-ET2	EK-T1Q-CBM-ES2
	champagne		EK-T1Q-CHA-ET2	EK-T1Q-CHA-ES2

METAL				
Modularity	Colour	Finishing	Code	
 Front cover Multisensor (60 x 60 mm)	aluminium	brushed	EK-T1Q-GBQ-ET2	EK-T1Q-GBQ-ES2
	nickel		EK-T1Q-GBR-ET2	EK-T1Q-GBR-ES2
	titanium		EK-T1Q-GBS-ET2	EK-T1Q-GBS-ES2
	carbon		EK-T1Q-GBU-ET2	EK-T1Q-GBU-ES2
	brass		EK-T1Q-GBB-ET2	EK-T1Q-GBB-ES2

FENIX NTM®				
Modularity	Colour	Finishing	Code

Square plate

WALL-MOUNT DEVICES

Plates for devices of 71 series and flush-mounting inserts.

The ordering code of a plate consists of a fixed part (EK-P) and a variable part depending on shape (square or rectangular), window size (small or large), material, colour and finishing.

How to order a Deep plate

WALL-MOUNT DEVICES

Deep plates for devices of Signum, 20venti and 71 series. The ordering code of a Deep plate consists of a fixed part (EK-D) and a variable part depending on shape (square or rectangular), window size (small or large), material, colour and finishing.

PLASTIC MATERIAL				
Series	Window	Colour	Finishing	Code
20venti (4 rockers)	 30 x 60 mm	white		EK-DQT-GAA
		pure white RAL 9016		EK-DQT-GAR
		intense black RAL 9005		EK-DQT-GAE
		silver		EK-DQT-GAG
20venti FF 71	 45 x 45 mm	white	normal	EK-DQP-GAA
		pure white RAL 9016		EK-DQP-GAR
		intense black RAL 9005		EK-DQP-GAE

How to order a Surface plate

WALL-MOUNT DEVICES

Surface plates for devices of 20venti, 71 series and flush-mounting inserts. The ordering code of a Surface plate consists of a fixed part (EK-S) and a variable part depending on shape (square or rectangular), window size (small or large), material, colour and finishing.

Surface square plate

Description

The Ekinex® EK-AH1-TP power supply produces and monitors the 30 Vdc voltage required to operate the KNX bus system. A coil built into the device provides decoupling between the power supply and the bus line. The output has overvoltage, overcurrent and short-circuit protection. EK-AH1-TP has an additional 30 Vdc output that can be used for auxiliary power supply to other SELV safety extra-low voltage devices. The total current made available by the two outputs (KNX bus line and auxiliary power supply) cannot exceed 640 mA. The device can support short interruptions of the line voltage.

Main features

- Plastic housing
- Connection to bus line via KNX terminal
- Auxiliary power connection via dedicated screw terminals
- Power connection via screw terminals
- IP 20 degree of protection (device installed)
- Climatic classification 3K5 and mechanical classification 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Safety class II
- Mounting on 35 mm profile rail (according to EN 60715)
- Device from 3 modular units (1 UM = 18 mm)
- Weight 195 g

KNX bus power supply 640 mA with 30 Vdc auxiliary output

POWER SUPPLY UNITS

Technical data

- Supply voltage 200-230 Vac, 50/60 Hz
- Power consumption 20 W
- Losses < 3 W
- Voltage on bus line: 30 Vdc +/-5 % SELV
- Voltage on auxiliary output: 30 Vdc
- Rated current: 640 mA
- Buffer time: 200 ms

Delivery

The supply includes a terminal for connection to the bus line.

1280 mA bus power supply

POWER SUPPLY UNITS

Description

The Ekinex® EK-AM1-TP power supply produces and monitors the 30 Vdc voltage required for operation of the KNX bus system. A coil integrated in the device decouples the power supply from the bus line. The output has overload and short-circuit protection. It has an additional 30 Vdc output that can be used for auxiliary supply of other SELV devices. The total current provided by the two outputs (KNX bus line and auxiliary power supply) cannot exceed 1280 mA. The device is capable of supporting short mains voltage interruptions (max. 200 ms).

Main features

- Plastic housing
- Connection to bus line via KNX terminal
- Auxiliary power connection via dedicated screw terminals
- Power supply connection via screw terminals
- Degree of protection IP 20 (device installed)
- Climatic classification 3K5 and mechanical classification 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Safety class I
- Mounting on 35 mm profile rail (according to EN 60715)
- Device with 4 modular units (1 UM = 18 mm)
- Weight 320 g

Technical data

- Supply voltage 230 Vac, 50/60 Hz
- Power consumption 39 W
- Losses < 3 W
- Voltage on bus line: 30 Vdc +1/-2 Vdc SELV
- Voltage on auxiliary output: 30 Vdc
- Nominal current: 1280 mA
- Buffer time: 200 ms

Delivery

Delivery includes one terminal blocks for connection to the bus.

Dimensions [mm]

Order information

Description

The EK-TM1-TP electronic digital time switch is a KNX device for the management over time of the electrical devices. It allows time programming (periodicity: daily, weekly or annual) or astronomical programming. The device can pilot 9 different channels on KNX bus. The relay on the device replicates the channel 1 programming. Each channel can be associated with a different programming (time or astronomical). It is possible to connect via bus the EK-GPS-1 module (to be ordered separately), that captures the time and the position through the satellite system, ensuring a greater accuracy over time. The backup battery keeps the settings even in case of power failure and can be replaced through the cover (sealable).

Main features

- Technopolymer casing
- LCD with backlight (active only with AC power supply)
- Password lockable keyboard
- 450 storable programs (900 events) divisible on 9 channels
- Daily/weekly/monthly/yearly + astronomical programming
- On/off, pulse, holiday, random, night (astronomical) programmes
- Programming resolution 1 minute
- Actions type 1B
- Automatic update of daylight saving time (configurable)
- Connection to bus line with KNX terminal block
- Screw terminal blocks for connecting 230 Vac, output and GPS module
- Lithium backup battery: 3V, CR14250 type (5-years life, replaceable)
- Reinforced insulation between accessible parts (front) and all the other terminals
- Protection degree IP20 (device installed)
- Mounting on 35 mm standard DIN-rail (according to EN 60715)
- 3 modular units (1 UM = 18 mm)

Order information

Code	Package
EK-TM1-TP	1 pcs.
EK-GPS-1	

Time / astronomical digital switch

SYSTEM DEVICES

Technical data

- Power supply: 115 ÷ 230 Vac (-15% ÷ +10%) 50/60 Hz
- Power consumption: 7 VA (2.6 W)

Output

- 1 monostable switching relay 16(10) A at 250 Vac

Delivery

Delivery includes a terminal block for connection to the bus. The optional module EK-GPS-1 has to be ordered separately.

EK-TM1-TP

EK-GPS-1

Description

The device features an extended filter table for groups 0–31 and ensures galvanic isolation between lines. The coupler supports KNX Data Security and KNX Long Frames. It is compatible with ETS® software version 5 and later. With the product database for ETS 6, the device also offers security proxy and segment coupler functionality.The buttons on the front panel allow you to disable telegram filters for testing purposes. The LEDs indicate operational status and communication errors on the bus. The device features an integrated KNX bus communication module and is designed for mounting on a 35 mm profile rail. Power is supplied via the KNX bus (main line). As a secure interface, the device prevents unauthorized access to the system.

Main features

KNX

- Transmission medium: TP/TP
- KNX security (AES-128) (incl. Security Proxy)
- KNX segment coupler function
- Extended filter table for main group 0...31

Controls and indicators

- 2 buttons and 3 LEDs (multicolored)
- KNX programming button with LED (red)

Other features

- Plastic housing (PC)
- Mounting on 35 mm rail (according to EN 60715)
- Protection rating IP20 (device installed, according to EN 60529)
- Equipment class III (according to EN 60664-1)
- Climate class 3K5 and mechanical class 3M2 (according to EN 50491-2)
- 1 modular unit (1 unit = 18 mm)
- Weight 40 g
- Dimensions (WxHxD): 17.8 x 90 x 60 mm

Secure KNX Line Coupler

MODULI DI SISTEMA

Description

The EK-IE1-SEC-TP IP interface realises a bidirectional data connection between a PC or laptop and a KNX bus system via a LAN network. The IP interface supports the tunnelling protocol and allows addressing, parameter setting, visualisation, protocolling and diagnosis of KNX bus devices via ETS. The device has an integrated KNX bus communication module and is designed for mounting on a 35 mm profile rail. The power supply is supplied via the KNX bus. As a secure interface, the device prevents unauthorised access to the system.

Main features

- Plastic housing
- Programming button and LED on the front panel
- LEDs for status and data traffic indication on bus line and Ethernet network
- Buttons for activating special functions
- Connection to bus line via KNX terminal
- Connection to Ethernet network via RJ45 connector
- Mounting on 35 mm profile rail (in accordance with EN 60715)
- Device from 1 modular unit (1 UM = 18 mm)
- IP20 degree of protection (device installed)
- Support of KNX secure technology, can be activated via ETS®.

Technical data

- Power supplied via KNX bus (21-30 Vdc)
- Current consumption 20 mA from KNX bus
- Up to 8 KNXnet/IP connections simultaneously
- Operating temperature: - 5 ... + 45°C
- Relative humidity: 5-93% non-condensing

Delivery

Delivery includes a terminal block for connection to the bus.

IP secure router

SYSTEM DEVICES

Description

The EK-IF1-SEC-TP IP router realises a bi-directional data connection between a PC or laptop and a KNX bus system via a LAN. The IP interface supports the tunnelling protocol and allows addressing, parameter setting, visualisation, protocolling and diagnosis of KNX bus devices via ETS. A line/area coupler function is also integrated in the IP router; telegrams can be exchanged between KNX TP bus lines via the device via a backbone over TCP/IP. The device has an integrated KNX bus communication module and is designed for 35 mm profile rail mounting. The power supply is supplied via the KNX bus.

Main features

- Plastic housing
- Programming button and LED on the front
- LEDs for status and data traffic signalling on bus line and Ethernet network
- Buttons for activating special functions
- Connection to bus line via KNX terminal
- Connection to Ethernet network via RJ45 connector
- Mounting on 35 mm profile rail (in accordance with EN 60715)
- Device from 1 modular unit (1 UM = 18 mm)
- IP20 degree of protection (device installed)
- Support of KNX secure technology, can be activated via ETS®
- KNX line/area coupler functionality

Technical data

- Power supplied via KNX bus (21-30 Vdc)
- Current consumption 20 mA from KNX bus
- Up to 8 KNXnet/IP connections simultaneously
- Extended filter table for main groups 0..31
- Operating temperature: - 5 ... + 45°C
- Relative humidity: 5-93% non condensing

Delivery

Delivery includes a terminal block for connection to the bus.

KNX / USB-C Interface

SYSTEM DEVICES

Description

The EK-IG1-TP device can be used as a programming interface for ETS® software and supports KNX long frames. Long frames enable faster downloads to devices that support them and are required for KNX security. The LEDs on the device indicate the operating status and communication errors on the bus. The USB connector (USB Type-C) is galvanically isolated from the KNX bus.

Main features

KNX

- Transmission medium: TP
- Interface protocol: HID/cEMI
- Max. APDU length: 233 bytes
- Object Server protocol: BAOS V2
- Device model: System B

Controls and indicators

- 3 LEDs (multicolour)

Other features

- Plastic housing (PC)
- Mounting on 35 mm rail (according to EN 60715)
- IP20 protection rating (device installed, according to EN 60529)
- Equipment class III (according to EN 60664-1)
- Climate class 3K5 and mechanical class 3M2 (according to EN 50491-2)
- 1 modular unit (1 unit = 18 mm)
- Weight 40 g
- Dimensions (WxHxD): 17.8 x 90 x 60 mm

Technical data

Power Supply

- Power supplied via the KNX bus (21–30 Vdc)
- Power via USB: no external power supply required.
- Current consumption: <15 mA from the KNX bus, <3 mA from the USB-C port

Connectors

- KNX TP bus connector (red/black)
- USB: Type-C connector, maximum cable length: 5 m

Environmental conditions

- Operating ambient temperature: -5 ... +45 °C
- Non-operating ambient temperature: -25 ... +70 °C
- Relative humidity (non-condensing): 5 ... 93 %

Delivery

Delivery includes a terminal block for connection to the bus.

Description

The EK-PSUDxx device is a switching power supply with 100 to 240 Vac and 50 to 60 Hz input, or 110 to 350 Vdc input, capable of delivering an adjustable output voltage of 23.3 to 28 Vdc. Suitable for installation in electrical panels on a 35 mm profile rail (according to EN 60715), it is also equipped with thermal, overload and short-circuit protection and supplied in a UL94V-0 fire-resistant plastic case with 2 modular units (1 UM = 18 mm).

Connections

- Screw terminals for mains input
- Screw terminals for load outputs
- Screw terminals for output voltage adjustment

Main features

- Output voltage adjustment in the range 23.3 ÷ 28 Vdc using an adjustable trimmer with Phillips screwdriver.
- Particularly suitable for powering Delégo EK-DEL-... modules designed for the supervision and control of KNX standard home automation systems.

Power supply Switching 230Vac

POWER SUPPLY UNITS

Technical data

- Input voltage: 100 to 240 Vac and 50 to 60 Hz, or 110 to 350 Vdc
- Nominal current at input voltage 115 / 230Vac: 0.20 / 0.22 A
- Input protection with fuse
- Output current @115 Vac: 0.5 A
- Hold-up time: 15 ms @230Vac, 7ms @115Vac
- Ripple < 50 mV rms
- Electronic protections: thermal, overload, short circuit
- Power dissipation: 4 W @230Vac
- Operating temperature: -10 ... +60 °C
- Non-condensing relative humidity: 0 ... 95%
- Number of modular units: 2
- UL94V-0 fire-retardant plastic housing
- Connections with screw terminal block, max cable 2.5 mm²
- Protection class: IP20
- Dimensions (WxHxD): 35.5 x 90 x 60 mm
- Weight: 110g
- Standards: classification according to CEI EN 64-8 PELV / SELV, CEI EN 60950-1, CEI EN 61000-6-1, CEI EN 61000-6-3, CEI EN 55011, CEI EN 55014

EK-PSUD24

Configurable logical module

FLUSH-MOUNTED I/O MODULES

Description

The configurable logical module Ekinex® EK-LM2-TP is a KNX S-mode device that can be used to perform logic and data processing functions on data exchanged on the KNX bus. The device is suitable for mounting in wall box or on 35 mm rail (EN 60715) with the support EK-SMG-35 included in the delivery. To be used in KNX installations for home and building automation. The device is powered by the KNX bus line with a SELV voltage 30 Vdc and does not require auxiliary power.

Main features

- Plastic housing
- Wall installation in flush mounting box or, with a mounting support, on 35 mm rail (according to EN 60715)
- Protection degree IP20 (installed device)
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Weight 20 g

Functions

The device implements independent blocks of the below listed types:

- **Logic:** Combines a number of boolean inputs according to logic operations.
- **Arithmetic:** Performs mathematical computations on one or more input values.
- **Range:** Performs a scaling of the input value to a different range of values, or a boundary limit.
- **Mapping:** Translates a set of input values (up to 8 points) to a different set of output values.
- **Conversion:** Converts a KNX communication object to another one with a different KNX data type (DPT).
- **Timer:** Implements a one-shot (monostable) or free running (stable) timer, with configurable on- and off-delay times.
- **Compare:** Returns the result of a comparison (equal, larger, smaller etc.) between two input values
- **Multiplexer:** Copies the value of one input object to either 1 of N output objects, or to all objects selected in the output set.

Order information		
Code	Version	Package
EK-LM2-TP	4 IN	1 pcs.

Each function can be configured in different ways by means of parameters in the ETS application. There are several independent instances available for each type of block, therefore the device can be used to fulfill many requirements or to solve a large number of contingencies in the same installation. An additional terminal block allows the connection of up to 4 dry contacts for simple external inputs.

Power supply

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 10 mA

Delivery

Delivery includes a terminal block for connection to the bus.

Accessories

Support for mounting on a standard 35 mm DIN-rail (code EK-SMG-35) and spring for snapping on the back of Ekinex® wall-mount devices (code EK-MAR-...) to be ordered separately.

Universal interface

2 (4) IN, 2 (4) OUT

FLUSH-MOUNTED I/O MODULES

Description

The Ekinex® universal interface is a KNX device which can be used as input and/or output module. The device is equipped with:

- inputs to connect the KNX bus to switches, pushbuttons or classic sensors (normally not communicating on the KNX bus) or any binary signals from other devices, in order to control KNX bus functions;
- control outputs for low consumption LEDs.

The voltage for polling the inputs is supplied within the device. The device integrates a KNX bus communication module and is realized for flush-mounting or for mounting on a standard 35 mm DIN-rail. The device is powered by the KNX bus and does not require auxiliary power supply.

Main features

- Technopolymer casing
- Programming pushbutton and LED on the case
- Connection to bus line with KNX terminal block
- Screw terminal blocks for connecting inputs and outputs
- IP20 protection degree (installed device)
- Weight 20 g

Power supply

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 10 mA

Delivery

Delivery includes a terminal block for connection to the bus.

Accessories

Support for mounting on a standard 35 mm DIN-rail (code EK-SMG-35) and spring for snapping on the back of Ekinex® wall-mount devices (code EK-MAR-...) to be ordered separately.

EK-CC2-TP

EK-CD2-TP

Universal interface
4 configurable IN, 4 OUT
FLUSH-MOUNTED I/O MODULES

Description

The Ekinex® EK-CG2-TP pushbutton interface is a KNX device which can be used as input and/or output module. The device is equipped with 4 configurable inputs and 4 control outputs for low consumption LEDs.

Inputs can be independently configured to connect the KNX bus to:

- switches, pushbuttons, classic sensors (normally not communicating on the KNX bus) or any binary signals from other devices, in order to control KNX bus functions;
- passive temperature sensors (NTC 10 kΩ at 25°C). The environment air mass temperature value, measured by those sensors, can be sent onto the bus or be used to control a room or zone temperature through the integrated thermostat function.

The voltage for polling the inputs is supplied within the device. The device integrates a KNX bus communication module and is realized for flush-mounting or for mounting on a standard 35 mm DIN-rail. The device is powered by the KNX bus and does not require auxiliary power supply.

Main features

- Technopolymer casing
- Programming pushbutton and LED on the case
- Connection to bus line with KNX terminal block
- Screw terminal blocks for connecting inputs and outputs
- IP20 protection degree (installed device)
- Weight 20 g

Power supply

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 10 mA

Delivery

Delivery includes a terminal block for connection to the bus. The NTC temperature sensors (page 231) for those channels configured as [AI] must be ordered separately.

Accessories

Support for mounting on a standard 35 mm DIN-rail (code EK-SMG-35) and spring for snapping on the back of Ekinex® wall-mount devices (code EK-MAR-...) to be ordered separately.

Dimensions [mm]

Universal interface
4 IN, 2 OUT (relay 5A)
FLUSH-MOUNTED I/O MODULES

Description

The Ekinex® universal interface EK-CE2-TP is a KNX device which can be used as input and/or output module. The device is equipped with:

- 4 inputs to connect the KNX bus to switches, pushbuttons or classic sensors (normally not communicating on the KNX bus) or any binary signals from other devices, in order to control KNX bus functions. In addition, one input is configurable as analogue to connect a NTC temperature sensor (10 kΩ at 25 °C);
- 2 5 A relay outputs to be used as electrical load control (independent) or paired for shutter and blind actuator control.

The voltage for polling the inputs is supplied within the device. The device integrates a KNX bus communication module and is realized for flush-mounting or for mounting on a standard 35 mm DIN-rail. The device is powered by the KNX bus and does not require auxiliary power supply.

Main features

- Technopolymer casing
- Programming pushbutton and LED on the case
- Connection to bus line with KNX terminal block
- Screw terminal blocks for connecting inputs and outputs
- IP20 protection degree (installed device)
- Weight 35 g

Power supply

- 30 Vdc power supply by KNX bus
- Current consumption from bus < 10 mA

Delivery

Delivery includes a terminal block for connection to the bus. The NTC temperature sensors (page 231) for those channels configured as [AI] must be ordered separately.

Accessories

Support for mounting on a standard 35 mm DIN-rail (code EK-SMG-35) and spring for snapping on the back of Ekinex® wall-mount devices (code EK-MAR-...) to be ordered separately.

Description

ÆVO built to last - Unbeatable reliability and durability for a worry-free tomorrow. The universal actuator EK-FH1-TP from the ÆVO series allows you to control up to 4 groups of electrical loads, such as lights and valves, or to control up to 4 motorised drives, such as Venetian blinds and 3-way valves, independently and in any combination: for this purpose, the device has outputs equipped with potential-free relay contacts. The device's bistable relays ensure that the set control status is maintained even if the bus is de-energised.

The device is equipped with pushbuttons for manual control and LEDs for status indication: a button allows switching between automatic and manual operation. The device has an integrated KNX bus communication module and is designed for mounting on a 35 mm profile rail. Power is supplied via the KNX bus and no auxiliary power supply is required.

Main features

- Plastic housing
- Buttons and LEDs for control and status indication of the outputs on the front panel
- Button and LED for programming or manual/automatic operation on the front panel
- Bus line connection via KNX terminal
- Connection of loads via screw terminals with cable cross-section up to 4 mm²
- Connection of different phases on adjacent outputs
- 4 modular units (1 UM = 18 mm)
- Technical data
- Power supply
- Voltage 30 Vdc via KNX bus

Technical data

Power supply

- Voltage 30 Vdc via KNX bus

Outputs

- Number: 4 (bistable relays)
- Voltage 230V AC
- Current: 16 A

Description
ÆVO built to last - Unbeatable reliability and durability for a worry-free tomorrow.The EK-FH1-TP-I universal I/O module from the ÆVO Series allows you to control up to 4 groups of electrical devices, such as lights and valves, or up to 4 motorized drives, such as blinds and 3-way valves, independently and in any combination you like. for this purpose, the device has outputs equipped with potential-free bistable relay contacts that guarantee that the set control status is maintained even in the event of a power failure.

In addition, EK-FH1-TP-I allows the control of up to 4 drives, scenarios, up to 4 motors, dimmers, or the climate control of up to 4 rooms using the integrated thermostat/hygrostat function, by reading traditional commands and sensors equipped with potential-free contacts or passive NTC temperature probes; For this purpose, the device has 4 analog/digital inputs that can be configured independently with interrogation voltage produced inside the device.

The product is equipped with buttons for manual control and LEDs for status indication: a button allows switching between automatic and manual operation. The device has an integrated KNX bus communication module and is designed for mounting on a 35 mm profile rail. Power is supplied via the KNX bus and no auxiliary power supply is required.

- Main features**
- Technopolymer casing
 - Buttons and LEDs for control and output status indication on the front panel
 - Button and LED for programming or manual/automatic operation on the front panel
 - Bus line connection via KNX terminal
 - Connection of loads to outputs via screw terminals with cable cross-section up to 4 mm²
 - Connection of loads to inputs via screw terminals with cable cross-section up to 2,5 mm²
 - Connection of different phases on adjacent outputs
 - Device with 4 modular units (1 MU = 14 mm)

Universal I/O Module 4 outputs 4 inputs KNX ÆVO Series

I/O MODULES AND ACTUATORS

Technical data
Power supply

- Voltage 30 Vdc via KNX bus

Outputs

- Number: 4 (bistable relays)
- Voltage 230V AC
- Current: 16 A

Inputs

- Number: 4 (configurable analog/digital)
- For passive temperature sensors (NTC 10 kΩ at 25°C)
- For switches, buttons, or traditional potential-free sensors

Delivery
The supply includes a terminal for connection to the KNX bus line. Any NTC temperature sensors to be connected to the inputs must be ordered separately.

Description

ÆVO built to last - Unbeatable reliability and durability for a worry-free tomorrow. The EK-FG1-TP-I universal I/O module from the ÆVO Series allows you to control up to 8 groups of electrical devices, such as lights and valves, or up to 4 motorized drives, such as blinds and 3-way valves, independently and in any combination you like. for this purpose, the device has outputs equipped with potential-free bistable relay contacts that guarantee that the set control status is maintained even in the event of a power failure.

In addition, EK-FG1-TP-I allows the control of up to 8 drives, scenarios, up to 4 motors, dimmers, or the climate control of up to 8 rooms using the integrated thermostat/hygrostat function, by reading traditional commands and sensors equipped with potential-free contacts or passive NTC temperature probes; For this purpose, the device has 8 analog/digital inputs that can be configured independently with interrogation voltage produced inside the device.

The product is equipped with buttons for manual control and LEDs for status indication: a button allows switching between automatic and manual operation. The device has an integrated KNX bus communication module and is designed for mounting on a 35 mm profile rail. Power is supplied via the KNX bus and no auxiliary power supply is required.

Description

The Ekinex® EK-FA1-TP binary output allows to command 4 groups of loads independently; to this purpose, the device has outputs fitted with potential-free relays, . The device's latching relays guarantee the upkeep of command status even in the case of bus power failures. The front levers indicate the status of each output channel and, in case of emergency, allow manual command (by means of a tool) of the loads. The device integrates a KNX bus communication module and is realized for mounting on a standard 35 mm DIN-rail. The device is supplied by the KNX bus and does not require auxiliary power supply.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Connection to bus line with KNX terminal block
- Connection of outputs with screw terminals
- Overvoltage class III (according to EN 60664-1)
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Pollution degree 2 (according to IEC 60664-1)
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 205 g

Order information

Code	Package
EK-FA1-TP	1 pcs.

Technical data

Power supply

- 30 Vdc voltage by KNX bus
- Current consumption from bus < 12 mA
- Power from bus 360 mW

Outputs

- 4 latch relays
- Nominal voltage (U_n): 100-230Vac, 50/60Hz
- Nominal current (I_n): max 10 A (both @100Vac and @230Vac)
- Switched power: 1000W @100Vac - 2200 W @230Vac

Delivery

Delivery includes a terminal block for connection to the bus.

Description

The EK-GD2-TP-2-LV 2-channel KNX 12/24/48 Vdc dimmer allows brightness control in constant voltage (CV) PWM mode for LED loads. Designed specifically for dimmable LED strips and loads, it is compatible with the KNX system and ideal for monochromatic and CCT strips with dynamic white (TW). The device has an integrated SELV 30 Vdc bus communication module, KNX certified.

Main features

- Plastic casing
- Device for free installation in junction boxes or walls
- Mounting on 35 mm profile rail (using the special bracket included)
- IP20 protection rating (device installed)
- ON/OFF control and brightness adjustment of individual or grouped lighting fixtures, Tunable White and DimToWarm
- Selection of PWM output frequency from ETS from 250 Hz to 6 kHz
- Fade-in time on and off, minimum and maximum brightness level, linear or logarithmic adjustment curve settable from ETS
- Soft or instant on and off, with settable delay
- Possibility of parallel connection of outputs to increase output power
- Configuration of behaviour after power restoration, bus ON/OFF, download via ETS
- Channels can be set from ETS as independent, in parallel or as Tunable White
- Lock function, forced operation, staircase lighting, scenarios, night mode, counter and logic functions for each channel, settable from ETS
- Power failure alarm
- Auxiliary output function via relay (external) with status indication via KNX
- Installer mode (with KNX bus active): pressing the programming button for approximately 2 seconds activates/deactivates the flashing of the programming LED and the load approximately every 1 second

Technical data

Inputs

- Supply voltage: min: 10.8 Vdc, max: 52.8 Vdc
- Constant input voltage: 12/24/48 Vdc

Outputs

- PWM voltage output 12/24/48 Vdc
- Output current: 6 A per single channel, or 12 A for 2 channels connected in parallel
- Output channels: 2
- Nominal power per single channel: 72 W @12 V, 144 W @24 V, 288 W @48 V

Dimming

- PWM dimming mode in the range 250 Hz ÷ 6 kHz
- Dimming range: 1-100%

Supply

The supply includes a terminal for connection to the bus line.

Dimensions [mm]

Description

The EK-GD1-TP-4-LV-T 4-channel KNX 12/24/48 Vdc dimmer allows brightness control in constant voltage (CV) PWM mode for LED loads. Designed specifically for dimmable LED strips and loads, it is compatible with the KNX system and ideal for monochromatic and CCT strips with dynamic white (TW). Installation is simple via DIN rail mounting, ensuring perfect integration into electrical panels. The device has an integrated SELV 30 Vdc bus communication module, KNX certified.

Main features

- Plastic housing
- Device for installation on 35 mm profile rail (4 modular units)
- IP20 protection rating (device installed)
- ON/OFF control and brightness adjustment of individual or grouped lighting fixtures, Tunable White and DimToWarm
- Selection of PWM output frequency from ETS from 250 Hz to 6 kHz
- Fade-in time on and off, minimum and maximum brightness levels, linear or logarithmic adjustment curve settable from ETS
- Soft or instant on and off, with settable delay
- Possibility of parallel connection of outputs to increase output power
- Configuration of behaviour after power restoration, bus ON/OFF, download via ETS
- Channels can be set from ETS as independent, parallel or Tunable White
- Lock function, forced operation, staircase lighting, scenarios, night mode, meter and logic functions for each channel, settable from ETS
- Power failure alarm
- Manual control with membrane buttons for local ON/OFF testing of channels 1-2-3-4: in manual mode, briefly pressing the button for a channel
 - activates/deactivates the load, pressing for at least 2 seconds causes the load to flash approximately every 1 second
- Relay contact for switching off the AC/DC power supply when the 12/24/48 Vdc outputs are off, or alternatively as a relay for auxiliary output
- Auxiliary output function via relay with status indication via KNX

Description

KNX bus device with single-channel phase cut dimmer function for light loads, with supply voltage 90-230 Vac at 50/60 Hz. Use in KNX standard home and building automation systems.

Main features

- Operating temperature: -20 °C ... + 40 °C
- Storage temperature: 40 °C ... + 60 °C
- Transport temperature: 40 °C ... + 60 °C
- Max. rated casing temperature (tc): 80 °C
- Relative humidity: 91% non-condensing
- Degree of protection: IP00
- Power and load wiring: 1.5 mm2 (single cable) 2.5 mm2 (stranded cable), 16 to 13 AWG
- Max. torque 0.5 Nm for screw terminals
- KNX bus wiring: 0.26 to 0.5 mm2 - 23 to 20 AWG
- Peeling: 5.0 6.0 mm / Technopolymer casing
- Luminaire for flush-mounting or panel mounting (with supplied accessory)
- Weight: 37 g / Dimensions (LxHxW): 53 x 61 x 29 mm

Functions

- ON/OFF control and dimming of individual or grouped luminaires
- Fade time on and off, minimum and maximum brightness level, linear or logarithmic dimming curve settable from ETS
- Soft or instantaneous switching on and off, with settable delay
- Configuration of behaviour after power reset, bus ON/OFF, unloading via ETS
- Channels can be set by the ETS as independent, in parallel or with copy function from another channel
- Locking function, forced operation, staircase light, scenes, night, counter and logic functions for each channel, settable via ETS
- Alarm for short circuit, open load and power failure
- Auxiliary output function with status indication via KNX
- Manual operation with membrane pushbuttons and for local ON/OFF testing of channels 1-2-3-4 also in the absence of the KNX bus: short press of the button switches the load on/off, pressing for at least 2 seconds makes the load flash every 1 s approx.

KNX Dimmer 90-230V~50/60Hz

DIMMER

Technical data

Inputs

- Supply voltage: 90 - 230 Vac 50/60 Hz
- Max. input current: 1 A

Outputs

- Supply voltage: 90 - 230 Vac 50/60 Hz
- Output power: 110 W @110 Vac, 220 W @220 Vac, 230 W @230 Vac
- Minimum load power: 1 W
- Max. output current: 1 A

Dimming

- Trailing edge dimming mode with open load control (OPEN CIRCUIT) and short circuit on load (SHORT CIRCUIT)
- Dimming range: 1-100%.

Notes

Loads that can be used with the dimmer can be: incandescent lamps, mains voltage halogen lamps, mains voltage dimmable LED lamps, mains voltage dimmable LED strips, switching power supplies for dimmable LEDs in phase cut. The dimmer cuts phase in trailing edge mode.

Description

KNX bus device with 4-channel phase cut dimmer function for light loads, with supply voltage 90-230 Vac at 50/60 Hz. For use in KNX-standard home and building automation systems. Suitable for simplifying the connection of loads.

Main features

- Operating temperature: 20 °C ... + 40 °C
- Storage temperature: 40 °C ... + 60 °C
- Transport temperature: 40 °C ... + 60 °C
- Max. nominal enclosure temperature (tc): 80 °C
- Relative humidity: 91% non-condensing
- Degree of protection: IP00 (IP20 in junction box or switchboard)
- Power supply and load wiring: 1.5 mm2 (single cable) 2.5 mm2 (stranded cable), 16 to 13 AWG
- KNX bus wiring: 0.26 to 0.5 mm2 - 23 to 20 AWG
- Stripping: 5.0 6.0 mm
- Plastic housing
- 4 UM panel-mounted luminaire
- Weight: 200 g
- Dimensions (LxHxW): 71 x 91 x 62 mm

Functions

- ON/OFF control and dimming of individual or grouped luminaires
- On and off fade time, minimum and maximum brightness level, linear or logarithmic dimming curve settable via ETS
- Soft or instantaneous switch-on and switch-off, with settable delay
- Configuration of behaviour after power reset, bus ON/OFF, unloading via ETS
- Channels can be set by ETS as independent, in parallel or with copy function from another channel
- Status indication of outputs via LEDs
- Blocking, forced operation, staircase light, scene, night, counter and logic functions for each channel, settable via ETS

KNX Dimmer 90-230V~50/60Hz 4-channels

DIMMER

- Alarm for short circuit, open load and power failure
- Auxiliary output function with status indication via KNX
- Manual operation with membrane pushbuttons and for local ON/OFF testing of channels 1234 even in the absence of the KNX bus: short press of the button switches the load on/off, pressing for at least 2 seconds causes the load to flash every 1 s approx.

Technical data

Inputs

- Supply voltage: 90 230 Vac 50/60 Hz
- Max. input current: 4 A

Outputs

- Supply voltage: 90 230 Vac 50/60 Hz
- Output power per channel: 110 W @110 Vac, 220 W @220 Vac, 230 W @230 Vac
- Minimum load power: 1 W per channel
- Max. output current: 1 A per channel

Dimming

- Trailing edge dimming mode with open load control (OPEN CIRCUIT) and short circuit on load (SHORT CIRCUIT)
- Dimming range: 1100%.

Note

Loads that can be used with the dimmer can be: incandescent lamps, mains voltage halogen lamps, mains voltage dimmable LED lamps, mains voltage dimmable LED strips, switching power supplies for dimmable LEDs in phase cut. The dimmer cuts phase in trailing edge mode.

Dimensions [mm]

Description

The Ekinex® 4-fold 0-10 V actuator EK-GF1-TP can be used as 0-10 V control output device or, alternatively, for controlling dimmerable LED power supply units. When used for LED controlling, the selection of the colour can be made optionally in HSV or RGB mode. Scenarios, predefined sequences, sequence repetition and random functions are available; the dimming speed and the holding time are programmable. The device is fitted with membrane pushbuttons for manual command and LEDs for status indication; a pushbutton allows the switching between automatic or manual operation modes. The device integrates a KNX bus communication module and is realised for mounting on a standard 35 mm DIN-rail. The device is powered by the KNX bus.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Membrane keyboard with LEDs for status indication of outputs
- Pushbutton for switching operating mode (normal / programming)
- CH pushbutton for individual or simultaneous channels control
- HSV / RGB pushbutton colour control mode
- Connection to bus line with KNX terminal block
- Connection of outputs with screw terminals
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)

Order information

DIMMERS

Description

The single-channel phase cut dimmer EK-GD2-1-HV allows the brightness control of LED and halogen sources with a voltage of 90-230 Vac 50/60Hz for up to 220W.

Main features

- Plastic housing
- Device for free installation in junction boxes or wall
- Mounting on 35 mm profile rail (by means of code holder included)
- IP10 degree of protection (device installed)

Functions

- Dimming up to complete switch-off (dim-to-dark)
- Minimum brightness level: 1%
- Optimised output curve

Connections

- Screw terminals for control, supply and loads

Technical data

- Single-channel dimmer with phase-cut output
- Supply range: 90-230 Vac 50/60Hz
- Maximum output power 230W
- Control inputs: non-isolated N.O. pushbutton
- Maximum resistive load 1A.
- Conductor diameter 12-30 AWG (0.05-2.5 mmq)
- Storage temperature Min: -40°C Max: 60°C

Note

For electronic loads and/or LEDs consider maximum power halved from nominal value.

DALI dimmer 12/48 Vdc 1/2 channels multifunction

DALI DIMMERS

Description

Ekinex multifunction 12-48 Vdc DALI dimmers are devices for regulating the brightness of low-voltage LED loads via high-frequency PWM control. Available in 1-channel and 2-channel versions, they allow control of LED strips and dimmable 12/24/48 Vdc LED sources via DALI protocol (DALI-1 / DALI-2) and via local inputs (button, 0-10V, 1-10V, potentiometer). The 2-channel version also supports DT8 Tunable White configurations for dynamic colour temperature management.

Available versions

- 1 channel - single monochromatic LED circuit control
- 2 channels - two independent circuits or Tunable White (DT8)

Main features

- High frequency PWM dimming (approx. 390-3000 Hz)
- Minimum adjustment level ≈ 0.1%
- DALI-1 / DALI-2 protocol
- Tunable White management (2-channel version only)
- Configurable dimming curves (linear / logarithmic)
- Soft fade ON/OFF with adjustable times
- Last status memory in case of blackout

Operating modes

- DT6 (1 channel)
- DT6 / DT8 (2 channels)

Local control inputs

- N/O button
- 0-10V signal
- 1-10V signal
- Linear potentiometer

Integrated protections

- Polarity reversal
- Short circuit
- Overvoltage

Technical data

Power supply

- 12...48 Vdc
- Operating range: ~10.8...52.8 Vdc

Outputs

- 1 or 2 PWM outputs
- Max. current: up to 12 A
- Approximate maximum power: 120 W @12 V, 288 W @24 V, 576 W @48 V

Connections

- Screw terminals for DALI bus, control, power supply and LED source

EK-GD2-DL-2-L-01

DALI dimmer 12/48 Vdc 4 channels multifunction

DALI DIMMERS

Description

The EKGD1-DL-4-L-01 DALI 2 standard 4-channel dimmer is powered by 12/24/48 Vdc with flicker-free PWM dimming and allows control of brightness, dynamic white (TW) and RGBW colour (DT6 and DT8) for low-voltage LEDs. The inputs are DALI 2 bus type, compliant with the IEC 62386 standard. The operating mode settings are made via a local dip-switch selector.

Main features

- Dimmer with isolated PUSH inputs, active and passive 0-10/1-10 potentiometer, switch, sensor, phase cut, DALI2 DT6, DALI2 DT8, DMX512ARDM, BLE
- Master/slave functionality on DMX512A-RDM
- LEDs indicating the status of the output channels and dimmer configuration
- PWM frequency: 390Hz - 3000Hz - 10000Hz
- Protection against polarity reversal, short circuit, open circuit and voltage spikes
- Dip-switch selector for setting the operating mode

Technical data

Inputs

- Constant input voltage: 12 / 24 / 48 Vdc
- Supply voltage: 8 to 53 Vdc

Outputs

- Number of outputs: 4
- PWM voltage output 12/24/48 Vdc
- Load type: single colour, Tunable White, RGB, RGBW
- Output current: 0A to 8A per channel
- Output current in single-channel mode from 0A to 32A (1536W @48Vdc)
- Nominal power per output @12Vdc: 96 W
- Nominal power per output @24Vdc: 192 W
- Nominal power per output @48Vdc: 384 W

Command

- Control types: DALI2 DT6 DT8, 0-10V / 1-10V, PUSH, linear potentiometer, switch, sensor, phase cut, DMX512A-RDM, BLE

Connections

- Screw terminals for DALI bus, control, power supply and LED source

Dimensions [mm]

DALI Dimmer 90-230V~ 50/60Hz

DALI DIMMERS

Description

The single-channel phase cut dimmer EK-GD2-DL-1-HV allows the brightness control of LED and halogen sources with a voltage of 90-230 Vac 50/60Hz for up to 220Watts. Input Bus DALI-2 reference IEC 62386 standard.

Main features

- Plastic housing
- Device for free installation in junction boxes or wall
- Mounting on 35 mm profile rail (by means of code holder included)
- IP10 degree of protection (device installed)

Functions

- Dimming up to complete switch-off (dim-to-dark)
- Minimum brightness level: 1%
- Optimised output curve

Connections

- Screw terminals for DALI bus, control, power supply and LED source

Technical data

- Single-channel dimmer with phase-cut output
- Supply range: 90-230 Vac 50/60Hz
- Maximum output power 230W
- Control inputs: DALI bus
- Maximum resistive load 1A.
- For electronic and/or LED loads the power is halved
- Conductor diameter 12-30 AWG (0.05-2.5 mmq)
- Storage temperature Min: -40°C Max: 60°C

Note

For electronic loads and/or electronic LEDs consider maximum power halved from nominal value.

DALI Dimmer 90-230V~ 50/60Hz 4 channels

DALI DIMMERS

Description

The 4-channel DALI-2 dimmer allows brightness control of LED and halogen sources with voltage 90-230 Vac 50/60Hz for up to 200Watts on 4 channels each. Input Bus DALI-2 reference IEC 62386 standard.

Main features

- Plastic housing
- Device with 4 modular units
- Mounting on 35 mm profile rail (according to EN 60715)
- IP20 degree of protection (device installed)

Functions

- Memory function, fade time, minimum and maximum level settable via DALI software
- Dimming up to complete switch-off (dim-to-dark)
- Minimum brightness level: 0.1%
- Dimming curve: linear / logarithmic settable by DALI
- Electronic short-circuit and overload protection

Connections

Spring terminals for easy application

Technical data

- 4-channel dimmer with phase cut output
- Power supply range: 90-230 Vac 50/60Hz
- Maximum power output 200W per channel
- For electronic loads and/or electronic LEDs the power is halved
- Conductor diameter 12-30 AWG (0.05-2.5 mmq)
- Storage temperature Min: -40°C Max: 60°C

Note

For electronic loads and/or electronic LEDs consider maximum power halved from nominal value.

VRF control interface with KNX communication

THERMOREGULATION

Description

Ekinex solves the KNX integration of air conditioning with certified protocols. Ekinex's VRF KNX control interface is a device that provides two-way communication with Inverter/VRF units through protocols developed and validated in collaboration with air conditioning manufacturers. Integration between the KNX building automation system and the VRV/VRF air conditioning unit is plug and play, no adapter or external power source is required, and bidirectional data exchange occurs with confirmed actions and statuses and error detection.

Main features

- Checking the different parameters of the unit
- Error detection during communication
- Signaling LEDs
- Connection to bus line via KNX terminal
- 3 configurable digital inputs
- Power supply via KNX bus

Connections

- KNX port with standard connector
- Terminal for connection to direct expansion indoor unit
- Terminal for additional digital inputs

Delivery

Delivery includes a terminal for connection to the KNX bus line, a terminal for connecting additional digital inputs, and a cable for connection to the Inverter/VRF indoor unit.

Dimensions [mm]

Fancoil actuator / controller 3-speed fan control

THERMOREGULATION

Description

The Ekinex® EK-HA1-TP fancoil actuator / controller allows to control a fan coil unit for the air conditioning of a room. The device can perform the function of simple actuator in combination with a KNX room thermostat or that of actuator / controller with acquisition of the temperature value by a KNX room sensor or a probe connected to an analogue input. The device is suitable for 2-pipe hydraulic distribution systems with ON / OFF control of one electrothermal shut-off valve actuator and a 3-speed fan. The outputs not used to control the fan coil unit can be configured as binary output channels for different functions. The device is equipped with 2 inputs freely configurable as analogue or digital. The device integrates a KNX bus communication module and is realized for mounting on a standard 35 mm DIN-rail. The device is supplied by the KNX bus and requires an additional 230 Vac power supply to operate.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Connection to bus line with KNX terminal block
- Connection of inputs, outputs and 230 Vac power supply with screw terminals
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Overvoltage class III (according to EN 60664-1)
- Pollution degree 2 (according to IEC 60664-1)
- 35 mm rail mounting (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 175 g

Technical data

Power supply

- Voltage (loads) 230 Vac 50/60 Hz
- Voltage (electronics) 30 Vdc by KNX bus

Inputs

- 2 freely configurable for passive temperature sensors (10 k Ω NTC at 25°C) or as potential-free binary inputs

Outputs

- 3 interlocked relay outputs to control a 3-speed fan (or configurable as binary outputs for different applications)
- 1 relay SPST (single pole, single throw) to control an ON / OFF valve (in 2-pipe hydraulic distribution systems)

Delivery

Delivery includes a terminal block for connection to the bus.

Fancoil actuator / controller
full version
THERMOREGULATION

Description

The Ekinex® EK-HC1-TP fancoil actuator / controller allows to control a fan coil unit for the air conditioning of a room. The device can perform the function of simple actuator in combination with a KNX room thermostat or that of actuator / controller with acquisition of the temperature value by a KNX room sensor or a probe connected to an analogue input. The device is suitable for 2 or 4-pipe hydraulic distribution systems with ON / OFF control of one or two electrothermal shut-off valve actuators and a 3-speed fan or a brushless motor driven fan. The outputs not used to control the fan coil unit can be configured as binary output channels for different functions. The device is equipped with 3 inputs freely configurable as analogue or digital. The device is fitted with membrane pushbuttons for manual command and LED's for status indication: a pushbutton allows to switch between automatic and manual operation modes. The device integrates a KNX bus communication module and is realized for mounting on a standard 35 mm DIN-rail. The device is supplied by the KNX bus and requires an additional 230 Vac power supply to operate.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Membrane keyboard with LED's for status indication
- Pushbutton for switching operating mode (normal / programming)
- Connection to bus line with KNX terminal block
- Connection of inputs, outputs and 230 Vac power supply with screw terminals
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Overvoltage class III (according to EN 60664-1)
- Pollution degree 2 (according to IEC 60664-1)
- 35 mm rail mounting (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 205 g

8-fold actuator / controller for electrothermal valve drives

THERMOREGULATION

Description

The Ekinex® EK-HE1-TP actuator / controller allows to control electrothermal actuators or servomotors in hydronic systems for room heating and / or cooling. The device can perform the function of simple actuator in combination with one or more KNX room thermostats or that of actuator / controller with acquisition of the temperature value by one or more KNX sensors. The device is suitable for 2 or 4-pipe hydraulic distribution systems with ON / OFF control of electrothermal shut-off valve actuators. The device is fitted with membrane pushbuttons for manual command and LED's for status indication; a pushbutton allows to switch between automatic and manual operation modes. The device integrates a KNX bus communication module and is realized for mounting on a standard 35 mm DIN-rail. The device is supplied by the KNX bus and requires an additional 230 Vac power supply to operate.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Membrane keyboard with LED's for status indication
- Pushbutton for switching operating mode (normal / programming)
- Connection to bus line with KNX terminal block
- Connection of outputs and 230 Vac power supply with screw terminals
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Overvoltage class III (according to EN 60664-1)
- Pollution degree 2 (according to IEC 60664-1)
- 35 mm rail mounting (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 160 g

Technical data

Power supply

- Voltage (loads) 230 Vac 50/60 Hz
- Voltage (electronics) 30 Vdc by KNX bus

Outputs

- 8 TRIAC relays to control ON / OFF zone valve drives

Mixing actuator

THERMOREGULATION

Description

The Ekinex® EK-HH1-TP mixing actuator allows the control of 3 floating points or 0-10 V servo-motor for mixing valves. The flow temperature of the conveying fluid can be set at a fixed point, with external climatic compensation and with external climatic compensation plus internal conditions recalibration. The regulation modes are selectable separately for heating and cooling. The device is particularly suitable for underfloor or ceiling heating and cooling radiant panels applications in combination with Ekinex® room thermostats with integrated temperature and humidity sensor. A 0-10 V output allows the remote setting of a heat pump temperature setpoint value. The start-up function enables a radiant floors drying concrete phase according to EN 1264 standard. The membrane keyboard allows the manual command and includes LED's for status indication; the LCD-display allows displaying / setting of the main working parameters. The device integrates a KNX bus communication module and is realized for mounting on a standard 35 mm DIN-rail. The device is supplied by the KNX bus and requires an additional 230 Vac power supply to operate.

Main features

- Technopolymer casing
- Frontal programming pushbutton and LED
- Membrane keyboard with LED's for status indication
- Pushbutton for switching operating mode (normal / programming)
- Connection to bus line with KNX terminal block
- Connection of inputs, outputs and 230 Vac power supply with screw terminals
- Classification climatic 3K5 and mechanical 3M2 (according to EN 50491-2)
- Overvoltage class III (according to EN 60664-1)
- Pollution degree 2 (according to IEC 60664-1)
- 35 mm rail mounting (according to EN 60715)
- 8 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 380 g

Technical data

Power supply

- Voltage (loads) 230 Vac 50/60 Hz
- Voltage (electronics) 30 Vdc by KNX bus

Inputs

- 3 analogical exclusively for connection of NTC temperature sensors 10 kΩ at 25°C
- 2 configurable as analogical (exclusively for NTC temperature sensors 10 kΩ at 25°C) or digital (potential free)

Outputs

- 1 for control of a 3 point floating servomotor, 1 A, 250 Vac
- 1 for control of a servomotor with 0-10 V signal connection of high impedance input
- 3 for additional functions, relays 10(5) A, 250 Vac

Delivery

Delivery includes a terminal block for connection to the bus.

Description

Temperature sensors with NTC (Negative Temperature Coefficient, 10 kΩ ±1% a 25 °C, B = 3435) sensitive element for temperature measurement, to be used in combination with Ekinex® KNX devices equipped with an analogue input (or configurable as [AI]) for temperature measurement.

Characteristics and Technical data

Outdoor version (EK-STE-10K-3435)

- Sensitive element with high IP protection degree casing
- Cable gland (connecting cable not included in delivery)
- Working conditions:
 - operating temperature: -40°C...+100°C
 - relative humidity: 0...100%

Immersion version (EK-STI-10K-3435)

- Sensitive element with INOX cylinder casing
- Two-wire connecting cable (length 1,5 m)
- Operating temperature: -40°C...+105°C

Contact version (EK-STC-10K-3435)

- Brass toecap
- Two-wire connecting cable (length 1,5 m)
- Operating temperature: -40°C...+100°C

Air mass version (EK-STL-10K-3435)

- Sensor printed directly on the connecting cable
- Two-wire connecting cable (length 1,5 m)
- Operating temperature: -50°C...+105°C

Gateway Modbus RS485 - KNX

GATEWAYS

Description

The Ekinex® Modbus RS485 - KNX Gateway performs a protocol conversion between a serial RS485 Modbus RTU and a KNX TP network. The device works as Modbus master. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: 8...24 Vac or 12...35 Vdc
- Absorption at 24 Vdc: 3,5 VA

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- 1440-byte volatile support “KNX image” memory buffer

Modbus RS485 side

- RS485 serial communication port, electrically isolated from power supply, 120 ohm termination resistance pluggable by a 1-way micro-switch
- Modbus master RTU (Remote Terminal Unit) communication
- Selectable baud rate from 1200 to 115200 baud
- Device addressing from 0 to 250
- Coil, Input, Holding Register e Input Register data exchange
- Single and multiple register reading/writing
- 1440-byte volatile support “Modbus image” memory buffer

Configuration

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E

Delivery

The delivery includes the device and terminal blocks to connect to the KNX bus.

Other information

Modbus® is an open source, standard communication protocol suitable for master / slave data exchange between smart devices in various applications, such as industrial production, infrastructure, transportation and energy management.

Dimensions [mm]

Configuration and commissioning

Gateway Modbus TCP/IP - KNX

GATEWAYS

Description

The Ekinex® Modbus TCP/IP - KNX Gateway performs a protocol conversion between a Modbus RTU over TCP / IP and a KNX TP network. The device works as Modbus master. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: 8...24 Vac or 12...35 Vdc
- Absorption at 24 Vdc: 3,5 VA

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- 1440-byte volatile support “KNX image” memory buffer

Modbus TCP/IP side

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E.Communication Modbus master RTU (Remote Terminal Unit)
- Device addressing from 0 to 250
- Coil, Input, Holding Register e Input Register data exchange
- Single and multiple register reading/writing
- 1440-byte volatile support “Modbus image” memory buffer

Configuration

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E.

Delivery

The delivery includes the device and terminal blocks to connect to the KNX bus.

Other information

Modbus® is an open source, standard communication protocol suitable for master/ slave data exchange between smart devices in various applications, such as industrial production, infrastructure, transportation and energy management.

Dimensions [mm]

Configuration and commissioning

Documentation

For more information see the technical documentation, download from www.ekinex.com

Description

The Ekinex® BACnet - KNX Gateway performs a protocol conversion between a BACnet and a KNX TP network. Two versions are available: BACnet MS/TP (master-slave / token-passed) over serial RS485 network and BACnet IP over Ethernet. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: 8...24 Vac or 12...35 Vdc
- Absorption at 24 Vdc: 3,5 VA

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- 1440-byte volatile support “KNX image” memory buffer

BACnet (MS/TP version) side

- RS485 serial communication port, electrically isolated from power supply, 120 ohm termination resistance pluggable by a 1-way micro-switch
- BACnet communication
- Selectable baud rate from 1200 to 115200 baud
- BACnet objects exchange
- 1440-byte volatile support “BACNet image” memory buffer

BACnet side (IP version)

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E.Communication BACnet slave
- BACnet objects exchange
- 1440-byte volatile support “BACNet image” memory buffer

Configuration

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E.

Delivery

The delivery includes the device and terminal blocks to connect to the KNX bus.

Other information

BACnet® is an ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers) trademark.

Dimensions [mm]

Configuration and commissioning

By means of software tool **CGEKB1TP.exe** (download from www.ekinex.com)

MS/TP

IP

Description

The Ekinex® DMX - KNX Gateway performs a protocol conversion between a serial RS485 DMX and a KNX TP network. The device works as DMX master. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: 8...24 Vac or 12...35 Vdc
- Absorption at 24 Vdc: 3,5 VA

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- 1440-byte volatile support “KNX image” memory buffer

DMX side

- RS485 serial communication port, electrically isolated from power supply, 120 ohm termination resistance pluggable by a 1-way micro-switch
- DMX master communication
- Baud rate 250 kbaud
- Device addressing from 0 to 512
- 1-byte register writing on max 512 DMX devices

Configuration

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E

Delivery

The delivery includes the device and terminal blocks to connect to the KNX bus.

Other information

DMX512 is a standard for asynchronous serial transmission of digital data between controllers, devices and accessories for the light industry, approved by ANSI (American National Standards Institute) and supported by ESTA (Entertainment Services and Technology Association).

Dimensions [mm]

Configuration and commissioning

By means of software tool **CGEKBK1TP.exe** (download from www.ekinex.com)

Gateway M-Bus - KNX

GATEWAYS

Description

The Ekinex® M-Bus - KNX Gateway performs a protocol conversion between an M-Bus and a KNX TP network. The device acts as M-Bus master. Versions for networks with a maximum number of 20, 40, 80 and 160 connected M-Bus slave devices are available. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: from M-Bus network
- Absorption at 24 Vdc: 3,5 VA (without load);
4, 5, 8 or 14 VA (resp. with 20, 40, 80 or 160 M-Bus devices)

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- Baud rate 9600 baud
- 1440-byte volatile support “KNX image” memory buffer

M-Bus side

- M-Bus communication port (wired version, two-pole cable)
- Selectable baud rate from 300 to 9600 baud
- Device addressing from 1 to 250
- Variable reading through M-Bus slave device mapping
- 1440-byte volatile support “M-Bus image” memory buffer

Order information		
Code	Version	Package
EK-BM1-TP-20	max 20 slave devices	1 pcs.
EK-BM1-TP-40	max 40 slave devices	1 pcs.
EK-BM1-TP-80	max 80 slave devices	1 pcs.
EK-BM1-TP-160	max 160 slave devices	1 pcs.

Configuration

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E

Delivery

The delivery includes the device and terminal blocks to connect to the KNX bus.

Other information

M-Bus (Meter-Bus) is a standard protocol for remote reading of data acquired from thermal energy, electricity, gas and water meters. M-Bus is fully compliant with EN 13757: Communication Systems for remote meter reading, parts 2 (Physical and connection layer) and 3 (Application layer).

Gateway PROFINET - KNX

GATEWAYS

Description

The Ekinex® PROFINET - KNX Gateway performs a protocol conversion between a PROFINET and a KNX TP network. The device acts as slave of PROFINET communication. The device integrates a KNX bus communication module and it is suitable for mounting on a 35 mm DIN rail; it requires an auxiliary power supply.

Main features

- Technopolymer casing
- Connection to bus line with KNX terminal block
- Installation on 35 mm rail (according to EN 60715)
- 4 modular units (1 MU = 18 mm)
- IP20 protection degree (installed device)
- Weight 145 g

Technical data

- Power supply: 8...24 Vac or 12...35 Vdc
- Absorption at 24 Vdc: 3,5 VA

Communication

KNX side

- KNX TP (Twisted Pair) communication port electrically isolated from power supply
- 1440-byte volatile support “KNX image” memory buffer

PROFINET side

- Ethernet communication port (IEEE 802.3), RJ45 connector, minimum cable category: 5E.Communication PROFINET slave
- PROFINET data exchange
- 1440-byte volatile support “PROFINET image” memory buffer

Order information

Code	Application	Package
EK-BN1-TP	protocol conversion KNX - PROFINET	1 pcs.

Configuration and commissioning

Documentation

For more information see the technical documentation, download from **www.ekinex.com**

Description
Bidirectional gateway for integrating serial Modbus and IP networks. The Ekinex EK-BU1-485-TCP interface is a modular device designed to enable bidirectional communication between equipment equipped with a Modbus RS-485 port and the IP data network. Thanks to its versatility, the gateway allows serial Modbus devices to be easily integrated into Ethernet network infrastructures, ensuring a reliable and stable connection.

- The device features:**
- an RS-485 serial port for connecting Modbus devices
 - an RJ45 connector for interfacing with the IP data network

The interface is designed for mounting on a 35 mm DIN rail, suitable for electrical panels or distribution cabinets. Power can be supplied in two ways: via PoE (Power over Ethernet) directly from the LAN cable, or via an auxiliary DC power supply (6–36 VDC).

Operation
The EK-BU1-485-TCP gateway enables bidirectional conversion of the Modbus protocol between an RS-485 serial line and an Ethernet/IP network. Designed as a universal device, it can operate in conjunction with any equipment that acts as a Modbus master, ensuring maximum flexibility of integration into automation and supervision systems. In the Delègo environment, the gateway allows the number of RS-485 serial lines managed by the system to be expanded. The Delègo Server has a native RS-485 port for direct connection of Modbus devices: if communication with devices on multiple serial lines is required, one or more EK-BU1-485-TCP gateways can be used, thus expanding the system's capabilities in a simple and scalable manner.

- Technical data**
Power supply
- 6-36V DC or PoE port
 - Isolation between power supply and signal

Order information		
Code	Application	Package
EK-BU1-485-TCP	Gateway bidirezionale per l'integrazione di reti Modbus seriali e IP	1 pz.

Gateway RS485 to Ethernet POE

GATEWAY

- Environmental conditions
- Operating temperature: -40 to +85
 - Storage temperature: -40 to +85
 - Relative humidity: <95% non-condensing
- Communication interfaces
- 1 x Isolated RS-485
 - 1 x RJ45 PoE port, supports IEEE 802.3af standard

- RS-485 parameters
- Baud Rate: 1200 ~ 115200 bps
 - Parity Bit: None, odd parity, even parity, mark, space
 - Data Bit: 5 ~ 9 bits - Flow Control: No flow control

- Software
- Configuration: Web browser
 - Protocols: Ethernet, IP, TCP, UDP, HTTP, ARP, ICMP, DHCP, DNS

- Main features**
- Technopolymer casing
 - Designed for mounting on a 35 mm profile rail (according to EN 60715)
 - IP20 protection rating (according to EN 60529)
 - Safety class II
 - Modular device 2 UM (1 UM = 18 mm)
 - Dimensions 36 x 87 x 59 mm (W x H x D) - Weight 50 g

Dimensions [mm]

-  **Configuration and commissioning**
- The configuration and commissioning of the EK-BU1-485-TCP gateway must be carried out by accessing the web server integrated in the device. These activities must be carried out in accordance with the system design and performed by a professional. For further information, please refer to the technical documentation.

-  **Documentation**
- For more information see the technical documentation, download from www.ekinex.com

Description
Ekinex® Gateways EK-BF1-TP-D1 is a device used to control electronic control gear (ECG) with a DALI interface (according to EN 62386) via the KNX installation bus. The device converts switching and dimming commands from the connected KNX system into DALI telegrams and status information from the DALI bus into KNX telegrams.

- Connections**
- KNX port with standard connector
 - Screw terminals for DALI bus

- Technical data**
- Device power supply: 110-240 Vac or DC
 - KNX bus power supply

Supply
The scope of delivery includes a terminal for connection to the KNX bus line and a 1.2 x 2 cm heat shrink tubing for additional insulation of the bus cable.

Other information
DALI® (Digital Addressable Lighting Interface) is a worldwide standard for interfacing lighting control solutions whose data transmission protocol is contained in IEC 62386. DALI is a registered trademark of ZVEI (Zentralverband Elektrotechnik- und Elektronikindustrie e.V.).

With firmware version 0.2.5 or higher, the device is certified according to EN 62386-101 and -103 ed2 (DALI2) and therefore authorised to carry the DALI-2 logo.

Gateway KNX / DALI 1 channel

GATEWAY

- Main features**
- Besides the pure gateway function, the EK-BF1-TP-D1 also offers numerous additional functions:
- Addressing of up to 16 DALI groups or 63 individual ECGs
 - Flexible DALI commissioning concept with ETS5
 - Light colour control using type 8 ECG devices
 - Light colour control according to different ECG subtypes
 - Hourly programming for group and ECG control by value and/or colour
 - Different operating modes such as permanent mode, night mode or staircase mode
 - Integrated operating hours counter for each group and ECG with alarm when maximum duration is reached
 - Individual fault recognition with objects for each lamp / ECG
 - Complex failure analysis at group/device level with calculation of the number of failures and failure rate
 - Fault threshold monitoring with individually configurable threshold values
 - Scene module for extensive scene programming and dimming possibilities
 - Quick replacement' function for easy replacement of individual defective ECGs
 - Manual control of group and broadcast telegrams via control pushbuttons on the device
 - Fault status signalling via LED on the device

Dimensions [mm]

-  **Configuration and commissioning**
- ETS application v.5 and 6 for configuring the KNX functions of the device. DCA App as special interface for configuring DALI segments.

-  **Documentation**
- For more information see the technical documentation, download from www.ekinex.com

Gateway KNX / DALI 2 channels

GATEWAY

Description

Ekinex® Gateways EK-BF1-TP-D2 is a device used to control electronic control gear (ECG) with a DALI interface (according to EN 62386) via the KNX installation bus. The device converts switching and dimming commands from the connected KNX system into DALI telegrams and status information from the DALI bus into KNX telegrams.

Connections

- KNX port with standard connector
- Screw terminals for DALI bus

Technical data

- Device power supply: 110-240 Vac or DC
- KNX bus power supply

Supply

The scope of delivery includes a terminal for connection to the KNX bus line and a 1.2 x 2 cm heat shrink tubing for additional insulation of the bus cable.

Other information

DALI® (Digital Addressable Lighting Interface) is a worldwide standard for interfacing lighting control solutions whose data transmission protocol is contained in IEC 62386. DALI is a registered trademark of ZVEI (Zentralverband Elektrotechnik- und Elektronikindustrie e.V.).

With firmware version 0.2.5 or higher, the device is certified according to EN 62386-101 and -103 ed2 (DALI2) and therefore authorised to carry the DALI-2 logo.

Main features

Besides the pure gateway function, the EK-BF1-TP-D2 also offers numerous additional functions:

- Addressing of up to 2x16 DALI groups or 2x63 individual electronic ballasts
- Flexible DALI commissioning concept with ETS5
- Light colour control using type 8 ECG devices
- Light colour control according to different ECG subtypes
- Hourly programming for group and ECG control by value and/or colour
- Different operating modes such as permanent mode, night mode or staircase mode
- Integrated operating hours counter for each group and ECG with alarm when maximum duration is reached
- Individual fault recognition with objects for each lamp / ECG

Description

C4 TOOLBOX is a device designed to add functionality to a CONTROL4 supervision system when used in combination with Ekinex KNX devices.

With C4 TOOLBOX, you can:

- Send commands and receive information from KNX devices in the CONTROL4 system
- Monitor the building's energy consumption and control loads based on total absorption with a dedicated graphic driver for Composer
- Perform continuous diagnostic checks on KNX devices and receive notifications in the event of malfunctions
- Define command sequences (scenarios) and execute them with simple connections in Composer with third-party drivers
- Create configurable logic with a graphical editor and execute it in the background
- Send notifications to CONTROL4 in the event of malfunctions or configurable events on the bus

Dimensions [mm]

Order information

Code	Application	Package
EK-BT1-TP	KNX and Control4 interfacing	1 pcs.

Configuration and commissioning

Via an internet browser that can be configured both locally and remotely, via cloud access.

Voice control interface - KNX

GATEWAY

Description

Device with interface function between a KNX network (TP, twisted pair) and home speakers equipped with Amazon Alexa or Google Assistant. The interface, connected to Ekinex cloud services, is suitable for the control by voice commands of light, climate and motorization of a modern KNX standard building. The product is designed for installation on DIN profile rail and occupies 2 modules. The 12-24 Vdc power supply is external (power supply not included in the supply). The product with hardware based on embedded operating system, has a KNX TP node (twisted pair) and can therefore be connected directly to the bus network of KNX devices. The external connectivity is realized through the Ethernet port that connects the device directly to the home router.

The integrated web server provides access to the configuration environment and provides the following functions:

- Interface network settings
- Registration and subscription to Ekinex cloud services
- Automatic import of the ETS project and merging with previous imports
- Configuration of voice control accessories (max 150 accessories): lighting (on/off, dimmed and RGB), motorizations (open/close stop and position) and climate
- Configuration of action sequences on the KNX bus, which can be called up as scenarios by voice assistants
- Configuration of the IFTTT (If This Than That) cloud platform for the creation of association rules between events on the KNX bus and compatible services (e.g. sending e-mail)
- On the Amazon Alexa and Google Assistant apps, the Ekinex skill and action are available respectively for the complete configuration of the service.

Main features

- 12-24 Vdc power supply (absorption 240 mA at 12 Vdc) by means of a special plug-in terminal supplied. Power supply not included
- KNX TP bus (twisted pair) via red-black terminal provided
- 1 Ethernet port via cat. 5 or higher cable and standard RJ45 connector
- 2 frontal LEDs: POWER LED for signalling the presence of power supply; SERVICE LED for signalling particular operations in progress.
- 1 RESET button housed under the front cover on the back of the vertical card
- 1 RS485 port: not used
- 1 USB 2.0 port: not used

Konnect4 - KNX

GATEWAY

Description

Modular device with simplified programming unit function and IP interface for Control4 automation systems. Allows EKINEX-compatible devices to be programmed within the Composer Pro software without the use of ETS.

Main features

- Flexible integration of EKINEX and CONTROL4 products in the same installation.
- Simplified wiring for installers.
- Enhancement of the Control4 offering with design-oriented products.
- The same devices can be used by KNX professionals (with ETS) and by non-experts directly in Composer Pro.
- Maximum reliability thanks to the KNX standard-based solution.
- A winning offer for all markets, adapting to the different needs, styles and expectations of installers and end users.

Technical data

- Power supply 12/24 Vdc
- Power consumption 3W (240mA at 12V)
- Ethernet LAN connection port
- Plastic housing
- Version for mounting on 35 mm profile rail (according to EN 60715)
- IP20 protection rating (according to EN 60529)
- Insulation class II (according to EN 60335-1)
- Weight 70 g
- Modular device 2 UM (1 UM = 18 mm)
- Dimensions 36 x 94 x 71 mm (W x H x D)

Dimensions [mm]

Order information

Description

The EK-MS1-TP-20D device has 3 independent measurement channels with direct insertion and is suitable for measuring a maximum of 3 independent single-phase power lines (230 Vac, 50-60 Hz), or 1 three-phase power line (400 Vac, 50-60 Hz). The mounting is on a 35 mm DIN rail with dimensions of 4 modular units (L = 144 mm). It is also equipped with a display (graphic OLED, 128x32 px) and a query button. By pressing and holding the query button, it is possible to consult the instantaneous values of the measured electrical quantities (total active power, imported and exported active energy, voltage, current and power factor), the errors detected by the measuring system and other information on the product (FW and ETS versions, serial number of the KNX node).

Features

- OLED display for displaying measured and diagnostic information
- Bidirectional measurement of electrical parameters for single-phase and three phase circuits
- Connection of measuring circuits with direct connection via screw terminals with cable cross-section up to 4mm²
- Accuracy better than 2%
- Connection to bus line via KNX terminal
- 4 UM modular plastic housing (1 UM = 18 mm)

Technical data

- Rated voltage Un: 3x230/400 V AC (+/- 20%)
- Rated frequency fn: 50 Hz
- Direct connection current I_{max} 20 A
- Current consumption from bus < 10 mA

Three-phase secondary electricity meter for external KNX current transformers

METERING
COMING SOON

Description

The Ekinex KNX three-phase secondary electricity meter is a device for measuring active and reactive electricity with bidirectional counting for imported and exported energy, current, voltage, active and reactive power, power factor and other electrical parameters. The 3 available measurement circuits are for connection via external current transformers (CTs) and can also be used as independent single-phase circuits.

The device is equipped with an integrated communication module for the KNX bus. The meter provides electrical parameters on the KNX bus, has total/partial counters, comparators and other logic functions, and can be configured via ETS for integration into the energy management system with functions such as load control or threshold monitoring. The device is designed for mounting on a DIN rail in accordance with EN 60715 inside electrical panels and cabinets.

Features

- OLED display for displaying measured and diagnostic information
- Bidirectional measurement of electrical parameters for single-phase and three phase circuits
- Connection of measuring circuits to current transformers via screw terminals with cable cross-sections up to 4 mm
- Accuracy better than 2%
- Connection to bus line via KNX terminal
- 4 UM modular plastic housing (1 UM = 18 mm)

Technical data

- Nominal voltage Un: 3x230/400 V AC (+/- 20%)
- Nominal frequency fn: 50 Hz
- Current transformers from I_{max} 5 A up to I_{max} 120 A (not included in the supply)

Supply

The supply includes a terminal for connection to the KNX bus line. To be completed with EK-MST-...A current transformers, ordered separately.

KNX single-phase secondary electricity meter

METERING

Description

The EK-MS2-TP-TA device has 2 independent measurement channels via external current transformers (CT) and is suitable for measuring single-phase power lines (230 Vac, 50-60 Hz). The flush-mounted box mounting is made in a compact case with the possibility of mounting on a 35 mm DIN rail (EN 60715) using a special adapter included in the supply.

Features

- Bidirectional measurement of electrical parameters for single-phase circuits
- Connection of measuring circuits to current transformers via screw terminals
- Accuracy better than 2%
- Connection to bus line via KNX terminal
- Up to 2 independent measuring circuits available
- Plastic housing

Technical data

- Supply voltage: 230 V AC
- Rated frequency fn: 50 Hz
- Current transformers from I_{max} 5 A up to I_{max} 120 A (not included in delivery)
- Current consumption from bus < 10 mA

Dimensions [mm]

Documentation

For more information see the technical documentation,
download from www.ekinex.com

Description

Current transformer (CT) to be used in combination with the ekinex submeter EK-MS2-TP-TA.

Features

- Plastic housing
- Ferrite core
- 1.5 m connecting cable with free terminals
- Openable for easy installation

Technical data

- For indoor use
- Applicable cable specifications: 10mm for EK-MST-5A, EK-MST-20A, EK-MST-60A, 16mm for EK-MST-120A
- Nylon housing, UL94-V0 classification
- Black and white double wire
- Class 05
- Voltage level: 0.4/0.66/0.72kV
- Withstand voltage level: 2kV/1mA/1min
- Rated frequency: 50/60Hz
- Operating temperature: -40...+55°C
- Weight: 48...93g

Versions

- EK-MST-5A: Primary 0-5A / ratio 1000 to secondary (5A-5mA)
- EK-MST-20A: Primary 0-20A / ratio 1000 to secondary (20A-20mA)
- EK-MST-60A: Primary 0-60A / ratio 3000 to secondary (60A-20mA)
- EK-MST-120A: Primary 0-120A / ratio 3000 to secondary (120A-40mA)

Power transformer for secondary electricity meter

METERING

Connections

The current transformer is equipped with a two-conductor connection cable of 1.0 m length with free terminals. The cable can not be extended.

Dimensions [mm]

- EK-MST-5A / EK-MST-20A / EK-MST-60A

- EK-MST-120A

Three-phase MID electricity meter 75A

METERING

Description

Three-phase MID energy meter for active and reactive energy measurement with bi-directional metering for imported and exported energy, current (A), voltage (V), active power (kW), reactive power (kVAR), power factor and other electrical parameters. Direct connection up to 75 A. The device has an integrated communication module to the KNX bus.

The meter has four SO pulse outputs for the transmission of imported and exported active and reactive energy data, which can alternatively be used for load control functions or for threshold monitoring of a maximum value. The device enables two- or four-rate system management with switching of the active rate via a 230 Vac signal. Protection against manipulation is provided by sealable terminal covers. The device is designed for DIN rail mounting according to EN 60715 inside switchboards and control cabinets.

Functions

- Display: graphic 60x30 mm LCD backlit
- Optical interface DO: according to EN 62056-21
- Communication interface: KNX TP
- KNX configuration: via ETS software
- Metrological LED: 10 pulses / Wh
- Pulse output: Opto Power MOSFET SO for heavy-duty applications, 5-230 Vac or Vdc, max 90 mA
- Pulse setting (frequency, length)
- Accuracy class: B (1%)
- Environmental class: mechanic: M1, electromagnetic: E1
- Safety class: 2
- Marks: KNX, CE, MID (B+D)
- Device housing: modular 5 MU (1 MU = 18 mm)
- Degree of protection: IP51 (housing), IP20 (terminals)
- Dimensions (LxHxD): 90 x 90 x 67 mm

Technical data

Power supply

- Rated voltage Un: 3x230 / 400V (+/- 20%)
- Rated frequency fn: 50 Hz, 60 Hz on request

Voltage

- Direct connection: (Ist, Imin, Itr, Iref, Imax) 0.02 A / 0.25 A / 0.5 A / 5 A / 75 A (5(75))

Dimensions [mm]

Order information		
Code	Application	Package
EK-MST-5A	Power transformer for secondary electricity meter Primary 0-5A / ratio 1000 to secondary (5A-5mA)	1
EK-MST-20A	Power transformer for secondary electricity meter Primary 0-20A / ratio 1000 to secondary (20A-20mA)	1
EK-MST-60A	Power transformer for secondary electricity meter Primary 0-60A / ratio 3000 to secondary (60A-20mA)	1
EK-MST-120A	Power transformer for secondary electricity meter Primary 0-120A / ratio 3000 to secondary (120A-40mA)	1

Three-phase MID electricity meter 5A

METERING

Description
Three-phase MID energy meter for active and reactive energy measurement with bi-directional metering for imported and exported energy, current (A), voltage (V), active power (kW), reactive power (kVAr), power factor and other electrical parameters. Connection via current transformers (CT). The device has an integrated communication module to the KNX bus.

The meter has four SO pulse outputs for the transmission of imported and exported active and reactive energy data, which can alternatively be used for load control functions or for threshold monitoring of a maximum value. The device enables two- or four-tariff system management with switching of the active rate via a 230 Vac signal. Protection against manipulation is provided by sealable terminal covers. The device is designed for DIN rail mounting according to EN 60715 inside switchboards and control cabinets.

- Functions**
- Display: graphic 60x30 mm LCD backlight
 - Optical interface D0: according to EN 62056-21
 - Communication interface: KNX TP
 - KNX configuration: via ETS software
 - Metrological LED: 10 pulses / Wh
 - Pulse output: Opto Power MOSFET SO for heavy-duty applications, 5-230 Vac or Vdc, max 90 mA
 - Pulse setting (frequency, length)
 - Accuracy class: B (1%)
 - Environmental class: mechanic: M1, electromagnetic: E1
 - Safety class: 2
 - Marks: KNX, CE, MID (B+D)
 - Device housing: modular 5 MU (1 MU = 18 mm)
 - Degree of protection: IP51 (housing), IP20 (terminals)
 - Dimensions (LxHxD): 90 x 90 x 67 mm

- Technical data**
Power supply
- Rated voltage Un: 3x230 / 400V (+/- 20%)
 - Rated frequency fn: 50 Hz, 60 Hz a richiesta

- Voltage
Current transformer /5A and /1A:
- /5A (Ist, Imin, Itr, Iref, Imax) 0.01 A / 0.05 A / 0.25 A / 5 A / 6 A (5(6))
 - /1A (Ist, Imin, Itr, Iref, Imax) 0.002 A / 0.01 A / 0.05 A / 1 A / 1.2 A (1(1.2))

Description
Terminal block for the connection of KNX bus lines or SELV auxiliary power supply. It allows the connection of max. 4 pairs of wires. To be used also as distribution terminal in wall boxes.

- Colour coding**
- EK-MNR-TP: red = + (positive), black = - (negative)
 - EK-MGB-TP: yellow = + (positive), white = - (negative)

- Main features**
- 4 plug-in seats for each polarity
 - Fast spring connection
 - Suitable for solid wire diameter 0,6÷0,8 mm
 - Mechanical coding for terminal block housing on devices
 - Wire strip length (advised) 5-6 mm

Order information			
Code	Colour coding	Use	Package
EK-MNR-TP	red/black	bus connection	50
EK-MGB-TP	yellow/white	SELV connection	50

Description
The bus cable LSHF (Low Smoke Halogen Free) is a twisted pair cable for the connection of KNX bus devices and the derivation of KNX bus lines. It is available with a single pair of wires with a diameter of 0.8 mm. Screen in aluminium foil. For use in dry interior.

- Main features**
- Cable for KNX based applications (TP)
 - Single pair of wires Ø 0,8 mm
 - Black/red wires for KNX bus line connection
 - Yellow/white wires for auxiliary SELV or spare power supply

Order information			
Code	Type	Use	Package [m]
EK-112-TP	1 x 2 x 0,8	bus connection	100
EK-114-TP	2 x 2 x 0,8	bus connection and spare pair	100
EK-512-TP	1 x 2 x 0,8	bus connection	500
EK-514-TP	2 x 2 x 0,8	bus connection and spare pair	500

Terminal blocks

ACCESSORIES

- Technical data**
- Nominal voltage 100 V
 - Nominal current 6 A

Delivery
Package of 50 pieces.

Note
A terminal block for the connection of KNX bus line (EK-MNR-TP) is supplied with every Ekinex® device.

Bus cable

ACCESSORIES

- Technical data**
- Nominal voltage: 50 V
 - Test voltage: 4 kV

Delivery
100 m skein wrapped in cellophane or 500 m spool.

Delégo server	380
Delégo panel	382

Ekinex Delégo: the system

VISUALISATION

Delégo is a system for the visualisation and control of a KNX home automation system. Developed with web-oriented technologies, it has a uniform interface with high graphical impact on every platform, both desktop (PC) and mobile (Apple iOS and Android devices), with both local and remote connection. The system consists of a compact server (based on Linux operating system) to be installed in an electrical box: the device connects directly to the KNX bus via twisted pair; the connection to the home router is made via the Ethernet port on your local network (LAN).

The user can interact with the system either by means of mobile devices, or with one or more fixed stations, by means of Delégo panel a touch-panel with elegant and minimal design, for wall installation, connected via Ethernet port on its local network (LAN). The Delégo visualisation system is characterized by a simple and at the same time extremely complete configuration, thanks to the direct import of the ETS project file. The functional definition of the various imported domotic objects and the correspondence with a rich and customizable set of controls (widgets) for the user, is also very straightforward.

The renewed interface is simple and intuitive and allows the user to interact with the home automation system of his smarthome through the use of different devices, with absolute uniformity of use. The app allows you to remotely control lights, climate, automatisms, audio/video equipment, shutters and more with a simple touch, from a single device and from anywhere in the building reached by the Wi-Fi network, or remotely via web connection.

Renewed graphic interface

VISUALISATION

The redesigned visual interface can be accessed either via an app for smartphone and tablet (supported operating systems: Apple iOS and Android) or from a desktop PC workstation. All the devices can be interfaced with the server previously configured so that all the functions of the automation system can be controlled and viewed. The app, accessible from mobile devices (smartphones and tablets) or fixed devices (Delégo panel), is structured for the logical vision of the building, by areas or services. The visualisation with desktop PC also allows the visualization with synoptic: the plan of the space can be associated, following the physical location, with the set of available services.

VISUALIZATION BY AREAS

The app will display a list of configured areas, each identified by an image inserted in the web configurator during the commissioning phase:
In each area set through the web configurator (for example: living room, bedroom, kitchen) the user can choose whether to turn on or off the lights, or to change the settings of the room thermostat and other settings for each of the available features; Simple navigation between the different areas configured with a touch of the display.

VISUALIZATION BY SERVICES

The visualization of each area can be filtered through a toolbar that allows you to easily select the individual function available:

- Lighting
- Air conditioning
- Shading and motorized automations
- Scenarios

The app can be extended with the functions provided by the compatible video surveillance, intrusion detection and audio/video systems integrated in the Delégo server.

Simplified configuration and maintenance

VISUALISATION

Thanks to the web interface it is possible to program the system online and offline (without Delégo server connected), and thanks to the ETS' project file import tool, it is possible to quickly integrate all the group addresses used. The system also supports the incremental upgrade of the installation via subsequent imports.

The graphics of the widgets adapt automatically according to the KNX communication objects connected in the project. The remote connection of the Delégo server can be made either via port forwarding or via native cloud connection. Maintenance and support can thus be carried out quickly and with reduced running costs.

Complete versatility

VISUALISATION

Multiplatform

Delégo server can be managed by PC, MAC, Touch-PC, smartphone and tablet through a common Internet browser or with a free dedicated app (available for Apple devices and Android).

Customizable

the graphics and automatic functions of Delégo server can be easily modified according to your needs, accessing the web pages with your PC of administration.

Quick to configure

Delégo server proposes a set of ready-to-use functions typically used in the home automation supervisors and allows you to quickly import the structure of your own ETS building (KNX installation).

Multi-protocol

Delégo server can be connected directly to both the KNX bus in the twisted version pair, both to Modbus on RS485 network and via TCP/IP protocol via Ethernet port. Thanks to the multi-protocol management it is possible to connect intrusion detection systems, thermoregulation, multimedia systems and video surveillance.

Easy to install

Thanks to the size of only 2 modules on DIN rail, Delégo server can be easily installed directly into the electrical cabinet. The communication ports to the LAN, KNX bus and other technological subsystems do not require any additional external interfaces.

Reliable

The Delégo server is based on a Linux operating system that guarantees reliability and stability. of the platform for continuous use, as well as providing a high degree of safety on the net.

Also offline

It is possible to build the visualisation project even without being connected to the webserver, working in "offline" mode directly on your PC or MAC.

100% Made in Italy

Hardware and software are designed, manufactured, assembled and tested entirely in Italy, to guarantee the highest quality of the product and after-sales service competent and helpful.

Main features

VISUALISATION

SOFTWARE FEATURES

Standard technologies	KNX RS-485 / TCP / UDP configurable Modbus RTU/TCP	
User Interface	Web / HTMLS (All operating systems) Dedicated app (iOS I Android)	
Number of users	Unlimited without additional licenses	
Synchronized connections	Up to 20 (scalable on request)	
Technological systems	Lighting Heating / air conditioning Motorized doors and windows Irrigation Thermal power plant I thermoregulation Technical alarms Consumption and energy management Load control Weather control IP Cameras / IP Door phones Intrusion detection Audio/Video broadcasting	
Compatibility of operating systems	Microsoft Windows Apple Mac OSX Linux	Apple iOS Android

VISUALIZATION

Layout	Graphics scalable by resolution Automatic recognition of mobile devices Full support for touch and multi-touch devices	
Navigation	Personalized graphic pages Multi-level environment navigation Navigation by functions Summary popups for the most complex functions Always accessible and customizable menu	
Customization	Scenarios, Calendar schedules	
Notifications and messages	Notifications on screen, Email, Push notifications	
Cloud Services	Remote Accessibility, Weather Services, IFTTT	

SETUP AND CONFIGURATION

Configuration mode	Online Offline via free downloadable tool
Environment of configuration	Integrated search engine Navigation tree for access to all functions Drag & drop Multi-tab for multiple simultaneous configuration functions
Setup and maintenance	Network Date and time Backup / stay configuration via browser Language selection Graphic Themes Selection and Layout Customization Software update via browser
Environments / graphic pages	Grid layout and graphic map Customizable background images Custom Object Sorting/Placement
Advanced Functions	Scenarios with timings Logics Comparison of values and levels Mathematical operations Custom functions via scripting
Planning and calendar	Unlimited number of daily profiles for each object Weekly and annual profiles Configuration accessible by end user
Energy Management	Support for KNX network analyzers, ModBus Integrated load control function Graphical visualization of consumption and production Real-time load absorption display Automatic comparisons and consumption indicators
Voice Control	Amazon Alexa - Google Assistant
Users and security	Unlimited number of users Unlimited access Secure SSL access via internet

Description

Delégo server is the Ekinex visualisation system for KNX-based installations. It allows management of the functions in the building via Delégo Panels and through the Delégo APP, available free of charge on Apple and Google stores. Control can be done both locally and remotely via connection to the Ekinex Cloud. The graphics are customizable, suitable for any context and application, and optimized for viewing on both smartphones and tablets. Configuration of KNX functions is simplified and fast. The server offers the possibility of creating scenarios, time sequences, logics, conditions, mathematical operations, and time schedules through simple and intuitive graphical tools; it also allows the reporting of events and alarms as push notifications or via e-mail. Configuration is done via web pages directly by connecting to the server and requires no programming skills for customization. The server natively handles KNX, Modbus and Mbus protocols without the need for additional licenses.

- Local connection of Delégo Panels via Ethernet or Wi-Fi network
- Local connection of smartphones and tablets via WiFi network
- Remote connection of smartphones and tablets via direct connection of the server device to the Internet (with port forwarding) or via connection to the Ekinex cloud.
- Secure connection via TLS/SSL encryption
- Integration with Amazon's Alexa and Google Assistant voice assistants
- Option to display graphical maps of the installation
- Built-in web server for system configuration: automatic ETS project import, room configuration, logic processing functions (combinational functions, timings, mathematics, astronomical clock, ...)

Technical data

- **Dimensions:** 71x90x63 mm (LxHxP)
4UM DIN (1 UM=18mm)
- **Power supply:** POE or alternatively 12-24VDC
- **Power consumption:** 240 mA at 24V
- **Processor:** Quad-core
- **RAM:** 1Gb
- **Connections** LAN (RJ45) POE
2 pin RS485 (Terminal provided)
3 pin RS232 (Terminal provided)
USB 2.0
Micro SD Slot
- **LED** Power
Service/Reset

- **Degree of protection:** IP 20
- **Insulation Class:** II (according to EN 60335-1)
- **Operating Temperature:** +0°C ... +40°C
- **Storage Temperature:** -10°C ... +70°C

Delégo panel

VISUALISATION

Description

The touch-panels of the Delégo series are a must-have instrument for the management of the modern connected building. Through these you can control all the automation functions of the premises: lights, roller shutters, burglar alarm, climate control, building management, etc. energy saving and multimedia system.

Delégo touch-panels are available in two cuts, from 5” to 10” capacitive display, with black frame. The elegance of the minimalist design, the exceptional graphic of the HD display and the outstanding performances, make Delégo panel ideal for home, office, businesses, and any other area of installation. Possibility of customization through aluminium frame (5” version only).

Explore the new features of Delégo Panel

Delégo Panel has evolved to offer you an unparalleled management experience. With newly released features and graphical implementations, managing your business has never been so simple, intuitive, and powerful. Discover how Delégo Panel can transform your supervision system! Get ready to experience a new way of managing your smart home with Delégo Panel. Innovation, efficiency and simplicity: the future is here, and Delégo puts you in control.

Sentio

MULTIROOM AUDIO SYSTEM

A passion for design and music, materials, shapes, acoustic qualities and technology, this is the profile of Sentio. Streamer amplifiers, speakers, subwoofers available in different shapes and colours that can also be customised on request.

The Ekinex multi-room audio system is based on one or more amplifiers that receive the audio stream and transmit it directly to the speakers. Integration modes within the system (near or far from the speakers, playback of TV audio, etc.), single zone or multi-zone mode, and playback of different streaming music sources. Sentio offers easy-to-use audio streaming and speaker solutions with powerful, reliable and easy-to-integrate features. The range of speakers is completed with Ekinex models by Laboratorio Audio, a unique Italian company that has been involved in the high-end audio sector for 20 years. Laboratorio Audio manufactures all the devices in-house, creating unique objects that will stand the test of time. Selected materials, craftsmanship, maniacal attention to detail, and pushed technology all contribute decisively to the birth of these speakers of pure avant-garde design, passing through an audio revolution to arrive at an absolutely innovative realisation.

Streamer Amplifier 30W

MULTIROOM AUDIO SYSTEM

Description

EK-30S-AU is a Ethernet, WiFi and Bluetooth 5.0 stereo amplifier. Connecting EK-30S-AU to your current home audio system will enable you to stream music from your smart device, USB, NAS or online streaming services such as Spotify and many more using our free to download SENTIO APP, Airplay or DLNA apps. By adding multiple units to your home audio system, you can setup a ethernet or wireless multiroom whole house audio system, it will give you new and great experience to enjoy your favorite music.

Main features

- Streaming music via network without distance limitation or Bluetooth5.0 up to 15 meters.
- Bluetooth for true high resolution music.
- Spotify connect, AirËplay, Qplay, UPnP streaming protocols supported.
- Support streaming source from online services, smart device memory, USB pen drive, NAS, Bluetooth and line in.
- Multiroom and multizone streaming enabled by mutple units connected in same network.
- All music sources can be restreamed in sync to other models from us.
- Airplay, Spotify Connect, Qplay, DLNA, UPnP protocol compatible.
- High quality music streaming support, sample rate decoding up to 24bit, 192kHz.
- Spotify, Tidal, Amazon Music, Tuneln, Internet Radio, lots of online streaming services integrated to use in the app.
- Free iOS and Android app available.
- Free global online update for new features.
- Full function remote controller to use without mobile device. Line input for more possible external audio input.
- EQ adjustment via app or remote controller.
- Preset playlist available for quick access, shortcut pushbuttons on remote controller for quick access.
- iTunes working with PC streaming.

Technical data

- Wireless network: IEEE802.11 b/g/n 2.4G
- Ethernet: Single 10/100M RJ45
- Bluetooth: 5.0
- USB Host: Play USB music
- Micro USB: Connect PC as external DAC
- Power Input: 18V/4A
- Audio Input: 3.5mm Line in
- Frequency response: 20Hz to 20kHz
- Speaker Power: 2x35W@4Ω load at 18V, 2x18W@8Ω load at 18V
- THD+N: 0,03% a 1kHz
- Speaker Impedance: 4-8ohms
- Music Format: FLAC/MP3/AAC/AAC+/ALAC/APE/WAV
- Decoding: Up to 24bit/192kHz
- Protocols: AirPlay, DLNA, UPnP, Spotify Connect
- Dimensions: 131,8 mm*85,5 mm*27 mm (5.18in*3.37in*1.06in)
- Weight: 0,35 kg (0,77 lb)

Delivery

Delivery includes a remote control for controlling the main functions

Order information	
Code	Package
EK-30S-AU	1 pcs.

Configuration and commissioning

Installation, electrical connection, configuration and commissioning of the device can only be carried out by qualified personnel. Opening the housing of the device causes the immediate end of the warranty period.

Streamer amplifier 50Wx2

MULTIROOM AUDIO SYSTEM

Description

EK-50S-AU is a WiFi and Bluetooth 5.0 stereo amplifier. Adding EK-50S-AU to your current stereo system will enable you to stream music from your smart device, USB, NAS or streaming services, such as Spotify, Tidal, Deezer, Qobuz, Amazon Music and others by 4STREAM App, AirPlay2, Bluetooth or other DLNA apps. Adding more units to your home audio system can set up a wireless multiroom or multizone whole house audio system, it will give you totally new and great experience to play and enjoy your music.

Main features

- 50Wx2CH@4ohm, 30Wx2CH@8ohm full digital amplifier.
- Streaming music via network without distance limitation or Bluetooth5.0 up to 15 meters.
- Bluetooth for true high resolution music.
- Spotify connect, Tidal connect, Airplay2, Qplay, DLNA, UPnP streaming protocols supported.
- Support streaming audio source from online services, mobile phones & pads, USB disk drive, NAS, Bluetooth, Line input and Optical input.
- Multiroom and multizone streaming enabled by mutple units connected in same network.
- All music sources can be restreamed in sync to other models from us.
- High quality music streaming support, sample rate decoding up to 24bit, 192kHz.
- Sportify, Deezer, Tidal, Qobuz, Amazon Music, Napster, Pandora, Internet Radio, iHeartRadio, Tuneln, QQMusic, lots of online streaming services integrated to use in the app.
- Free iOS and Android app available.
- Free global online update for new features.
- Full functional remote controller to use without mobile devices.
- Line input and Optical input for more external audio input.
- EQ adjustment via app or remote controller.
- Preset playlist is availble and short pushbuttons on remote controller for one button play.

Streaming amplifier 50Wx8
MULTIROOM AUDIO SYSTEM

Description

EK-50Q-AU is a multi-room system that enables you to enjoy your favorite music anywhere in your home. EK-50Q-AU contains 4 audio amplifiers for you to connect to 4 set of stereo speakers. Each zone also contains analogue and digital audio outputs for you to use as audio source. You can easily play music from online music services, your phone storage, NAS and other sources by using the 4Stream app on your iOS or Android device.

Main features

- **Amplification:** Each zone can provide 50Wx2@8ohms (stereo mode) or 100W@4ohms (bridge mode).
- **Multi-room audio function:** Play different songs in different rooms or same song in every room.
- **Easy network setup:** Connect to your home network and it is ready to use.
- Rich I/O interface: Each zone has separate digital input/output and analogue input/output. There is also a master source input that all zones can used at the same time.

System Requirements

- **High Speed Internet Connection:** EK-50Q-AU needs internet connection to stream music from online music services and to get online firmware updates. You may experience performance issues with slower internet connections.
- **Wireless Router:** In order to use EK-50Q-AU, you will need to have a working Wi-Fi network in your home, since the control APP on your mobile device need to be in the same network as the streamer.

Delivery

Delivery includes a remote control for controlling the main functions

SENTIO APP CONFIGURATION

Adding devices

The Sentio app allows new audio zones to be added to the system very easily, through a wizard accessible directly from the main screen.

SENTIO APP CONFIGURATION

Source selection

It is possible at any time to quickly change the music source for a zone, or a group of zones, by pressing the SOURCE symbol in the toolbar at the bottom. Music can be played from a local source connected to the device, or from a streaming service accessible via a Wi-Fi network.

SENTIO APP CONFIGURATION

Zone player

By pressing on the name of a zone, in addition to the basic controls already available on the main screen, it is possible to have full control over playback, switching to the next track, or adjusting the scrolling mode between the contents of the current playlist (random play or repeat).

SENTIO APP CONFIGURATION

Zone groupship

By pressing the grouping symbol on a zone, you can easily connect other devices to play the same music source simultaneously in several rooms. By repeating the same operation, it is possible to change the composition of the zone group, or return to independent operation of each device.

SENTIO APP CONFIGURATION

Zone management

The app's main screen allows you to control all the zones of the sound system at a glance. By selecting a zone, you can know what content is playing, adjust the volume, and easily control playback.

SENTIO APP CONFIGURATION

Equaliser

The Equaliser screen allows you to adjust the amplitude of the different sound frequencies in an audio signal. It is possible to modify the frequency response of an audio system to suit the listener's preferences or the acoustic characteristics of the room.

Description

The Ekinex Home Audio Speaker EK-SP30.2-AU offers a unique combination of sleek ascetic design and high performance sound quality, Its small footprint allows for easy system integration without compromising on sound quality or performance IP66 Weather Resistant rating allows for Indoor/Outdoor applications making it one of the most versatile Home/Commercial Audio speakers available.

Main features

- When the speakers are installed on the walls, ensure the wall structure is reliable and that the speakers are firmly attached.
- Install the speaker in a location that can structurally support the weight of the speaker and its mounting hardware. otherwise it may result in the unit falling down and causing personal injury.
- Do not use nails, adhesives or other unauthorized devices long-term use and vibrations may cause it to fall easily.
- Do not touch or bump the woofer and tweeter. If these are damaged, the sound will be distorted.
- Lower the volume of the device and source unit when changing the input source. (i.e. To tune fm / cd).
- Turn off the device and source unit when installing or removing cables.

Speaker Q series

MULTIROOM AUDIO SYSTEM

Ekinex by laboratorioaudio

Description

Small, modern, minimalist, with acoustic and technological content of high quality. A nice project.

Q10

Wall version or in-wall version, Q10 is the smallest speaker manufactured. This is not a reason to underestimate it, and in fact it boasts a warm and compact sound. It suits a variety of uses both outdoor and indoor.

Q15

Almost invisible, Q15 can be in-wall, book-shelves/to be leant, or on wall. The aesthetic result meets the expectations of the most rigorous needs. Sound and design are the best marks of this small object, bringing sound to any rooms without being noticed, but it can involve the listeners so much.

Speaker R series

MULTIROOM AUDIO SYSTEM
Ekinex by laboratorioaudio

Description

To relive the fantastic design of the '60s with contemporary technological solutions. Deriving from the consolidated series Q20, it differs from it having softer lines with rounded edges, reminding of the beautiful '60s, while maintaining excellent performance. Available in the same finishings as the Q20. Series R20K: designed to impress and satisfy an expert audience, using advanced technology, with a refined and sober design. They reproduce the entire audio range, up to lower frequencies, with a soundstage and a deep sound image without compromises.

MULTIROOM AUDIO SYSTEM

Description

The KNX-Sentio Gateway allows one or more multi-room audio devices from the SENTIO range to be integrated with KNX technology, acting as an interface to other KNX devices. The KNX-Sentio Gateway automatically detects the zones of the audio system in the network, and allows for each of them, a set of KNX group addresses to receive status information on the bus and send the following commands:

Main features

- Volume adjustment (both via percentage and increase/decrease commands)
- Highs and lows (both via percentage and increase/decrease commands)
- Play/Pause
- Mute
- Previous/next track advancement
- Setting Repeat and/or Random Play
- Preset / source selection (either by direct selection or by previous / next scrolling)

Information about the artist and the track being played is also sent on the KNX bus. The KNX-Sentio Gateway is particularly suitable for operating the Sentio system from Signum control panels, via their audio control page.

Technical data

- 12-24 Vdc power supply (absorption 240 mA at 12 Vdc) by means of a special plug-in terminal supplied. Power supply not included
- KNX TP bus (twisted pair) via red-black terminal provided
- 1 Ethernet port via cat. 5 or higher cable and standard RJ45 connector
- 2 frontal LEDs: POWER LED for signalling the presence of power supply; SERVICE LED for signalling particular operations in progress.
- 1 RESET button housed under the front cover on the back of the vertical card
- 1 RS485 port: not used
- 1 USB 2.0 port: not used

Invisible Player
MULTIROOM AUDIO SYSTEM

Invisible Player transforms the walls of your home or office into powerful sound diffusers. Thanks to its revolutionary acoustic technology, every surface becomes an instrument that vibrates and spreads music, creating an enveloping and unique sound experience.

No longer just speakers: it is your environment that plays, creating spaces that interact with you in surprising ways. Let yourself be enveloped by sound like never before and discover a new way of experiencing audio.

A new way of experiencing and perceiving sound

INVISIBLE PLAYER

In the graph on the bottom left, we can observe the sensitivity of the human ear to different frequencies when the volume is low: the highest and lowest tones are less perceptible, while the middle frequencies are more easily heard.

To the right is the curve that inspired the frequency response of the Acoustic energy transmitters. This innovative system acts as a 'physiological volume compensator', automatically adapting the sound to ensure balanced and natural listening at any volume level, making every acoustic detail perfectly perceptible and improving listening comfort.

Invisible Player redefines the sound experience by transforming surfaces made of plasterboard, wood, Plexiglas, glass, e-bond, metal and many other materials into extraordinary acoustic speakers. Thanks to advanced technology, **it creates a flat, directive and homogenous sound wave**, covering a wide frequency spectrum (40 to 16,000 Hz depending on the material), with limited angular dispersion. The result? **A sound that remains perfectly in phase in every corner of the room**, offering a listening experience that is uniform and perfectly tuned to the sensitivity of the human ear.

Unlike conventional audio systems, where the sound changes drastically depending on the listener's position, Invisible Player **guarantees constant volume and clear sound wherever you are**. Whether you are close to the sound source or at the opposite end of the room, the quality remains impeccable, eliminating those annoying inconveniences of excessive volume or unclear sound.

Perfect for complex environments such as offices, museums, meeting rooms, churches and shops, Invisible Player delivers smooth, intelligible sound, even at low power, **guaranteeing superior listening comfort**. Its versatility also makes it ideal for unexpected applications: it can be integrated into furniture such as kitchens, wardrobes, armchairs, mirrors, saunas and even swimming pools, transforming the objects themselves into sound speakers.

Invisible DRYWALL

INVISIBLE PLAYER

Description

Invisible DRYWALL is a top-quality acoustic energy transmitter designed to deliver outstanding performance and invisible sound transmission. Made from premium materials such as AW 6082 aluminum, chosen for its balance of precision, wear resistance through anodizing, and excellent heat dissipation, it ensures durability and reliability. Four internal nylon and steel suspensions ensure stability and flexibility over time, while triple thermal and electrical protection inside prevents failures, increasing operational safety. Optimized for installation on walls or plasterboard ceilings up to 16mm thick, Invisible DRYWALL covers up to 80 square meters per single transmitter. For installations on vertical walls, the EK-VFX-AU accessory (purchased separately) provides fixation and durability while maintaining the necessary elasticity. The completely invisible installation matches perfectly with the EK-PW1-AU amplifier, specifically designed to maximize system performance.

Main features

- Impedance: 4 Ω
- Frequency response: 40 - 14,000 hz nominal
- Maximum power: 120 w
- Maximum power - RMS: 40 w
- Height: 46 mm
- Diameter: 57 mm
- Square contact plate: 80 mm per side
- Weight: 330 g
- Color: Light bronze

Invisible WOOD

INVISIBLE PLAYER

Description

Invisible WOOD is an acoustic energy transmitter made from the highest quality materials. The AW 6082 aluminum body provides the best compromise between precision machining, anodization to prevent degradation over time, and effective heat dissipation. The four internal suspensions, made of nylon and steel, contribute to its durability and strength, while the triple internal protection, both thermal and electrical, prevents failures. Invisible WOOD is designed and optimized for excellent performance on wood surfaces with thicknesses between 18 mm and 25 mm, depending on the type of wood. However, it is not suitable for ground- or wall-anchored surfaces, such as parquet or solid glued siding. A small back gap, even a few millimeters, is required for proper operation. Invisible WOOD can also be installed on other materials such as E-bond, T-bond, plexiglass, lexan and fiberglass, with a maximum thickness of 12 mm. For optimal performance, we recommend pairing it with the EK-PW1-AU amplifier, designed specifically for its characteristics.

Main features

- Impedance: 4 Ω
- Frequency response: 40 - 14,000 hz nominal
- Maximum power: 120 w
- Maximum power - RMS: 40 w
- Height: 46 mm
- Diameter: 57 mm
- Contact plate diameter: 83 mm
- Weight: 310 g
- Color: Orange

Description

Invisible GLASS is an acoustic energy transmitter made from the highest quality materials, designed to deliver excellent audio performance on glass surfaces. The AW 6082 aluminum body provides the perfect balance of precision workmanship, anodization for durability, and optimal heat dissipation. Internal nylon and steel suspensions, combined with triple thermal and electrical protection, ensure long life and protection against failure. Invisible GLASS is specially designed to transmit sound through glass walls, making store or business windows capable of emitting music or promotional messages both inside and outside the premises. In addition to glass, Invisible GLASS can be installed on non-porous materials such as E-bond, T-bond, plexiglass, lexan and fiberglass, with a maximum thickness of 12 mm. For a perfect installation, the EK-CGL-AU Coverglass accessory (not included) is available, which allows Invisible GLASS to be fixed at the right distance from the edge of the display case and hide the cable elegantly and discreetly. For maximum performance, we recommend combining Invisible GLASS with the specially designed EK-PW1-AU amplifier.

Main features

- Impedance: 4 Ω
- Frequency response: 40 - 14,000 hz nominal
- Maximum power: 120 w
- Maximum power - RMS: 40 w
- Height: 46 mm
- Diameter: 57 mm

Description

Invisible TWIN represents the cutting edge of our acoustic energy transmitters. Designed to improve response in both low and high frequencies, it provides increased power, dynamics and sonic accuracy. Also ideal for audio-video systems, with a nominal impedance of 8Ω, Invisible TWIN facilitates the operation of commercial AV receivers by reducing operating temperatures and improving efficiency. Made of the highest quality materials, the base is 3 mm thick AISI 304 stainless steel, while the bodies of the two transmitters are AW 6082 aluminum, known for its balance of workability and strength, thanks in part to anodizing that prevents degradation over time and improves heat dissipation. The eight internal nylon and steel suspensions, together with dual thermal and electrical protections, ensure long service life and reliability. Invisible TWIN takes advantage of the characteristics of a wide range of materials to which it can be applied, such as plasterboard, wood, glass, e-bond, plexiglass, fiberglass and carbon fiber, aluminum, and many others. It can reproduce audio signals either omnidirectionally or directionally, depending on the installation (more information on our website). The two integrated transmitters are different but complementary, optimized to provide a superior audio experience. Listening tests, conducted with in-wall plasterboard back-boxes (available soon as accessories), showed amazing performance, outperforming conventional listening systems. Invisible TWIN offers a frequency response extending from 40 Hz up to 15,000 Hz, ensuring exceptional sound quality tested at every stage of the production process. The completely invisible installation matches perfectly with the EK-PW1-AU amplifier, specifically designed to maximize system performance.

Main features

- Impedance: 8 Ω
- Frequency response: 40 - 15,000 hz nominal
- Maximum power: 240 w
- Maximum power - RMS: 80 w
- Height: 46 mm
- Contact plate diameter: 160 x 80 mm
- Weight: 880 g
- Color: Red and Gray

Amplificatore POWER 1

INVISIBLE PLAYER

Description

Power 1 is an extremely versatile and powerful amplifier designed to deliver high performance. With an output of 200 watts RMS on 4Ω in mono mode or 80 watts RMS on 4Ω on two channels in stereo mode, it is ideal for handling 1, 2, 4 or 8 Invisible Player acoustic energy transmitters. Equipped with both low-level and high-level inputs, Power 1 provides maximum flexibility of use. With a high-pass and low-pass filter, it eliminates unwanted frequencies below or above 50Hz, optimizing sound quality. It is specifically optimized for use with acoustic energy transmitters, ensuring flawless performance. The amplifier comes with the power supply, which is essential for system performance by operating on both AC (90-260V) and DC (120-370V).

Main features

- Power supply: 10÷16 volts
- Absorption: 10 A
- Frequency response: 20 - 20 000 Hz nominal
- Power 2ch @ 4Ω : 80 W x 2
- 2ch @ 2Ω power: 100W x 2
- Power 1 channel @ 4Ω : 200 W
- Filter: PB and PA 50 Hz
- Height: 30 mm
- Width: 80 mm
- Length: 70 mm
- Weight: 0.31 kg
- Colour: anodised silver

Description

Invisible Player Demo is the ideal tool for installers and authorized dealers who want to demonstrate the extraordinary potential of invisible audio products in a practical and immediate way. Stylish and sturdy, this shockproof case houses everything needed for spectacular demonstrations: from the Invisible Wood acoustic energy transmitter, perfect for testing on wood, glass and composite materials, to the Invisible Drywall transmitter, specifically for drywall. Together with the powerful Power BT amplifier with Bluetooth module, power supply and pre-wired cables, you have everything you need to turn any surface into a speaker.

Invisible Player DEMO

INVISIBLE PLAYER

Demonstrating is simple: connect a device (smartphone, tablet or PC) to Power BT's Bluetooth module, recognizable as an "idea," with no password required. Once paired, you pick up the Invisible Wood transmitter and, with music playing at low volume, place it on the surface to be sonORIZED. The magic is accomplished: sound explodes powerfully, transforming what is invisible into an extraordinary sound experience.

MULTIPLE ACCESS CONTROL MANAGEMENT

Facial Recognition

DICO integrates a powerful facial recognition system, based on biometric data stored within the device (no cloud calls). Biometric profiles are anonymised in full compliance with privacy and GDPR directives. Faces can be stored by uploading a simple photo to the local configuration web interface, or through a learning procedure.

When a face is recognised, DICO can close its integrated relay, and also send a request to Delégo to perform other operations such as KNX auxiliary commands or scenarios.

MULTIPLE ACCESS CONTROL MANAGEMENT

QR code reading

DICO can also enable access via a previously generated and authorised QR code. In this way, it is possible to conveniently grant access for a certain period to occasional guests, without the need to store their biometric data and/or share their code numbers.

MULTIPLE ACCESS CONTROL MANAGEMENT

Virtual Keyboard

DICO allows access to controlled accesses by entering a numerical PIN code, directly on the display. In the future, it may be integrated into the MyWay access control system on Delégo.

MULTIPLE ACCESS CONTROL MANAGEMENT

Multi-apartment and multi-tenant management

The Dico video door entry system lends itself perfectly to multi-apartment residential building management, even of large size, as well as tertiary and multi-tenant installations. The graphic interface can be customised to display:

The direct list of tenants (in flat mode), typically used in apartment buildings. The list of companies, with a sub-page dedicated to the interiors of each company, typically used in multi-tenant buildings.

The optional screen saver mode can display e.g. a static logo, individual company logos in rotation, or the building address.

MULTIPLE ACCESS CONTROL MANAGEMENT

NFC technology

DICO can also enable access via RFID cards or 13.56 MHz proximity cards. In the future, this function may be integrated into the MyWay access control system on Delégo.

MULTIPLE ACCESS CONTROL MANAGEMENT

Using via App

The DICO app can be used both by installers, to configure a system equipped with one or more video door phones and to establish the rules for forwarding calls to the different flats, and by end users, to receive calls when they are not inside the building, and to monitor their video door phones remotely, including consulting the call and access history.

Dico

IP DOOR PHONE

The Dico IP door phone is a secure and affordable commercial-grade device for both intercom and for access control.

Dico is an IP outdoor door phone based on the SIP standard, which is fully integrated with the Delégo visualisation system and can operate completely autonomously within the customer’s home network. It is a fully touch product, with no physical pushbuttons, and thanks to integration with the Ekinex cloud and the Delégo app, it is possible to receive video calls wherever you are (feature available in Q1 2024).

Many functions in one device: Dico is not just a simple video IP Door phone. It manages a multiple access control system through facial recognition, virtual keypad, QR code reading, and NFC technology. The innovative touch screen compared to market standards (physical pushbuttons) also allows for extremely high configuration flexibility and can be wall-mounted or flush-mounted using the special cover with mounting box.

With the latest deep learning algorithm and dual camera motion detection technology, EK-5DP-VI can be used for residential and commercial applications to realize intelligent access control.

Dico

IP DOOR PHONE

Description

IP Door phone offering excellent intercom-type communication and flexible access control methods such as facial recognition based on artificial intelligence and controllable by the mobile app. It can be used in commercial and community applications to implement smart, fast, secure and reliable access control by integrating with various third-party devices such as attendance and visitor management systems.

Technical data

- 5" IPS LCD touch screen display
- 1280 x 720 pixel resolution
- 2M pixel dual-lens camera, WDR
- Input/output relays: 1 / 1
- Ethernet port RJ45, 10/100Mbps adaptive
- Power Supply 802.3af Power-over-Ethernet
- 12 Vdc power supply (if not using PoE)
- Max. current consumption 380 mA
- Tamper (tamper) supported

Recommended cable length depending on section for installation with 12V - 1.5 A power supply:

- ≤ 30m for section 20 AWG
- ≤ 20m for section 22 AWG
- ≤ 15m for section 23 AWG

Recommended cable length depending on section for installation with 12V - 1.0 A power supply:

- ≤ 20m for section 20 AWG
- ≤ 10m for section 22 AWG

Functions / Features

- Protection IP65
- Relative humidity of the installation environment: 10-90% non-condensing
- Operating temperature: -20°C to +55°C
- Dimensions (WxHxD): 192 x 88 x 27,5 mm
- Weight (assembled product): 600 g
- Flexible authentication: mobile app, facial recognition, NFC, QR codes, PIN codes, IC card (contactless smart card)
- 1 output relay for door opener
- Visible light facial recognition
- Dual cameras with anti-spoofing algorithm against photo and video forgery
- Storage of up to 20.000 images and 20.000 cards
- Facial recognition speed of less than 0,2 seconds/user
- Facial recognition accuracy rate of more than 99,7%
- Allows audio and video communication with an IP phone, Delégo App or Delégo Panel
- Multiple verification methods including: face, PIN, NFC, RFID cards and QR codes
- Configuration via web browser
- Touch screen user interface with simplified navigation
- Excellent voice intelligibility in any situation, even noisy ones
- Easy installation requiring only power, internet and door opener
- Space-saving 5" design perfect for narrow door frames

Dico Security Relay

IP DOOR PHONE

Description

The Dico Security Relay provides secure door control via encrypted communication when combined with other Ekinex devices. The module with ultra-compact form, easily placed in most standard installation boxes, is installed on the secure side of the door. If anyone attempts to dismount or vandalize the station, SR1 cuts the connection to the door strike and the door remains securely locked.

Functions / Features

- Environment: Indoor
- Casing: Plastic
- Dimensions: 31x56x24mm
- Mounting: Fits in standard installation boxes
- Working Humidity: 10 ~ 90%
- Working Temperature: 20°C ~ +60°C
- Relay Out: 1
- RS485: 1
- Input: 1
- Button: 1, for pairing
- Indicator: 2
- Power In: 1,12V/100mA (Min.)

LIFT TV

Under Bed Lift TV	456
Up & Down Lift TV	457

Revélo

LIFT TV

We love to watch our favourite series, sporting events, the news as soon as we wake up, but we only want to see TV when needed. That is why we have created a series of Made in Italy lifts that help you to better arrange your space, giving you the opportunity to hide the TV when it is not in use.

Product range

Revélo
Lift TV

Under Bed Lift TV Up & Down Lift TV Up & Down Lift TV - XL

Revélo

LIFT TV

Would you hide a beautiful view to make room for a TV? The room gains in space, usability and order, and you don't miss out on the view of your favourite scenery.

The need for better space management, combined with the minimalist design of a certain type of furniture, are two aspects that cannot be overlooked. The presence of elements such as TVs or monitors can be intrusive within a room. This gives rise to the need to conceal these devices when they are not in use.

Under Bed Lift TV. In your room, a space under the bed is enough to make the TV disappear after viewing. But not only that. Lack of fitted walls or unalterable furniture can make it difficult or aesthetically disharmonious to install a TV. Furthermore, thanks to the very high definition of 4K and 8K panels, only 170 cm is needed for optimal viewing from a 48" TV. Why mount it on a wall?

Up & Down Lift TV. The perfect combination of aesthetics, versatility and space functionality. The Up & Down line of retractable TV lifts integrates inside your furniture, adapting to any type of residential, hotel, naval or tertiary environment. Available in two versions (standard and XL) to accommodate monitors and TVs up to 65".

Description

The EK-BTV-BL TV lift is designed and constructed to move a TV set under the bed. The product in the resting state is placed under the bed; by operating a wired control, the sliding motorised lift brings the TV set into the in-use state. The transition between the two states of rest/use takes place by means of three movements actuated by three electric motors:

Horizontal translation (the TV comes out from under the bed);

Rotation (the TV is brought to a vertical position);

Lifting (the TV is raised to the height pre-set during installation).

Technical data

- Dimensions in rest position (without TV) 1574 x 680 x 221 mm
- Maximum dimensions (without TV) 1930 x 680 x 1740 mm
- Mass (without TV) 80 kg
- Cycle time 25-28 s

Power supply

- Voltage 230 V ± 10%
- Frequency 50 Hz ± 2%
- Current 1.6 A
- Total installed power 150 W
- Required protection IP20

Technical data - Television

- Minimum screen size 32"
- Maximum screen size 55"
- Minimum space between TV and bed frame above 50 mm
- Maximum weight 25 kg

- Silent movement
- Wired control for actuating horizontal travel, rotation, lifting movements
- Infrared laser photoelectric sensors with light/dark pulse
- Approval in accordance with EN 60335-1 and UL 962
- Easily removable cover panels for TV cabling
- Compatible with Sky Glass
- For optimal viewing angle we recommend 48" TVs

Documentation

For more information see the technical documentation, download from www.ekinex.com

Description

The TV lift EK-LTV-BL / EK-LTV-XL-BL is a mechanism designed and constructed to move a concealed TV set into cabinets. The product in the resting state is placed inside a cabinet, where the TV set is also concealed; by operating a wired control, the product brings the TV set into the in-use state. The transition between the two states of rest/use takes place via an electric motor integrated in the lifting column. Models differ according to the length of the lifting column.

Technical data

- Minimum/maximum screen size 32" (EK-LTV-BL) / 65" (EK-LTV-XL-BL)
- Minimum space between TV and cabinet shelf: 13.50 mm
- Maximum weight: 25 kg
- Cycle time: 18 - 25 s
- Power supply voltage: 100 - 240 Vac ± 10% @ 50 - 60 Hz ± 2%
- Stand-by power: 0.1 W
- Total power output: 300 W
- Protection required: IP20

- Dimensions in idle position (WxHxD, without TV)
- EK-LTV-BL: 471 x 598,5 / 790 x 174.7 mm
- EK-LTV-XL-BL: 753,5 / 471 x 939 x 171.5 mm

- Maximum dimensions (WxHxD, without TV)
- EK-LTV-BL: 471 x 1445 x 174.7 mm
- EK-LTV-XL-BL: 471 x 1945 x 171.5 mm

- Mass (without TV)
- EK-LTV-BL: 15 kg (33 lb)
- EK-LTV-XL-BL: 16 kg (35 lb)

FINISHES

Order information			
Code	Height at rest	TV	Package
EK-LTV-BL	790 mm	fino a 43"	1 pcs.
EK-LTV-BL	939 mm	fino a 65"	1 pcs.

Up & Down Lift TV

REVÉLO

Installation dimensions

- EK-LTV-BL: 518 / 545 mm (518 / 545 mm)
- EK-LTV-XL-BL: 700 mm (700 mm)

Maximum excursion closed/open position

- EK-LTV-BL: 655 mm
- EK-LTV-XL-BL: 999 mm

Maximum thrust

- EK-LTV-BL: 700 N
- EK-LTV-XL-BL: 600 N

Bending moment

- EK-LTV-BL: My = max. 150 Nm dynamic
- EK-LTV-XL-BL: My = max. 100 Nm dynamic
- Maximum speed: 38 mm/s

Duty cycle

- EK-LTV-BL: 10 % ~ 2 min at continuous use and full load followed by 18 min break
- EK-LTV-XL-BL: 5 % ~ 2 min. at continuous use and full load followed by 18 min. pause

Functions / Features

- Compact design, guide and actuator are perfectly integrated
- Mounted connector for simple connection to control unit and separate motor cable
- Colour: black RAL 9005 Gloss 30
- Silent movement
- PIEZO™ technology: integrated anti-collision sensor minimises the risk of damage in the up and down direction
- PVC-Free™, made without PVC materials
- Invisible slide rails
- Minimum distance between profiles
- Synchronised movement of the middle profile
- Fixing bracket for wired control
- Motor housing (black) pre-mounted in the movement column
- Approval in accordance with EN 60335-1 and UL 962
- For push applications only
- Compatible with Sky Glass

TOOLS

Planner	460
Quoter	461

Planner

TOOLS

Description

PLANNER is a configuration software made available on its website from Ekinex®. This tool, from the easy to use and driven, allows the end user and the designer to identify products that are perfectly suited to the needs of the project. With PLANNER you can also choose and test different combinations of pushbuttons and wiring devices finishes to get closer as possible to the desired result. PLANNER allows you to fill out a simple list of devices to be used or they can be placed in a preview of a user-uploaded file, in order to recreate the actual conditions of the future installation. Finally, the software allows you to create a database of your projects with the ability to retrieve and modify projects at all times. When you finish using PLANNER allows you the chance to ask Ekinex® the best trade offer to the list of materials in your project

Use in 4 steps

1) ADD A PROJECT

From the Ekinex® site, reach PLANNER by following this link: planner.ekinex.com/en/. At this point you can decide whether or not to insert a map (jpeg, gif, png, pdf image format); in any case you will be asked to give a name to your project, so that you can identify it later.

2) SELECT DEVICES, MODELS AND FINISHING

PLANNER guides you on the page where you can find a list of products and create a list of devices to be installed in the system. All the devices can be placed on the image of the plan if previously inserted.

3) GET THE LIST

PLANNER gives you the ability to export and manage the list of chosen devices, to be able to control the features chosen.

4) SAVE THE PROJECT

By clicking on "save changes", you will save the positions and changes made. You can also print the project and export the list of products in pdf format.

Offer request

Planner is a great business tool. You can request this offer and conditions for devices of your project by clicking on the icon "**Request a quote**". The network of Ekinex® will contact you and will answer quickly and with the best offer for your project.

For further information contact: sales@ekinex.com

Quoter

TOOLS

Description

Ekinex Quoter is Ekinex's online configurator designed to create quotations quickly, accurately and professionally. Accessible directly via the web, Quoter is an intuitive tool designed to support designers, system integrators, installers and commercial partners in defining the economic offer for Ekinex® systems and devices. Thanks to a guided interface, Quoter allows you to select products, configure variants and automatically generate a detailed summary with codes, quantities and prices. The software allows you to organise and save your projects, maintaining a history that can be consulted and modified at any time. At the end of the configuration, you can export the quotation in PDF format, ready to be shared with the end customer or used for internal project purposes.

Accessing the platform

- 1) From the Ekinex® website, access Quoter via the link: quoter.ekinex.com/. Log in with your credentials to start creating a new quote or to view and edit existing projects.
- 2) Name the project and select the required Ekinex® products. The system guides you through the available configurations, allowing you to define quantities and variants in a simple and structured way.
- 3) Quoter automatically processes the complete list of selected devices, creating a detailed summary with all the information needed to formulate the quotation.
- 4) Save the project so that you can edit it at any time. You can export the quote in PDF format and share it directly with the customer or your team.

Sales tool

Quoter is an effective support tool for the sales network and industry professionals. It allows you to prepare structured offers that are consistent with the official Ekinex® price list, reducing margins of error and processing times.

SALES KIT

Style Case	464
Style Box	464
Color Ring	465
Glam Box	465
Crowner	466
Lettering	466
Roll-up	467
Tech Case	467

Description

Style Case is designed to showcase the Ekinex product ranges, assess their materials and colours, and evaluate their effect on walls with different finishes. It features 4 drawers complete with wall-mounted devices in demo mode. The EK-SC4-03 version comes as standard with 2 drawers containing working devices (expandable to 4 on request), whilst in the EK-SC4-03-PRO-ERA version, all 4 drawers contain working devices. Style Case also includes a handy colour chart and a pocket for catalogues and notes. The integrated handle allows for practical and easy transport.

For further information: sales@ekinex.com

Description

Style Box is a presentation case containing one or more Ekinex devices in different colours and finishes, allowing you to evaluate the various colour and aesthetic solutions available.

Projecting, configuration and commissioning

TECHNICAL SECTION

The Ekinex® home and buildings automation system was developed in accordance with the KNX open standard; therefore, the planning and the commissioning of a system as well as the configuration of its devices can be carried out easily by means of a PC and the ETS® software. The software allows to program Ekinex® devices, as well as thousands of other interoperable devices produced by companies which are members of KNX Association. All is needed to use Ekinex® devices in a system project, is the download from the www.ekinex.com website of either the application programs general file, the Ekinex® product database containing software for all devices, or the single, specific-application program as necessary. After importing product data into the internal ETS® database, one may start laying out the home automation project.

The first activity required consists of assigning a name to the project, along with general descriptive information, which will permit to re-use the same project without problems, even after a long time. The next step is to define the building's structure and the topology required by the home automation project. The devices are looked up in the database, copied into the structure and assigned a unique id, corresponding to their physical address. At this point, each device may be configured independently, by setting a series of parameters, which vary according to the function to be performed. For example, independent function can be attributed to each different channel of a single push-button command, e.g. switching on or off an electrical appliance, a dimmer for a light source or the opening/closing control for a roll-up shutter. The next step is to define the interaction between multiple devices; unlike traditional installations, where this is achieved by physically laying cables, in a home automation system this action is performed by means of virtual connections generated by the ETS® program.

It is then possible to upload the application program to each device, thereby including all the settings required to perform the expected function within the system. ETS® also has utility functions for diagnoses and error search; for instance, it is possible to verify physical addresses and to check the status of each single devices on the connected bus. Lastly, the program can produce the necessary project documentation for the end user, so that it may be further expanded and adapted in the future. The constant attention of KNX towards the world of professionals developed into a wide offer of training courses. Courses for experts have been offered for years in numerous countries and KNX constantly monitors the activity of all certified training centres, where it is possible to become KNX Partners. The professional role of a KNX Partner is to guarantee a high level of system expertise in order to achieve the best results. Among KNX Partners are designers, installers and system integrators, who offer expert advice to plan, install, run and maintain a KNX-standard control system for homes and buildings.

In order to become KNX Partner, one must withstand a 40-hours theory and practise exam at a KNX-certified Training Centre. A complete list of KNX Partner is available on the website of KNX Association (www.knx.org).

ETS® (Engineering Tool Software) is manufacturer-independent software, produced and marketed by KNX Association (www.knx.org)

KNX technology

TECHNICAL SECTION

KNX systems realize decentralized building automation; therefore, neither a central unit nor a supervising PC for control are required. Each device is fitted with an electronic part, which allows bus communication with all other devices on the bus, processes the received information or transmits the stored working parameters and the logics required for the completion of its task.

Communication

Communication between KNX devices occurs in digital form, by means of serial transmissions of organized information, called “telegrams”. A telegram includes the main information to be transmitted – e.g. a switch on or switch off command, a numerical value corresponding to a physical size detected by a sensor, etc. – and a series of accessory information required to guarantee an efficient, error-free communication. Any telegram, which is not duly received, can be repeated up to three times by the transmitting device. In order to avoid collisions between telegrams being sent out at the same time along the same bus from different devices, the CSMA/CA (Carrier Sense Multiple Access / Collision Avoidance) protocol is used. The information transmission speed occurs at 9600 bit/s, which makes it possible to avoid bus line resistor terminations.

Transmission medium

The family of Ekinex® TP bus devices uses twisted-pair signal cables to transmit data; the correct communication is guaranteed by employing bus cables with 1 or 2 conductor pairs made in accordance with KNX Association's TP1 specifications.

The transmission medium utilized by Ekinex® devices are standard KNX TP1 cables in the 2 or 4 conductors version

Connecting the devices

Ekinex® devices are connected to the signal bus cable by means of the KNX bus termination block. The termination block and the cable form part of a convenient, fast-connection system aimed at eliminating errors: the cable has rigid connectors and the termination block is fitted with holding springs (instead of screws); besides, the termination block is formed by two elements having the same colour-coding (black/red) of the conductors to be connected. Each stripped bus conductor will be simply inserted in place, where it will stay firm thanks to the provided holding spring. Each polarity has 4 connection areas and the termination block may be extracted from its seat: Thanks to these two characteristics, the removal of any device from the bus cabling does not determine the interruption of communications with the remaining devices. The termination block is also used for branching cable segments on the same bus.

Installation

KNX bus cables can be laid underneath the 230 Vac power cables along the same duct, provided they are kept isolated. Should the insulating sheath be removed, a distance of at least 4 mm between cable types must be guaranteed.

Topology

The smallest KNX system may include a single bus line along which up to 64 devices can be connected. The line must be equipped with the special bus power supply, which provides the necessary SELV voltage for the system to work. The effective number of bus devices that can be connected to the line is determined at project level and may vary depending on the voltage supplied by the bus power supply and on the electrical absorption of each device on the bus. Since each Ekinex® device can process multiple functions, a single-bus line can suffice to control an apartment, a detached house or even a larger building with a limited number of bus functions.

Next to a simple single-line configuration, a bus line can be subdivided into more segments, thus obtaining a star-shaped or a tree-shaped topology, or any combinations of the two.

Adding line couplers, allows the system to expand to accommodate for larger buildings and/or higher numbers of required bus functions. Connecting more lines between them by means of couplers and a backbone line constitutes an area. An area is formed by a backbone line, up to 15 secondary lines and by all the devices connected along them. A unique number between 1 and 15 characterizes each secondary line. With little less than 1000 connectible KNX devices, an area permits the handling of a medium/large size system.

KNX technology

TECHNICAL SECTION

It is necessary to respect KNX topology prescriptions while designing the system, in order to guarantee communication within the system:

- the maximum allowed line length is 1000 m, including all branches;
- up to 64 bus devices can be connected to one line;
- the maximum distance between 2 devices is 700 meters;
- no bus device may be more than 350 meters apart from a bus power supply;
- in case of high numbers of bus devices (> 30) along limited sections lengths (10m), a second bus power supply can be installed, provided it sits at least 200 meters away from the first.

Should the demand increase, a KNX system can be further extended by connecting one another up to 15 areas. The main lines of each single area are connected to a backbone line by means of area couplers. Areas and main lines are numbered 1 to 15, while the backbone line bears number 0. The most extended KNX system permits to connect tens of thousands of devices, thus satisfying the necessities of very large buildings.

Device addressing

The bus is a shared communication medium and each connected device must be exclusively distinguished from all others. The ETS® program takes care of that by assigning a physical address to each device; the address is represented in the form “area.line.device”. Thanks to that, the topology of the entire system is mirrored into the devices’ physical addresses, making it easy to locate a device in the whole topology, by simply knowing its physical address. For instance:

3.5.12 is the physical address of the bus device number 12, installed along line 5 in area 3

7.11.4 is the physical address of bus device number 4 on line 11 in area 7

A line coupler connects a secondary line to the backbone line; the device forms an integral part of the secondary line and conventionally assumes the device number “0”. The physical address of a line coupler can be, for instance:

3.5.0 is the physical address of the coupler connecting the secondary line n. 5 to the main line of area 3

The area coupler connects an area’s main line to the backbone line; the device is part of the main line and conventionally assumes device number “0” and line number “0”. The physical address of an area coupler is, for example:

3.0.0 is the physical address of the coupler connecting the main line of area 3 to the system’s backbone line

KNX technology

TECHNICAL SECTION

The physical address of the transmitting device is always present in a telegram, working as the “source address” of the message.

3.5.12

The physical address (area.line.device) is used when programming and diagnosing bus devices.

2/6/54

The group address is used when commanding and controlling the bus devices.

To coordinate the performance of several devices over a particular bus function, a so-called group address is used; this is represented by a two levels structure “main group/subgroup” (e.g. “2/15”) or by a three level structure “main group/middle group/subgroup” (e.g. “2/6/54”). This type of address is almost exclusively used as a “destination” address for telegrams.

Power supply

KNX systems work with the 30 Vdc SELV (Safety Extra Low Voltage) voltage, supplied by the bus power supply present on each line; this power feeds the electronic parts of the devices and provides for the transmission of information over the bus. Normally, KNX commands and sensors are exclusively connected to the bus line, while parts of KNX actuators require a separate 230 Vac power supply for commanding connected loads. Some devices may require an auxiliary SELV power supply for their operation.

Normative references

TECHNICAL SECTION

Norms are, by nature, voluntary application dispositions; anyhow, complying with norms constitutes the best guarantee in the choice of a product for designers, installers and end users. In fact, norms are “state-of-the-art” developments in their technology sector and precisely define quality, performance and safe conditions of use for a product. Beyond safety norms regarding all products, the systems for the control of houses and buildings are more often requested to integrate energetic

efficiency models, consistently abiding to recent tendencies aiming at global system-envelope system efficiency, more so than seek optimization of single parts. KNX represents an open and interoperable system for the automation of houses and buildings, normed at global level thanks to its conformity with international (ISO/IEC 14543-3), European (CENELEC EN 50090, CEN EN 13321-1 e 13321-2), Chinese (GB/Z 20965) and American (ANSI/ASHRAE 135) norms.

Norm	Title	Notes
ISO/IEC 14543-3	Information technology - Home electronic system (HES) architecture	In sight of the great interest towards KNX compatible products and the technology by them consolidated well beyond European markets, the KNX Association took all necessary steps to obtain approval of its own KNX standards at international levels. At the end of 2004, active CENELEC member countries proposed the European EN 50090 norm for ISO/IEC standardization. In November 2006, the KNX protocol and all transmission media (TP, PL, RF and IP) became approved and published under the international ISO/IEC 14543-3-x normative.
EN 50090	Home and Building Electronic Systems (HBES)	In December 2003, the KNX protocol and the two TP (twisted pair) and PL (power line) transmission media were approved by the European national committees and ratified by the CENELEC Bureau Technique under the European EN 50090 norm. The transmission medium KNX RF (radio frequency) was approved the month of may 2006.
CEN EN 13321-1	Open data communication in building automation, controls and building management. Home and building electronic system. Product and system requirements	Since KNX supplies more and more technical specifications used not only for the automation of electrical devices, but also for HVAC (Heating, Ventilation and Air Conditioning) applications, the KNX Association submitted its specifications to CEN for publishing a European normative for building control systems. CEN accepted the proposal and KNX specifications where published by CEN as EN 13321-1 and EN 13321-2.
CEN EN 13321-2	Open data communication in building automation, controls and building management. Home and building electronic systems. KNXnet/IP Communication	
GB/Z 20965	Control network HBES technology specification - Home and building control	The great interest demonstrated by China for KNX products and technology was the main reason for the KNX Association to have the international ISO/IEC 14543 norm translated into Chinese. The Chinese standardization committee SAC TC 124 introduced the KNX standard into China and adopted it under the GB/Z 20965 norm in July 2007.
ANSI/ASHRAE 135	BACnet - A Data Communication Protocol for Building Automation and Control Networks (ANSI Approved)	Even the interfacing of KNX with other automation systems is now internationally standardized: the norms US ANSI/ASHRAE 135 and ISO 16484-5 support mapping between KNX and BACnet.
CEI EN IEC 63044-3	2018 Home and Building Electronic Systems (HBES) and Building Automation and Control Systems (BACS)	Part 3: Electrical safety requirements
CEI EN IEC 63044-5-1	2017 Home and Building Electronic Systems (HBES) and Building Automation and Control Systems (BACS)	Part 5-1: EMC requirements, conditions and test set-up

Normative references

TECHNICAL SECTION

The EN 50090 norm

The European EN 50090 norm “Home and Building Electronic Systems (HBES)” was developed at CENELEC from the TC 205 Technical Committee, specifically established in 1996 to write norms covering all relevant aspects of electronic systems dedicated to the control of homes and buildings. Parts of the norm were progressively released and published by the standard committee of several European countries giving birth to the national norms about the electronic systems for homes and buildings.

Beyond the requirements for the development of HBES systems and components, aimed at builders, the norm also defines the criteria for designing, installing and testing an HBES system. The KNX standard is entirely compliant with the EN 50090 norm.

Part	Home and Building Electronic Systems (HBES) - Title of the part	Year
EN 50090-1	Part 1: Standardization structure	2011
EN 50090-2-1	Part 2-1: System overview - Architecture	1998
EN 50090-2-2/A2	Part 2-2/A2: System overview - General technical requirements	2008
EN 50090-2-3	Part 2-3: System overview - General functional safety requirements for products intended to be integrated in HBES	2006
EN 50090-3-1	Part 3-1: Aspects of application - Introduction to the application structure	1997
EN 50090-3-2	Part 3-2: Aspects of application - User process for HBES Class 1	2004
EN 50090-3-3	Part 3-3: Aspects of application - HBES Interworking model and common HBES data types	2010
EN 50090-4-1	Part 4-1: Media independent layers - Application layer for HBES Class 1	2006
EN 50090-4-2	Part 4-2: Media independent layers - Transport layer, network layer and general parts of data link layer for HBES Class 1	2005
EN 50090-4-3	Part 4-3: Media independent layers - Communication over IP	2008
EN 50090-5-1	Part 5-1: Media and media dependent layers - Power line for HBES Class 1	2005
EN 50090-5-2	Part 5-2: Media and media dependent layers - Network based on HBES Class 1, Twisted Pair	2005
EN 50090-5-3	Part 5-3: Media and media dependent layers - Radio frequency	2007
EN 50090-7-1	Part 7-1: System management - Management procedures	2005
EN 50090-8	Part 8: Conformity assessment of products	2001
EN 50090-9-1	Part 9-1: Installation requirements - Generic cabling for HBES Class 1 Twisted Pair	2005
CLC/TR 50090-9-2	Part 9-2: Installation requirements - Inspection and testing of HBES installation	2009

Energy efficiency in buildings

TECHNICAL SECTION

Based on the fact that buildings in Europe account for over 40% of total energy consumption, the European Union intensified its efforts over the last years so that buildings be projected and re-qualified, thereby restraining consumptions as much as possible. The declared objective is to reduce energy dependence and the emission of polluting and climate-changing gases. The starting point was the publishing of Directive 91 in 2002 about energy performance in building (known as EPBD – Energy Performance Building Directive) - a mandatory implementation for European Union countries – which introduced important new facts, such as the energy performance certification, aimed at informing users about the building’s energy performance and leaving up to national measures the identification of the most appropriate interventions needed to increase energy efficiency. The innovative approach required coordinated interventions on the envelope-system integrated system.

The EN 15232 norm

Following the Directive 2002/91/EC, the next step is to pay attention to efficiency recovery in individual behaviours and to concentrate on the relationship between the rate of automation in a building’s plan and the corresponding achievable energy saving. This has brought CENELEC to publish the EN 15232 norm, later acknowledged by the standard committee of several European countries. The norm evaluates the savings achievable through the adoption of growing automation levels – both during planning and energy verification operations – and to place buildings in one of four energy efficiency classes: from A (the most efficient) to D (the least efficient).

- A
- B
- C
- D

BACS: Building Automation Control System
TBM: Technical Building Management System

A class

A class includes highly energy-efficient buildings, fitted with control and automation systems (BACS) and technical system management (TBM), characterized by high levels of precision and completeness in terms of automatic control.

B class

B class includes energetically advanced buildings, fitted with control and automation systems (BACS) and technical system management (TBM) allowing a centralized-type of control.

C class

C class includes buildings, which are standard from an energy point of view and are fitted with basic control and automation systems (BACS). This class is also used as a reference for the calculation of efficiency factors.

D class

D class includes buildings, which are not energy-efficient, having technical systems exclusively of a traditional type, lacking any kind of automation.

The EN 15232 norm also specifies:

- a structured list of regulation functions, automation and technical management which have a certain effect on the energy efficiency of buildings;
- a method to define minimal requirements to apply for regulation, automation and technical management of buildings of different complexity;
- detailed methods to evaluate the effects of such functions on a specific building;
- a simplified method to reach a first impact estimate of such functions on representative buildings.

Quality certification

The Ekinex® products described in this catalogue are developed and built in conformity with the quality management system adopted by Ekinex S.p.A. and certified by DNV – Det Norske Veritas – in accordance ISO EN 9001:2008.

Access through mobile devices

All QR* codes appearing on product catalogue pages, provide quick access - at any time and from any place – to technical documentation or any other web content published at www.ekinex.com, by using mobile devices such as smart-phones or tablets. In order to decode QR, one simply must upload to his mobile device any freeware application found online.

(*) QR Code® is a trademark registered by Denso Wave Incorporated

Documentation on the Web

All tech documents for Ekinex® devices are available for download from the www.ekinex.com website, without requiring any registration. The search is free, and products may be searched by their code, family or type. The same documentation can quickly be accessed from within the product pages, too.

ETS application software in several languages

All Ekinex® devices have ETS application software in 4 languages: English, German, French and Italian.

Single packaging

Ekinex® devices are individually protected against shock & dust by means of a dedicated packaging. The label clearly describes the contents and bears both an (EAN) bar-code and a QR. Inside the packaging, the instructions sheet supplies information for the installation of the product.

General terms of sale

Valid for the Ekinex® product range.

1. DEFINITIONS

- 1.1 In these General Terms and Conditions of Sale, the terms below shall have the following meaning:
 - a) “Manufacturer”: Ekinex S.p.A, with registered office in Vaprio d’Agogna (28010 NO), via Novara 37;
 - b) “Purchaser”: professional customer, sole proprietor or company, requesting the purchase of Ekinex® products;
 - c) “Party” or “Parties”: Ekinex S.p.A. and the Buyer;
 - d) “Order” or “Orders”: the order or purchase orders concerning Ekinex® products issued by the Purchaser to Ekinex S.p.A.;
 - e) “Products”: all Ekinex®-branded products for home and building control, which can be found in the Ekinex® product catalogue in printed and/or electronic form and on the website www.ekinex.com;
 - f) “General Conditions”: the general conditions of sale set out below.

2. SCOPE OF APPLICATION

- 2.1. These General Terms and Conditions of Sale govern all purchase contracts concerning Ekinex® products concluded between the Parties;
- 2.2. The Buyer may not invoke or object to any conditions other than those contained in the General Conditions. Consequently, any conditions specified in writing shall have no validity, by the Buyer on the Order, or at any other stage of the contractual negotiation, and also after acceptance or knowledge of the General Conditions, as well as any other terms and conditions that the Buyer may have. General conditions of purchase of the Buyer. The execution, even partial, of the Order by Ekinex S.p.A. or any other fulfilment by Ekinex S.p.A. towards the Buyer is not valid and does not apply to the Buyer. Shall be construed as tacit or implicit acceptance of any general terms and conditions other than these Conditions, unless expressly accepted in writing by Ekinex S.p.A. Even in the event of derogations agreed upon in writing, these conditions shall continue to apply for the parts not expressly derogated.
- 2.3. The General Terms and Conditions are only valid for contractual relations between Ekinex S.p.A. and professional traders, and therefore Legislative Decree no. 206 of 6 September 2005shall not apply. (Consumer Code) and subsequent amendments.
- 2.4. Ekinex S.p.A. reserves the right to amend these General Terms and Conditions of Sale at any time, which shall be communicated to the customer without prior notice. Each contract shall be governed by the General Terms and Conditions of Sale in force at the time the order is placed by the Customer.

3. FORMATION OF THE CONTRACT

- 3.1. The acceptance by the Buyer of the offer or the confirmation of the order by Ekinex S.p.A., in whatever manner, entails the application of these General Conditions of Sale.
- 3.2. The offers made by agents, representatives and commercial auxiliaries of Ekinex S.p.A. are not binding for Ekinex S.p.A. until they have been confirmed by Ekinex S.p.A. in writing. The offers of sale made by Ekinex S.p.A. are valid for 30 days from the date of their formulation and are limited to the complete supply of what is listed therein. After the expiry of this period, the offer to sell shall no longer be valid.
- 3.3. The Order sent by the Purchaser to Ekinex S.p.A. constitutes an irrevocable contractual proposal binding for a period of three months, starting from the moment Ekinex S.p.A. becomes aware of it.

Within the aforementioned three months Ekinex S.p.A., at its sole discretion, reserves the right to accept or refuse the Order, informing the Buyer accordingly.

In the event that the order confirmation of Ekinex S.p.A. differs from the order sent by the Buyer with regard to the quantity of products, prices, discounts and delivery methods, this confirmation shall be considered as a counter proposal by Ekinex S.p.A., which must be expressly accepted by the Buyer in order for the contract to be considered concluded.
- 3.4. By sending the order, the Customer acknowledges and declares that he/she has read all the information provided to him/her during the purchase procedure and that he/she fully accepts these General Terms and Conditions of Sale.
- 3.5. Acceptance is expressed by a confirmation e-mail sent to the e-mail address indicated by the Customer. The confirmation message shall contain the date and time of the order and a ‘Customer Order Number’ to be used for any further communication with Ekinex S.p.A.. The customer may monitor the status of the order at any time by contacting Ekinex S.p.A. at the following telephone number +39 0321 1828980 or at the following e-mail address sales@ekinex.com.
- 3.6. If the Buyer cancels the Order before its acceptance or execution by Ekinex S.p.A., Ekinex S.p.A. may ask the Buyer to reimburse the costs of the Order.

4. PRODUCT AVAILABILITY

- 4.1. Ekinex S.p.A. reserves the right to change the Ekinex® product catalogue and the technical characteristics of the products without prior notice.
- 4.2. If one of the requested products is not available, Ekinex S.p.A. undertakes to contact the Customer within 20 working days from the time of placing the order, communicating by e-mail, to the email address provided by the customer, the unavailability and possible alternative solutions. In this case, the customer can wait for the delivery of the order, if Ekinex S.p.A. believes that it can be found on the market. The product is not available or cancel the order and receive a refund of any price already paid.
- 4.3. Before purchasing each product, carefully check the installation requirements according to the regulations of the country where the installation will take place and compatibility according to the design specifications.
- 4.4. Ekinex guarantees the correct installation of its products only with the flush-mounting boxes shown in the planner or technical catalogue. For the use of different flush-mounting boxes we recommend that you contact our technical support (support@ekinex.com) or check the correct installation yourself.

General terms of sale

5. PAYMENT METHODS

- 5.1. The prices of the products refer to the price list in force at the time of acceptance of the sale offer by the Buyer or at the time Ekinex S.p.A. issues the order confirmation.
- Ekinex S.p.A. reserves the right to modify the current price list at any time, after written notice to the Buyer, in the event of increases in the cost of raw materials, labour costs or any other factor leading to a significant increase in production costs. The prices of the products are always Ex-Carrier (FCA Incoterms 2010) and therefore the risks related to the supply shall pass to the Buyer at the time the products are handed over to the carrier, unless otherwise agreed upon in writing between the parties.
- 5.2. Payments must be made in accordance with the relevant information contained in the sales offer or order confirmation. Payments and any other sum due for any reason to Ekinex S.p.A. shall be made at its domicile and, unless otherwise agreed, in Euros.
- 5.3. Any delay or irregularity in payment gives Ekinex S.p.A. the right to
- a) suspend ongoing supplies, even if not related to the payment in question;
- b) vary the terms of payment and discount for subsequent supplies, including by requiring advance payment or the provision of additional guarantees;
- c) demand, from the due date for payment and without the need for formal notice, default interest on the sum still due, at the rate provided for by the rules of the law currently in force for commercial transactions (in particular Legislative Decree 231/2002 and subsequent additions), without prejudice in any case to the right of Ekinex S.p.A. to claim compensation for any additional costs incurred damage suffered. Moreover, in the above mentioned cases, any amount due to Ekinex S.p.A. for any reason whatsoever becomes immediately due. The Buyer shall be obliged to pay the products in full even if exceptions, disputes or controversies arise which will only be settled after payment of the amount due;
- d) terminate the contract pursuant to Article 1456 of the Italian Civil Code by notifying by registered letter with return receipt or certified e-mail the intention to exercise this right. The termination shall be effective for both parties from the date of receipt of the communication.

6. TRANSPORT AND DELIVERY OF PRODUCTS

- 6.1. The delivery of the goods is Ex-Carrier (FC Incoterms) and therefore the risks relating to the supply pass to the Buyer at the moment the products are handed over to the carrier, unless otherwise stated written agreements between the parties.

The delivery terms, unless expressly agreed otherwise, are purely indicative. In the event that the execution of the order is prevented by the occurrence of circumstances of force majeure, by the failure to regularity of supplies of raw materials or other unforeseeable circumstances occurring, the delivery terms shall be deemed extended and new terms shall be determined by mutual agreement between the parties, without any compensation and/or damages being awarded for the delay in delivery.

- 6.2. Upon delivery of the goods by the courier, the Customer is obliged to check that the contents of the package delivered correspond to what was ordered and indicated in the invoice sent by email.

Any damage to the packaging and/or to the product or the mismatch between the number of packages and the invoice must be reported within 3 working days of delivery to customer service of Ekinex S.p.A. at the following e-mail address sales@ekinex.com. After the expiry of this period, the customer may no longer make any complaints about the external characteristics of the product delivered as well as on the number of packages received.

7. FORCE MAJEURE

- 7.1 Force Majeure is the occurrence of an event or circumstance ("Force Majeure Event") which prevents a party from performing one or more of its contractual obligations if, and to the extent that, the party who suffers the event feels:
- a) that such impediment is beyond its reasonable control;
- b) the event could not reasonably have been foreseen at the time of the conclusion of the contract;
- c) that the effects of the impediment could not reasonably have been avoided or overcome by the Interested Party.
- 7.2 Where a party fails to perform one or more of its contractual obligations because of the non-performance of a third party, entrusted by the party to perform all or part of the contract, that party may invoke force Majeure only to the extent that the requirements of paragraph 1 are met by both the party and the third party.
- 7.3 In the absence of proof to the contrary, the following events suffered by a party shall be presumed to satisfy the conditions of paragraph 1 of this clause and that party shall only have to prove the existence of the condition in paragraph 1.
- a) war (whether declared or not), hostilities, invasion, acts of a foreign enemy, extensive military mobilisation;
- b) civil war, riot, rebellion, revolution, military force or usurpation of power, insurrection, acts of terrorism, sabotage or piracy;
- c) currency or trade restrictions, embargoes, sanctions;
- d) acts of authority, whether lawful or unlawful, compliance with laws or governmental orders, regulations, expropriation, confiscation of property, requisition, nationalisation
- e) plague, epidemic, natural catastrophe or extreme natural events;
- f) explosion, fire, destruction of equipment, prolonged suspension of transport, telecommunications or power
- g) generalised social conflicts, such as, in particular, boycotts, strikes and lock-outs, white strikes, occupation of factories and buildings.

General terms of sale

- 7.4 The Interested Party shall notify the other party without delay of the occurrence of the event.
- 7.5 The party who successfully invokes this Clause shall be released from its obligation to perform its contractual obligations, from any liability for damages or other contractual remedy for non-performance, from the time the event inhibits the performance of its contractual obligations, provided that it has been notified without delay. If notice of the event has not been given promptly, the release takes effect from the time when the notice reaches the other party. The other party may suspend performance of its obligations, if any, from the date of the notice.
- 7.6 If the effect of the impediment or event invoked is temporary, the consequences referred to in paragraph 5 shall occur only to the extent and for as long as the impediment or event invoked prevents the interested Party from performing its contractual obligations. The Interested Party shall inform the other Party as soon as the impediment ceases to prevent the performance of its contractual obligations.
- 7.7 The Interested Party shall take all reasonable steps to limit the effects of the invoked event on the performance of its contractual obligations.
- 7.8 If the duration of the invoked impediment has the effect of substantially depriving one or both parties to the contract of what they could reasonably expect under the contract, each party shall have the right to terminate the contract by giving notice to the other party within a reasonable period. The parties agree that, unless otherwise agreed, the contract may be terminated by either party if the duration of the impediment exceeds 120 days.
- 7.9 If paragraph 8 applies, and one of the parties has derived a benefit from the performance of the contract before its termination, it will be obliged to compensate the other party for the value of that benefit.

8. GUARANTEES

- 8.1. Ekinex S.p.A. guarantees the conformity of the Ekinex® products with the legislation and technical standards in force in the EEC.
- 8.2. Ekinex S.p.A. guarantees that the quality and type of the delivered products correspond to the contract and that they are free from defects that could make them unsuitable for the use for which they are intended.

The guarantee for construction defects is limited to those defects of the products that are attributable to defects in the material used or to design and construction problems attributable to Ekinex S.p.A..

All Ekinex® products sold by Ekinex S.p.A. are covered by the warranty for good functioning and the warranty for defects and/or faults in design and manufacture for a period of 24 months and therefore also in accordance with the Consumer Code if the end user is a consumer.

- 8.3. The warranty operates from the date of delivery of the goods by Ekinex S.p.A., except for the parts that are subject to normal wear and tear. After the expiration of this period, the warranty ceases, even if the products have not been put into operation for any reason at the end user.

Please note that the warranty on the products purchased from Ekinex S.p.A. is subject to the full payment of the products.

- 8.4. The above mentioned warranty is effective on condition that the products have been stored and used in accordance with the instructions in the General Catalogue and the technical data sheets provided by Ekinex S.p.A., that no repairs, modifications or alterations have been carried out without the prior written consent of Ekinex S.p.A. and that the defects found have not been caused by chemical or electrical agents.
- 8.5. The Purchaser shall report any defects in writing no later than 8 days after the delivery of the products, while the report of any hidden defects and/or operating defects (that can only be detected after the use of the product) must be made within 8 days after the discovery of the defect.

The warranty does not apply in the event of malfunctions of the software installed on the Product, which are due to overloads, electrical phenomena due to atmospheric events, interruptions and/or suspensions of electricity.

- 8.6. The notification of defects, including hidden defects, must be made in writing to Ekinex S.p.A. by sending a communication to support@ekinex.com within the prescribed period, indicating 1) the reference of the invoice with which the product was purchased, 2) the serial number of the product, 3) a brief technical report of the defects or non-conformities found and 4) if the end user is a consumer, the communication with which the latter has complained about the defect.

- 8.7. If the purchaser does not allow Ekinex S.p.A. to carry out any reasonable checks as requested by Ekinex S.p.A. and does not return the defective products to Ekinex S.p.A. within 60 days after delivery, the warranty right is forfeited.

In order to return the defective products, Ekinex S.p.A. shall, unless otherwise agreed, collect the defective material at its own expense according to the instructions on the day and place agreed upon by the parties. After the return, the defective products shall become the exclusive property of Ekinex S.p.A..

After the expiration of the above mentioned terms, Ekinex S.p.A. shall consider the latter as forfeited from the warranty and therefore invoice the products sent to replace the defective ones and consequently request the payment of the same.

- 8.8. Ekinex S.p.A., a) supply products of the same type (or equivalent) and quantity of those found to be defective free of charge at the registered office of the purchaser (DAP Incoterms 2010), subject to the return of the replaced products by the customer in the terms and conditions stated in paragraph 7. b) repair the defective products at the customer's premises, in accordance with the terms and conditions stated in paragraph 7. 7; b) repair the defective products if Ekinex S.p.A. does not find the necessity or urgency for an immediate replacement of the same; c) issue a credit note in favour of the Purchaser for an amount equal to the value indicated on the invoice of the returned products.

Ekinex S.p.A. shall only provide in the above ways if the purchaser has done everything within its competence.

Unless otherwise agreed between the Parties, it is understood that all the expenses related to the interventions carried out by the technical assistance of Ekinex S.p.A. shall be borne by the same.

Both in case of replacement and repair of defective products or components, the original warranty period shall continue to run, which shall not be renewed.

It should also be noted that once the correctness of the warranty request has been established Ekinex S.p.A. will only replace the defective products as indicated in this point 7.8, thus excluding that the customer may request the termination of the contract and/or compensation for damages.

General terms of sale

8.9 In the event that the defects of the products are not attributable to Ekinex S.p.A., the costs of repair and replacement of the products will be charged to the customer.

The warranty referred to in this article is in lieu of the legal warranties for defects and conformity and excludes any other possible liability of Ekinex S.p.A. arising from the products supplied. In particular, the Purchaser may not make any other claims for damages and Ekinex S.p.A. shall not be held responsible for indirect or consequential damages.

9. INDUSTRIAL PROPERTY

9.1. Ekinex S.p.A. remains the exclusive owner of the patents, drawings, projects and everything used for the manufacture of the Products, which the Purchaser therefore undertakes not to hand over to third parties, reproduce or use. If the manufacture of the Products is carried out by Ekinex S.p.A. upon the specific request and technical documentation of the Buyer, Ekinex S.p.A. shall not assume any responsibility for the infringement of industrial property rights of third parties, which shall instead be the exclusive responsibility of the Buyer, who undertakes to guarantee and keep Ekinex S.p.A. indemnified and unharmed against any claim made against it.

9.2. The Purchaser undertakes to use the trademarks of Ekinex S.p.A. only for the purpose of identifying, advertising and selling the Products, and shall refrain from depositing them or having them deposited without the prior written consent of Ekinex S.p.A..

10. TERMINATION AND WITHDRAWAL

10.1 The buyer, in accordance with article 1454 of the Italian civil code, must give Ekinex S.p.A. a written notice to comply with the contract within a period of time that is not less than 30 days, before acting to terminate the contract due to non-fulfilment. If Ekinex S.p.A. has started to perform within this period, the buyer shall not be able to terminate the contract. (A termination period for Ekinex may also be included, but the termination for non-payment may be decided on the basis of the obligations imposed on the customer in addition to the payment).

10.2 Both parties may withdraw from the contract, however in addition to the provisions of Italian law Ekinex S.p.A. may also withdraw from the contract in the event of a force majeure event as specified in Article 7 of the general terms and conditions of sale prepared by Ekinex S.p.A..

Both parties must therefore communicate their intention to withdraw from the contract by registered letter or certified email and the withdrawal will take effect from the date of receipt of the communication.

10. COMPENSATION FOR DAMAGES

10.1. The liability of Ekinex S.p.A., whether arising from the execution or non-execution of the contract, from the warranty, from an illegal act or from an objective liability, shall not in any case exceed the value of the product to which this liability relates. Under no circumstances shall Ekinex S.p.A. be liable for loss of profit or loss of use or downtime of the product or any associated machinery, for claims by the Buyer and/or third parties relating to the aforementioned damages or for any other indirect or consequential damages.

11. CONFIDENTIALITY

11.1. The Purchaser agrees to (i) treat the information/data/documents/know how/documents received and/or learnt from Ekinex S.p.A. as confidential, (ii) limit the use of such confidential information/documents and the access to them for purposes related to the execution of the contract. Confidential information/documents may not be reproduced without the prior written consent of Ekinex S.p.A., and all copies of such information/documents shall be immediately returned upon request by Ekinex S.p.A..

The above provisions do not apply to information that: (i) is public or becomes public other than by disclosure by the Buyer, its employees or collaborators, or (ii) was in the possession of the Buyer before it was received by Ekinex S.p.A. or (iii) was disclosed by sources that are not subject to the restrictions to which the Buyer is subject regarding its use, or (iv) can be disclosed to third parties based on a written authorization of Ekinex S.p.A.

12. APPLICABLE LAW AND PLACE OF JURISDICTION

12.1. These General Conditions and the related supply contracts shall be governed by Italian law.

The Court of Novara shall have exclusive jurisdiction over any dispute relating to or in any case connected to the contracts to which these General Conditions apply.

13. COVID-19 CLAUSE

13.1 By signing this deed, the Purchaser declares that he is aware that the epidemiological emergency in progress due to the spread of the Coronavirus (Covid-19) and the regulations adopted to combat the aforementioned pandemic could have an effect on the fulfilment and execution of orders placed with Ekinex S.p.A..

13.2 Ekinex S.p.A. reserves the right to extend the terms, apply additional costs or amend these general terms and conditions of sale in the event that the condition referred to in the previous point occurs, after notifying the Purchaser.

14. CONTACTS

14.1 Indicate Ekinex’s contact details + addresses for any communications.

15. VEXATIOUS CLAUSES

15.1 The customer expressly declares that he/she accepts and approves in accordance with articles 1341 and 1342 of the Civil Code the following clauses:
2. Applicable law and competent court; 5. Terms of payment; 6. Transport and delivery of products; 8. Guarantees; 10. Applicable law and competent court; 13 Covid-19 clause.

90-230V-50/60Hz DALI dimmer	337
90-230V-50/60Hz DALI dimmer 4 channels	338

THERMOREGULATION	339
VRF control interface with KNX communication	340
Fan coil actuator/controller with 3-speed control	341
Fan coil actuator/controller with 0 V control	342
Fan coil actuator/controller, complete version	343
8-channel actuator/controller for electrothermal drives	344
Controller for mixing group	345
NTC 10 kΩ temperature probes	346

GATEWAY	347
Modbus RS485 KNX gateway	348
Modbus TCP/IP KNX gateway	349
BACnet KNX gateway	350
DMX KNX gateway	351
M-Bus KNX gateway	352
PROFINET KNX gateway	353
RS485 to Ethernet POE gateway	354
1-channel KNX/DALI gateway	355
2-channel KNX/DALI gateway	356
C4 Toolbox	357
Interface for KNX voice assistant	358
Konnect4 KNX	359

METERING	360
KNX three-phase secondary electricity meter	361
KNX three-phase secondary electricity meter for external KNX CT	362
KNX single-phase secondary electricity meter	363
Current transformer for secondary electricity meter	364
MID three-phase electricity meter 75A	365
Three-phase MID electricity meter 5A	366

DIN RAIL MODULE ACCESSORIES	367
Terminals	367
Bus cable	367

VISUALISATION	369
Ekinex Delégo: the system	373
Renewed graphic interface	374
Simplified configuration and maintenance	377
Absolute versatility	378
Main features Licences	379
Delégo server	380
Delégo panel	382

MULTIROOM AUDIO SYSTEM	385
30W streamer amplifier	398
50Wx2 streamer amplifier	399
80Wx2 streamer amplifier	400
50Wx8 streamer amplifier	401
IP66 wall-mounted loudspeaker (pair) black/white	403
2-way full range flush-mounted ceiling loudspeaker	404
Q Series loudspeaker	405
R Series loudspeaker	407
T Series loudspeaker	407
Omni/Iride loudspeaker	408
Sub	409
Modulor loudspeaker	410
KNX-Sentio gateway	411

INVISIBLE PLAYER	413
Acoustic energy transmitters	422
POWER 1 amplifier	426
Accessories	427

IP VIDEO DOOR PHONE	432
5" IP video door phone	444
Dico Security Relay	445

LIFT TV	449
Under Bed Lift TV	456
Up & Down Lift TV	457

TOOLS	459
Planner	460
Quoter	461

SALES KIT	463
Style Case	464
Style Box	465
Color Ring	465
Glam Box	465
Crowner	466
Lettering	466
Roll-up	467
Tech Case	469

DESIGN, CONFIGURATION AND COMMISSIONING	
KNX technology	471
Regulatory references	472
Energy efficiency in buildings	473
